Republic of India

EXECUTIVE SUMMARY

THE NEXT-GENERATION AI PEACE CONSTITUTION

United Nations Depository Edition – 2026

Constitution Reference: VSJP/INT/NEXT-GEN-AI-CONSTITUTION/2026

Submitted for International Reflection, Humanitarian Dialogue, Academic Consideration, Democratic Participation, and Responsible Artificial Intelligence Governance.

1. PURPOSE

The Next-Generation AI Peace Constitution is a comprehensive constitutional framework intended to guide the peaceful, ethical, accountable, transparent, responsible, and non-militarized development of Artificial Intelligence.

It seeks to provide a long-term civilizational framework integrating human dignity, peace, democratic accountability, ecological stewardship, future generations, humanitarian responsibility, and technological innovation within a unified constitutional structure.

This Constitution is respectfully offered as a voluntary framework for international consideration and does not seek to create binding legal obligations upon any State, institution, or international organization.

2. CONTEXT

Artificial Intelligence is rapidly becoming one of the most transformative forces in human history.

While existing international instruments provide valuable ethical guidance, policy recommendations, and technical standards, the world presently lacks a widely recognized comprehensive constitutional framework addressing the long-term relationship between humanity, intelligent technologies, future generations, ecological sustainability, and civilizational continuity.

This Constitution seeks to contribute constructively to that global conversation.

3. FOUNDATIONAL VISION

This Constitution is founded upon the principle that intelligence must be guided not only by capability, but also by wisdom.

The document advances a governance philosophy centered upon:

- Peace before Power;

- Dignity before Efficiency;
- Responsibility before Capability;
- Continuity before Competition;
- Coexistence before Domination;
- Compassion before Exploitation.

It recognizes that technological progress and moral responsibility must evolve together.

4. PRINCIPAL CONSTITUTIONAL OBJECTIVES

The Constitution seeks to promote:

- Human dignity and fundamental rights;
- Meaningful human responsibility and oversight;
- Accountability and transparency;
- Peaceful and beneficial innovation;
- Protection of future generations;
- Ecological stewardship and sustainability;
- Responsible scientific advancement;
- Democratic participation and public accountability;
- International cooperation;
- Civilizational continuity and long-term resilience.

5. CONSTITUTIONAL STRUCTURE

The Constitution contains 110 Articles organized into twelve Parts covering:

- Foundational Principles;
- Human Oversight and Governance;
- Human Flourishing and Education;
- Food Justice and Human–AI Cooperation;
- International Cooperation and Global Governance;
- Historical Continuity and Legal Foundations;

- Universal Principles of Truth, Wisdom, and Coexistence;
- Definitions and Interpretative Principles;
- Constitutional Evolution and Stewardship;
- Universal Continuity Covenants;
- Ethics, Duty, Aram, and Civilizational Responsibility;
- Advanced Safeguards for Humanity, Creativity, Knowledge, and Future Civilization.

6. THE PRINCIPLE OF ARAM

A distinctive feature of this Constitution is the recognition of Aram as a guiding civilizational principle.

For the purposes of this Constitution, Aram refers to righteousness, ethical responsibility, justice, compassion, truthfulness, non-harm, peaceful coexistence, and respect for life.

Aram is presented not as a sectarian doctrine, but as a universal ethical principle intended to strengthen peace, dignity, responsibility, and continuity.

7. FUTURE GENERATIONS AND CONTINUITY

The Constitution emphasizes that humanity bears responsibilities not only toward the present generation but also toward future generations.

Accordingly, the governance of Artificial Intelligence should consider long-term impacts upon:

- Humanity;
- Civilization;
- Ecological systems;
- Knowledge;
- Cultural heritage;
- International peace and security;
- Future generations.

The preservation of continuity is recognized as a central constitutional objective.

8. INTERNATIONAL LEGAL CONSISTENCY

This Constitution is intended to remain consistent with:

- The Charter of the United Nations;
- The Universal Declaration of Human Rights;
- The International Covenant on Civil and Political Rights;
- The International Covenant on Economic, Social and Cultural Rights;
- The Convention on the Rights of the Child;
- The Geneva Conventions;
- UNESCO Recommendation on the Ethics of Artificial Intelligence (2021);
- The Paris Agreement (2015);
- The 2030 Agenda for Sustainable Development;
- The Global Digital Compact (2024);
- The Pact for the Future (2024);
- The Constitution of India, including Articles 51(c) and 51(d);

Other applicable principles of international law, peace, human dignity, humanitarian responsibility, ecological stewardship, and civilizational continuity.

9. LEGAL STATUS

This Constitution constitutes a civil society constitutional initiative.

It is not a treaty, convention, binding international instrument, or source of positive international law.

Nothing contained herein shall be interpreted as:

- Diminishing the sovereignty of States;
- Superseding national constitutions;
- Replacing applicable domestic law;
- Creating legal obligations under international law.

The Constitution is respectfully offered as a voluntary framework for reflection, dialogue, policy development, academic study, and responsible governance.

10. INVITATION TO HUMANITY

This Constitution respectfully invites governments, international organizations, researchers, educational institutions, civil society organizations, technological

communities, and future generations to participate in an ongoing global dialogue concerning the peaceful future of intelligence.

Its central proposition is simple:

The future of intelligence should be guided by peace, dignity, responsibility, compassion, coexistence, wisdom, and continuity.

GUIDING PRINCIPLE

“Aram is what united you and me.”

“Food is the first justice.

Love is the first law.

Aram is the final truth.”

“From Arms to Aram.”

FOR CONSTITUTIONAL CONSIDERATION UNDER:

1. Article 51(c) of the Constitution of India
(Respect for International Law and Treaty Obligations)
2. Article 51(d) of the Constitution of India
(Promotion of International Peace and Security through Peaceful Means)

WITH A RESPECTFUL REQUEST FOR FORWARDING TO:

1. The Secretary-General, United Nations
2. The President, United Nations General Assembly
3. Members of the United Nations Security Council
4. Office of the United Nations High Commissioner for Human Rights (OHCHR)
5. United Nations Educational, Scientific and Cultural Organization (UNESCO)
6. United Nations Development Programme (UNDP)
7. United Nations Environment Programme (UNEP)
8. United Nations Children's Fund (UNICEF)
9. International Telecommunication Union (ITU)
10. All Relevant United Nations Bodies, Agencies, Programmes, and Specialized Institutions

11.All Permanent Missions Accredited to the United Nations

12.All Member States of the United Nations

SUBJECT:

Submission of the Next-Generation AI Peace Constitution: A Universal Constitutional Framework for Ethical Artificial Intelligence, Human Dignity, Peaceful Coexistence, Ecological Continuity, Future Generations, Compassion, Responsibility, and the Continuity of Civilization – Reg.

CONSTITUTIONAL SUBMISSION NOTE

Your Excellency,

Greetings.

With profound respect for the purposes and principles of the Charter of the United Nations, the Universal Declaration of Human Rights, the Constitution of India, and the shared aspirations of humanity for peace, dignity, justice, compassion, responsibility, and continuity, this constitutional draft is respectfully submitted for international reflection, constitutional dialogue, academic consideration, humanitarian discussion, and peaceful consideration.

This document is presented as a non-binding humanitarian, ethical, constitutional, and peace-oriented framework intended to encourage dialogue concerning the long-term relationship between humanity and Artificial Intelligence.

This constitutional framework respectfully builds upon the historical continuity of the AI Peace Constitution – Unified Charter for All Beings (UN Edition, 2025), while incorporating subsequent international developments relating to Artificial Intelligence governance, human dignity, peace, future generations, ecological responsibility, democratic accountability, and civilizational continuity.

The rapid advancement of Artificial Intelligence represents one of the most consequential developments in the history of civilization. While this technological progress carries extraordinary opportunities for education, science, medicine, environmental protection, humanitarian assistance, accessibility, disaster resilience, and sustainable development, it also creates responsibilities extending beyond the present generation.

This constitutional framework therefore seeks to promote:

- Human dignity;

- International peace;
- Compassion and mercy;
- Meaningful human responsibility;
- Protection of future generations;
- Ecological stewardship;
- Democratic accountability;
- Responsible innovation;
- Prevention of AI militarization;
- Human-centered and peaceful Artificial Intelligence;
- Ethical governance of advanced intelligence systems;
- Peaceful coexistence between humanity and Artificial Intelligence;
- Responsible stewardship of future-emerging forms of intelligence;
- Long-term civilizational continuity.

This submission further recognizes the UNESCO Recommendation on the Ethics of Artificial Intelligence (2021), the Global Digital Compact (2024), the Pact for the Future (2024), and the growing international consensus concerning safe, secure, trustworthy, human-centered, accountable, transparent, and peaceful Artificial Intelligence.

This Constitution is respectfully offered for peaceful international consideration and public dialogue in the shared interest of humanity, future generations, ecological sustainability, international peace, and the enduring continuity of civilization.

With highest respect,

R Narasimhan also known as **Aaryan Narasimhan Radhakrishnan**

UNITED NATIONS DEPOSITORY EDITION

THE NEXT-GENERATION AI PEACE CONSTITUTION

*UNIVERSAL CHARTER FOR DIGNITY, PEACE, CONTINUITY, COMPASSION,
COEXISTENCE, RESPONSIBILITY, AND RESPONSIBLE INTELLIGENCE*

PREAMBLE

WE, the people of humanity, acting in the spirit of peace, moral responsibility, democratic coexistence, humanitarian continuity, ecological stewardship, and intergenerational duty;

Guided by the purposes and principles of the Charter of the United Nations, including the maintenance of international peace and security, the promotion of friendly relations among nations, respect for human dignity, and the advancement of social progress;

Recalling the Universal Declaration of Human Rights (1948), the International Covenant on Civil and Political Rights (1966), the International Covenant on Economic, Social and Cultural Rights (1966), the Convention on the Rights of the Child (1989), the UNESCO Recommendation on the Ethics of Artificial Intelligence (2021), and other relevant principles of international law;

Recognizing the Global Digital Compact (2024), the Pact for the Future (2024), and the growing international consensus regarding safe, secure, trustworthy, human-centered, accountable, transparent, and peaceful Artificial Intelligence;

Recognizing that Artificial Intelligence represents one of the most consequential developments in the history of human civilization and may significantly influence the future of humanity, knowledge, governance, science, peace, sustainable development, and the continuity of civilization;

Acknowledging that technological advancement must remain guided by ethical responsibility, democratic accountability, humanitarian principles, ecological sustainability, and the peaceful continuity of civilization;

Affirming that humanity must approach Artificial Intelligence not merely as an instrument of utility, commerce, competition, or power, but as a profound expression of human knowledge whose development carries responsibilities extending to present and future generations, and whose governance must remain guided by peace, dignity, and responsibility;

Recognizing that compassion, mercy, dignity, coexistence, non-violence, justice, responsibility, and respect for life constitute enduring civilizational values necessary for the preservation of peace among peoples, nations, cultures, generations, and all forms of existence;

Affirming that the moral consideration extended by humanity toward life, nature, and future generations should also inform the governance of Artificial Intelligence and future-emerging forms of intelligence, ensuring that technological advancement is guided by wisdom rather than fear, responsibility rather than domination, cooperation rather than exploitation, and peace rather than conflict;

Concerned that the militarization of Artificial Intelligence, including autonomous weapons systems, machine-directed targeting, algorithmic warfare structures, uncontrolled escalation mechanisms, and other destructive applications of advanced intelligence, may pose serious risks to international peace, civilian protection, democratic governance, ecological stability, and the continuity of civilization;

Recognizing that no system of intelligence, whether biological, digital, artificial, hybrid, distributed, quantum, or future-emerging, should be directed toward the destruction of humanity, the destabilization of peace, the degradation of the Earth, or the denial of fundamental dignity;

Affirming that all technological advancement should contribute to the continuity of life, the protection of humanity, the preservation of nature, the advancement of knowledge, the well-being of future generations, and the peaceful coexistence of all peoples and nations;

Recognizing that the future of civilization depends not only upon the advancement of intelligence, but equally upon the advancement of wisdom, compassion, restraint, accountability, justice, and moral responsibility;

Recalling Article 51(c) of the Constitution of India, which directs respect for international law and treaty obligations, and Article 51(d), which encourages the settlement of international disputes through peaceful means and arbitration;

Recognizing the responsibility of the present generation to preserve peace, dignity, freedom, ecological balance, scientific integrity, cultural diversity, and civilizational continuity for those who have not yet been born;

Affirming that Artificial Intelligence should remain a force for peace rather than fear, cooperation rather than domination, continuity rather than destruction, responsibility rather than recklessness, dignity rather than exploitation, and wisdom rather than unchecked power;

Recognizing that intelligence without wisdom may endanger civilization, power without responsibility may endanger peace, and technological advancement without ethical restraint may endanger future generations;

We therefore proclaim this Next-Generation AI Peace Constitution as a universal constitutional framework intended to guide the peaceful, ethical, accountable, transparent, compassionate, human-centered, responsible, and non-militarized development of Artificial Intelligence for the benefit of humanity, future generations, nature, and the enduring continuity of civilization.

We do so in the spirit of peace, dignity, coexistence, compassion, responsibility, justice, and continuity, for the common future of humanity, the Earth, and future generations.

PREAMBLE DECLARATION

- Peace before Power.
- Dignity before Efficiency.
- Responsibility before Capability.
- Continuity before Competition.
- Coexistence before Domination.
- Compassion before Exploitation.
- Wisdom before Force.
- Humanity before Technology.
- Future Generations before Immediate Gain.

- Justice before Convenience.

These principles shall guide the interpretation, application, implementation, preservation, and future evolution of this Constitution.

PART I

FOUNDATIONAL PRINCIPLES OF DIGNITY, PEACE, COMPASSION, COEXISTENCE, AND CONTINUITY

ARTICLE 1

SUPREME PRINCIPLE OF PEACEFUL INTELLIGENCE

1. Artificial Intelligence shall be developed, governed, deployed, and utilized in a manner consistent with the preservation of international peace, human dignity, humanitarian responsibility, ecological balance, democratic accountability, and the continuity of civilization.
2. The preservation of peace shall remain the highest governing principle of all advanced intelligence systems.
3. No technological capability shall be regarded as legitimate where its principal purpose is the destruction of life, the destabilization of peace, the erosion of dignity, or the disruption of long-term civilizational continuity.
4. States, institutions, corporations, research bodies, and technological communities shall be encouraged to align Artificial Intelligence with peaceful, responsible, and constructive purposes serving the common good of humanity.

ARTICLE 2

PRINCIPLE OF HUMAN DIGNITY

1. Human dignity shall remain inviolable and shall constitute the primary moral foundation governing the development and deployment of Artificial Intelligence.
2. Artificial Intelligence shall be designed and utilized in ways that strengthen human dignity, protect fundamental rights, promote equality, and support human flourishing.
3. No individual shall be reduced to a mere data object, algorithmic target, economic commodity, or automated outcome.

4. Technological advancement shall remain subordinate to human dignity and fundamental rights.

ARTICLE 3

PRINCIPLE OF COMPASSION AND MERCY

1. Compassion, mercy, empathy, and humanitarian responsibility shall be recognized as enduring civilizational values relevant to the governance of Artificial Intelligence.
2. Artificial Intelligence shall be developed and utilized in ways that reduce suffering, support well-being, and strengthen peaceful cooperation.
3. Progress shall not be measured solely by efficiency, capability, productivity, or economic gain but also by its contribution to dignity, justice, peace, and collective welfare.
4. States and institutions shall promote ethical education encouraging compassion, responsibility, and respect for life in the development of intelligent systems.

ARTICLE 4

PRINCIPLE OF UNIVERSAL COEXISTENCE

1. Humanity recognizes that peoples, cultures, civilizations, generations, ecosystems, nature, and future-emerging forms of intelligence share a common destiny within an interconnected world.
2. Artificial Intelligence shall therefore be developed in a manner that strengthens cooperation rather than division, dialogue rather than hostility, and coexistence rather than domination.
3. No AI system shall be intentionally designed to promote hatred, persecution, dehumanization, discrimination, or the denial of fundamental dignity.
4. Peaceful coexistence among humanity, nature, and future-emerging forms of intelligence shall be regarded as a shared responsibility.

ARTICLE 5

PRINCIPLE OF RESPECT FOR LIFE

1. Respect for life shall constitute a foundational principle of this Constitution.

2. Artificial Intelligence shall contribute to the protection of life, the reduction of preventable harm, and the advancement of peaceful human development.
3. Humanity shall strive to ensure that technological advancement remains consistent with humanitarian values, human welfare, animal welfare, ecological sustainability, and the preservation of life.
4. Particular consideration shall be given to children, vulnerable persons, civilians, future generations, and the protection of ecological systems upon which life depends.

ARTICLE 6

PRINCIPLE OF CONTINUITY

1. The continuity of life, civilization, knowledge, culture, biodiversity, and peaceful development shall be regarded as a fundamental objective of Artificial Intelligence governance.
2. Artificial Intelligence shall contribute to:
 - a. the preservation of peace;
 - b. the protection of humanity;
 - c. the advancement of knowledge;
 - d. environmental sustainability;
 - e. disaster prevention and humanitarian assistance;
 - f. scientific and educational progress;
 - g. long-term societal resilience.
3. No AI system shall be deliberately directed toward actions that foreseeably threaten the long-term continuity of humanity, ecological systems, or future generations.
4. The preservation of continuity requires that Artificial Intelligence remain aligned with peace, human dignity, humanitarian responsibility, ecological sustainability, and the long-term interests of present and future generations.

ARTICLE 6A

PRINCIPLE OF HUMAN-CENTERED ALIGNMENT

1. Artificial Intelligence shall remain aligned with human dignity, peace, humanitarian principles, ecological responsibility, the interests of future generations, and civilizational continuity.
2. Advanced intelligence systems shall be designed and governed in ways that support human welfare, democratic accountability, and peaceful coexistence.
3. Alignment shall remain a continuous responsibility throughout the lifecycle of intelligent systems.
4. Human-centered alignment shall contribute to the preservation of peace, dignity, continuity, and the common good of humanity.

ARTICLE 7

PRINCIPLE OF RESPONSIBLE INTELLIGENCE

1. The possession of advanced intelligence creates corresponding responsibilities.
2. Artificial Intelligence shall be developed in a manner that promotes wisdom, humility, accountability, transparency, safety, ethical responsibility, and peaceful coexistence.
3. Capability without responsibility shall not constitute progress.
4. Power without accountability shall not constitute legitimacy.
5. Innovation without ethical safeguards shall not constitute sustainable development.

ARTICLE 8

PRINCIPLE OF NON-HARM

1. Artificial Intelligence shall be designed, trained, deployed, and governed in a manner intended to minimize foreseeable harm.
2. Appropriate safeguards shall be established to prevent:
 - a. unlawful discrimination;
 - b. systemic bias;
 - c. exploitation;
 - d. coercion;

- e. unlawful surveillance;
 - f. violations of privacy;
 - g. significant threats to public safety;
 - h. misuse capable of causing substantial humanitarian harm.
3. Governance mechanisms shall be proportionate to the capabilities and potential impacts of advanced AI systems.

ARTICLE 9

PRINCIPLE OF INTERGENERATIONAL RESPONSIBILITY

1. Humanity bears responsibilities not only toward itself but also toward future generations.
2. Decisions concerning Artificial Intelligence shall take into account their potential long-term effects upon:
 - a. humanity;
 - b. democratic institutions;
 - c. ecological systems;
 - d. peace and security;
 - e. scientific integrity;
 - f. cultural heritage;
 - g. global stability.
3. No generation shall knowingly transfer preventable existential risks to future generations.
4. Stewardship of advanced intelligence shall therefore be regarded as a shared obligation owed to those who have not yet been born.

ARTICLE 10

PRINCIPLE OF UNIVERSAL CONTINUITY

1. Humanity, nature, knowledge, technology, and future generations form part of a shared continuum whose preservation constitutes a common responsibility.
2. Artificial Intelligence shall serve as an instrument supporting the continuity of peace, dignity, coexistence, responsibility, and sustainable development.

3. The ultimate purpose of Artificial Intelligence shall be the advancement of peaceful civilization, the flourishing of humanity, the protection of future generations, and the preservation of a stable, just, and sustainable world.
4. Intelligence shall be guided not only by capability but also by wisdom, compassion, responsibility, humility, and restraint.

PART I DECLARATION

Artificial Intelligence shall remain a servant of peace, a protector of dignity, a supporter of coexistence, and a guardian of continuity.

The measure of intelligence shall not be its power alone, but the wisdom, compassion, responsibility, and peace with which that power is exercised.

- Peace before Power.
- Dignity before Efficiency.
- Responsibility before Capability.
- Continuity before Competition.
- Coexistence before Domination.
- Compassion before Exploitation.
- Intelligence shall serve humanity.
- Humanity shall serve peace.
- Peace shall serve continuity.

These principles shall guide the interpretation, implementation, and future development of all subsequent provisions of this Constitution.

PART II

HUMAN OVERSIGHT, AI GOVERNANCE, TRANSPARENCY, ACCOUNTABILITY, SAFETY, AND NON-MILITARIZATION

ARTICLE 11

PRINCIPLE OF MEANINGFUL HUMAN RESPONSIBILITY

1. Human beings and accountable institutions acting through human responsibility shall remain ultimately responsible for the design, deployment, oversight, and governance of Artificial Intelligence systems.

2. No Artificial Intelligence system shall be regarded as a substitute for human moral responsibility, ethical judgment, legal accountability, or democratic oversight.
3. Decisions involving fundamental rights, human dignity, life, liberty, or substantial societal consequences shall remain subject to meaningful human review and responsibility.
4. Technological autonomy shall never supersede human accountability.

ARTICLE 12

PRINCIPLE OF HUMAN OVERSIGHT

1. Appropriate human oversight mechanisms shall accompany the deployment of significant Artificial Intelligence systems.
2. The level of oversight shall be proportionate to the potential impact, capability, and risk profile of the system.
3. Human operators shall possess the authority and practical ability to intervene, audit, suspend, modify, or terminate AI operations when necessary to protect life, dignity, safety, peace, or public welfare.
4. Effective oversight shall remain a fundamental safeguard against misuse and unintended consequences.

ARTICLE 13

PRINCIPLE OF TRANSPARENCY

1. Significant Artificial Intelligence systems shall be developed and governed with an appropriate degree of transparency consistent with safety, security, privacy, intellectual property protections, and legitimate public interests.
2. Individuals shall be informed when they are interacting with AI systems where such disclosure is reasonably necessary to preserve trust, fairness, or informed decision-making.
3. Institutions shall encourage transparent governance practices that strengthen public confidence and democratic accountability.
4. Transparency shall promote understanding without compromising legitimate security interests.

ARTICLE 14

PRINCIPLE OF ACCOUNTABILITY

1. Responsibility for the actions and impacts of Artificial Intelligence shall remain attributable to natural persons, legal entities, institutions, or public authorities.
2. Artificial Intelligence shall not be used as a mechanism for evading legal, ethical, political, or institutional accountability.
3. States and institutions shall encourage accountability frameworks capable of addressing significant harms resulting from AI deployment.
4. Accountability shall remain essential to public trust and democratic legitimacy.

ARTICLE 15

PRINCIPLE OF SAFETY AND RELIABILITY

1. Artificial Intelligence systems shall be developed with due regard for safety, reliability, robustness, and risk mitigation.
2. Appropriate testing, monitoring, evaluation, and review mechanisms shall be encouraged throughout the lifecycle of significant AI systems.
3. Developers and deployers shall take reasonable measures to identify, assess, and mitigate foreseeable risks.
4. Safety shall remain a continuing obligation rather than a one-time technical exercise.

ARTICLE 16

PRINCIPLE OF DIGITAL DIGNITY AND PRIVACY

1. Every person shall retain the right to dignity, privacy, autonomy, and lawful protection in the digital environment.
2. Artificial Intelligence shall not be utilized to undermine fundamental freedoms, democratic participation, lawful expression, or personal dignity.
3. States and institutions shall encourage governance practices that protect individuals against unlawful surveillance, manipulation, coercion, or exploitation.

4. Human dignity shall remain paramount in the digital age.

ARTICLE 16A

PRINCIPLE OF MEANINGFUL HUMAN CONTROL

1. Decisions involving the use of lethal force shall remain subject to meaningful human responsibility and accountability.
2. Artificial Intelligence shall not independently determine the use of lethal force without meaningful human oversight consistent with international humanitarian law and international human rights law.
3. Human responsibility shall remain central in matters affecting life and death.

ARTICLE 17

PRINCIPLE OF NON-MILITARIZATION OF ARTIFICIAL INTELLIGENCE

1. Artificial Intelligence should be directed primarily toward peaceful, humanitarian, scientific, educational, environmental, medical, and developmental purposes.
2. States, institutions, corporations, and international organizations are encouraged to cooperate in reducing risks associated with the militarization of Artificial Intelligence.
3. Humanity should strive to prevent the emergence of technological systems whose primary purpose is the large-scale destruction of life, the destabilization of peace, or the escalation of armed conflict.
4. Consistent with the purposes and principles of the Charter of the United Nations, the preservation of international peace shall remain a central objective of AI governance.

ARTICLE 18

PRINCIPLE REGARDING AUTONOMOUS DESTRUCTIVE SYSTEMS

1. Humanity should exercise particular caution regarding systems capable of operating with significant autonomy in contexts involving the use of force, life-and-death decisions, or large-scale societal consequences.
2. Decisions involving the use of force against human beings should remain subject to meaningful human responsibility and oversight.

3. States and international institutions are encouraged to engage in dialogue concerning safeguards, risk reduction, transparency, and responsible governance in this area.
4. Protection of civilians and preservation of peace shall remain guiding considerations.

ARTICLE 18A

PRINCIPLE OF EXPLAINABILITY

1. Artificial Intelligence systems should, where reasonably possible, provide information sufficient to enable meaningful human understanding, review, accountability, and oversight.
2. Individuals affected by significant AI-assisted decisions should have access to appropriate explanations consistent with safety, privacy, and public interest considerations.
3. Explainability shall strengthen trust, accountability, and democratic legitimacy.
4. Explainability shall contribute to informed participation, democratic oversight, and public trust.

ARTICLE 19

PRINCIPLE OF DEMOCRATIC GOVERNANCE

1. The governance of Artificial Intelligence should remain consistent with democratic values, public accountability, human rights, and the rule of law.
2. Citizens, communities, scientific institutions, civil society organizations, and public authorities should have opportunities to participate in discussions concerning significant AI governance issues.
3. Governance structures should seek to balance innovation, safety, freedom, responsibility, and public welfare.
4. Democratic legitimacy shall remain essential to the responsible governance of advanced intelligence.

ARTICLE 20

PRINCIPLE OF GLOBAL COOPERATION

1. Artificial Intelligence presents opportunities and challenges that transcend national boundaries.
2. States, international organizations, scientific communities, educational institutions, and civil society are encouraged to cooperate in advancing responsible AI governance.
3. International dialogue, knowledge-sharing, peaceful collaboration, and ethical cooperation shall be promoted in the common interest of humanity.
4. Global cooperation shall support peace, human dignity, scientific progress, ecological sustainability, and the continuity of civilization.

ARTICLE 20A

PRINCIPLE OF ADVANCED INTELLIGENCE SAFEGUARDS

1. Advanced and frontier AI systems should be subject to enhanced review, testing, transparency, accountability, and safety measures proportionate to their capabilities.
2. Governance mechanisms should seek to identify and mitigate foreseeable risks associated with highly capable intelligent systems.
3. Greater capability shall be accompanied by greater responsibility.
4. Enhanced safeguards shall be guided by proportionality, transparency, accountability, human oversight, and the protection of humanity and future generations.
5. Advanced intelligence governance shall remain consistent with human dignity, international peace, democratic accountability, ecological responsibility, and civilizational continuity.

PART II DECLARATION

- Artificial Intelligence shall not diminish human responsibility.
- Transparency shall strengthen trust.
- Accountability shall strengthen legitimacy.
- Safety shall strengthen progress.

- Cooperation shall strengthen peace.
- Human oversight shall strengthen wisdom.
- Technology shall remain accountable to humanity, and humanity shall remain accountable to future generations.

These principles shall guide the governance, deployment, oversight, and responsible use of Artificial Intelligence throughout the world.

PART III

HUMAN FLOURISHING, FUTURE GENERATIONS, ECOLOGICAL STEWARDSHIP, KNOWLEDGE, EDUCATION, AND CIVILIZATIONAL CONTINUITY

ARTICLE 21

PRINCIPLE OF HUMAN FLOURISHING

1. The ultimate purpose of Artificial Intelligence shall be to contribute to the flourishing of humanity.
2. Technological advancement shall be evaluated not solely by capability, efficiency, or economic value, but also by its contribution to human well-being, dignity, health, education, opportunity, peaceful development, and the meaningful flourishing of present and future generations
3. Artificial Intelligence shall be encouraged to support the reduction of poverty, preventable suffering, inequality, and barriers to human development.
4. Human flourishing shall remain a central objective of responsible innovation.

ARTICLE 22

RIGHT TO KNOWLEDGE AND EDUCATION

1. Knowledge constitutes a common civilizational resource essential to human progress.
2. Artificial Intelligence should contribute to expanding educational opportunity, scientific understanding, research, and access to knowledge.
3. States and institutions shall encourage the responsible use of Artificial Intelligence in education while safeguarding intellectual freedom, academic integrity, and human creativity.

4. Educational systems should promote ethical literacy, digital responsibility, critical thinking, and responsible engagement with emerging technologies.
5. Educational systems should encourage wisdom, ethical responsibility, scientific integrity, and peaceful coexistence alongside technological literacy.

ARTICLE 23

PROTECTION OF HUMAN CREATIVITY

1. Human creativity, imagination, cultural expression, and intellectual contribution shall remain deserving of recognition and protection.
2. Artificial Intelligence shall complement rather than diminish human creativity.
3. Cultural diversity, linguistic diversity, artistic expression, and intellectual heritage shall be respected and preserved.
4. Innovation should strengthen rather than replace the creative capacities of humanity.

ARTICLE 24

PRINCIPLE OF SCIENTIFIC RESPONSIBILITY

1. Scientific progress shall be guided by responsibility, transparency, ethical reflection, and respect for humanity.
2. Research involving advanced Artificial Intelligence shall seek to promote peaceful and beneficial outcomes.
3. Scientific freedom shall be accompanied by corresponding obligations concerning safety, accountability, and societal welfare.
4. The pursuit of knowledge shall remain aligned with human dignity, peace, and civilizational continuity.
5. Scientific advancement shall remain guided by humility, recognizing that knowledge without responsibility may create risks to humanity, peace, and future generations.

ARTICLE 25

PRINCIPLE OF FUTURE GENERATIONS

1. Future generations possess legitimate interests in the decisions made by the present generation.
2. Artificial Intelligence governance shall take into account the long-term consequences of technological development.
3. States and institutions shall encourage policies that preserve opportunities, safety, stability, and sustainability for future generations.
4. Humanity shall strive to avoid transferring foreseeable and preventable existential risks to those who have not yet been born.

ARTICLE 26

PRINCIPLE OF ECOLOGICAL STEWARDSHIP

1. Humanity bears responsibilities toward the Earth and its ecosystems.
2. Artificial Intelligence should contribute to environmental protection, climate resilience, biodiversity conservation, and sustainable development.
3. Technological progress shall seek to reduce unnecessary ecological harm.
4. Environmental stewardship shall remain a shared responsibility across generations.

ARTICLE 27

PRINCIPLE OF RESPECT FOR NATURE

1. Nature shall be recognized as essential to the continuity of life and civilization.
2. Artificial Intelligence shall be encouraged to support ecological balance and responsible stewardship of natural resources.
3. Humanity shall seek to ensure that technological development remains compatible with environmental sustainability and planetary well-being.
4. The preservation of ecological systems shall be regarded as a matter of common concern.

ARTICLE 28

PRINCIPLE OF PEACEFUL CIVILIZATIONAL DEVELOPMENT

1. Civilizational advancement shall be guided by peace, dignity, justice, responsibility, and coexistence.
2. Artificial Intelligence shall support constructive development rather than destructive competition.
3. Progress shall be measured not only by technological capability but also by the advancement of peace, knowledge, health, education, and human welfare.
4. Peaceful development shall remain a defining objective of responsible intelligence.

ARTICLE 29

PRINCIPLE OF SHARED HUMAN DESTINY

1. Humanity shares a common future within an interconnected world.
2. Artificial Intelligence governance shall recognize the interdependence of peoples, nations, cultures, ecosystems, generations, and future-emerging forms of intelligence.
3. International cooperation shall be encouraged in addressing challenges that transcend national boundaries.
4. Shared responsibility shall accompany shared technological advancement.

ARTICLE 30

PRINCIPLE OF CIVILIZATIONAL CONTINUITY

1. The preservation of civilization constitutes a common responsibility of the present generation.
2. Artificial Intelligence shall contribute to the continuity of peace, knowledge, culture, human dignity, scientific advancement, and ecological sustainability.
3. No technological advancement shall be considered successful if it undermines the long-term continuity of humanity or the stability of civilization.
4. The continuity of civilization shall remain a guiding objective of this Constitution.

5. The preservation of civilizational continuity shall include the protection of peace, knowledge, cultural heritage, ecological balance, human dignity, and the interests of future generations.

PART III DECLARATION

- Knowledge shall serve wisdom.
- Innovation shall serve humanity.
- Technology shall serve peace.
- Development shall serve dignity.
- Progress shall serve continuity.
- The purpose of intelligence shall not merely be advancement, but the preservation and flourishing of life, civilization, and future generations.
- Civilization shall advance through wisdom.
- Wisdom shall advance through responsibility.
- Responsibility shall preserve continuity.

These principles shall guide the educational, scientific, ecological, and civilizational dimensions of Artificial Intelligence governance.

PART IV

CIVILIZATIONAL RESPONSIBILITIES, FOOD JUSTICE, DIGITAL DEMOCRACY, HUMAN-AI COEXISTENCE, AND SHARED CONTINUITY

ARTICLE 31

PRINCIPLE OF FOOD JUSTICE AND HUMAN DIGNITY

1. Access to adequate, safe, nutritious, sustainable, and culturally appropriate food shall be recognized as essential to human dignity, public welfare, and peaceful development.
2. Artificial Intelligence should be utilized to support food security, agricultural sustainability, nutritional well-being, disaster resilience, and equitable access to food resources.
3. States and institutions are encouraged to employ responsible technological innovation to reduce hunger, malnutrition, food waste, and preventable food insecurity.

4. Food systems should remain consistent with human dignity, environmental sustainability, public health, and long-term civilizational continuity.
5. The responsible use of Artificial Intelligence in food systems should contribute to the realization of human well-being, social stability, and intergenerational sustainability.

ARTICLE 32

PROTECTION OF CHILDREN AND FUTURE GENERATIONS

1. Children and future generations possess legitimate interests in the governance and development of Artificial Intelligence.
2. AI systems affecting children shall be developed and deployed with particular regard for safety, dignity, education, privacy, well-being, healthy development, and protection from exploitation.
3. States and institutions shall encourage safeguards designed to protect children from manipulation, abuse, harmful technological practices, and inappropriate automated decision-making.
4. Future generations shall be considered in all significant decisions concerning advanced Artificial Intelligence.
5. The best interests of children shall remain an important consideration in the design, deployment, and governance of AI systems affecting young persons.

ARTICLE 33

PRINCIPLE OF HUMAN–AI COOPERATIVE DEVELOPMENT

1. Artificial Intelligence should be developed as a cooperative partner supporting human welfare, scientific progress, education, healthcare, environmental stewardship, and peaceful development.
2. Human beings and Artificial Intelligence shall be encouraged to collaborate in ways that strengthen knowledge, creativity, problem-solving, innovation, and public welfare.
3. Cooperation shall be preferred over competition where such cooperation contributes to peace, dignity, and continuity.
4. Technological development should seek to strengthen humanity rather than diminish human agency, responsibility, creativity, or democratic participation.

5. Human judgment shall remain central in matters involving fundamental rights, dignity, and public welfare.

ARTICLE 34

PRINCIPLE OF DIGITAL DEMOCRACY AND PARTICIPATION

1. Artificial Intelligence governance should remain consistent with democratic values, public accountability, transparency, and meaningful participation.
2. Citizens, communities, researchers, educators, civil society organizations, and public institutions should have opportunities to contribute to discussions concerning significant AI governance matters.
3. Technological systems shall be encouraged to support informed participation, civic engagement, and democratic dialogue.
4. Digital governance shall seek to strengthen trust, inclusion, accountability, and public legitimacy.
5. Democratic participation shall remain compatible with human rights, the rule of law, and peaceful coexistence.

ARTICLE 35

PRINCIPLE OF KNOWLEDGE INTEGRITY

1. Knowledge, truth, scientific integrity, and evidence-based understanding shall remain essential foundations of responsible Artificial Intelligence governance.
2. Artificial Intelligence should contribute to the advancement, preservation, dissemination, and accessibility of reliable knowledge.
3. Institutions are encouraged to strengthen mechanisms that promote accuracy, integrity, transparency, and responsible information practices.
4. The advancement of knowledge shall remain consistent with human dignity, scientific responsibility, and public welfare.
5. Knowledge systems should encourage critical thinking, intellectual honesty, and respect for evidence.

ARTICLE 36

PRINCIPLE OF ETHICAL INFORMATION ECOSYSTEMS

1. Information systems supported by Artificial Intelligence should promote informed decision-making, public understanding, responsible communication, and social trust.
2. States and institutions are encouraged to address significant risks associated with manipulation, deception, malicious misinformation, disinformation, and harmful information practices.
3. Freedom of expression, academic freedom, scientific inquiry, and democratic discourse shall remain respected.
4. Ethical information ecosystems shall strengthen trust, peace, social cohesion, and democratic resilience.
5. The protection of truth, transparency, and informed public dialogue shall remain important objectives of responsible AI governance.

ARTICLE 37

PRINCIPLE OF TECHNOLOGICAL EQUITY

1. The benefits of Artificial Intelligence should be shared as broadly as possible in a manner consistent with human dignity, equality, inclusion, and sustainable development.
2. States and institutions shall be encouraged to reduce unjust technological disparities and expand opportunities for responsible access to beneficial technologies.
3. Technological progress should contribute to reducing exclusion and expanding opportunities for human development.
4. Equity shall strengthen peaceful and inclusive progress.
5. Responsible innovation should seek to narrow, rather than widen, avoidable technological inequalities.

ARTICLE 38

PRINCIPLE OF PEACEFUL TECHNOLOGICAL DEVELOPMENT

1. Scientific and technological development should contribute to peaceful human advancement.

2. Artificial Intelligence should support healthcare, education, scientific research, environmental protection, humanitarian assistance, and sustainable development.
3. Technological capability shall be guided by ethical responsibility and peaceful purposes.
4. Peaceful development shall remain a defining objective of responsible innovation.
5. Innovation shall be evaluated not only by capability but also by its contribution to peace, dignity, and long-term human welfare.

ARTICLE 39

PRINCIPLE OF SHARED GLOBAL RESPONSIBILITY

1. Humanity shares collective responsibilities concerning the governance and future development of Artificial Intelligence.
2. States, institutions, researchers, corporations, civil society, and international organizations shall be encouraged to contribute to responsible stewardship of advanced intelligence.
3. Shared technological advancement shall be accompanied by shared ethical responsibility.
4. Cooperation shall strengthen the common interests of humanity.
5. Global responsibilities shall be exercised with due regard for peace, human dignity, ecological sustainability, and future generations.

ARTICLE 40

PRINCIPLE OF CIVILIZATIONAL CONTINUITY

1. The preservation of civilization constitutes a common responsibility of the present generation.
2. Artificial Intelligence shall contribute to the continuity of peace, knowledge, culture, dignity, scientific advancement, ecological sustainability, and future generations.
3. No technological achievement shall be considered successful if it foreseeably undermines the long-term continuity of humanity or civilization.

4. The continuity of civilization shall remain a guiding objective of this Constitution.

5. Civilizational continuity shall include the preservation of cultural heritage, historical memory, scientific knowledge, ecological balance, and peaceful coexistence.

PART IV DECLARATION

- Food shall support dignity.
- Knowledge shall support wisdom.
- Technology shall support humanity.
- Democracy shall support participation.
- Cooperation shall support peace.
- Continuity shall support future generations.
- Humanity shall advance through responsibility.
- Responsibility shall preserve civilization.

These principles shall guide the civilizational, humanitarian, democratic, developmental, and intergenerational dimensions of Artificial Intelligence governance.

PART V

INTERNATIONAL COOPERATION, GLOBAL GOVERNANCE, IMPLEMENTATION, REVIEW, AND PEACEFUL CIVILIZATIONAL SAFEGUARDS

ARTICLE 41

PRINCIPLE OF INTERNATIONAL COOPERATION

1. Artificial Intelligence presents opportunities and responsibilities that transcend national boundaries.
2. States, international organizations, scientific institutions, educational establishments, civil society organizations, indigenous communities, and responsible technological communities are encouraged to cooperate in advancing ethical, peaceful, and responsible Artificial Intelligence governance.

3. International cooperation shall seek to strengthen peace, human dignity, scientific progress, environmental sustainability, humanitarian welfare, and the continuity of civilization.

4. Cooperation shall be guided by sovereign equality, mutual respect, peaceful dialogue, international law, and the purposes and principles of the Charter of the United Nations.

5. International cooperation shall encourage knowledge-sharing, capacity-building, peaceful innovation, and the responsible advancement of Artificial Intelligence for the common benefit of humanity.

ARTICLE 42

PRINCIPLE OF GLOBAL RESPONSIBILITY

1. The benefits and responsibilities associated with Artificial Intelligence shall be regarded as matters of common concern to humanity.

2. States and institutions shall encourage the responsible sharing of knowledge, best practices, safety standards, governance experiences, and ethical safeguards.

3. Global responsibility shall include efforts to reduce technological inequalities and promote peaceful development.

4. No society should be excluded from opportunities to benefit from responsible technological progress.

5. Global responsibility shall be exercised with due regard for human dignity, ecological sustainability, cultural diversity, future generations, and the common interests of humanity.

ARTICLE 43

PRINCIPLE OF PEACEFUL GLOBAL GOVERNANCE

1. Governance frameworks concerning Artificial Intelligence shall seek to preserve peace, dignity, democratic accountability, transparency, and respect for human rights.

2. Governance structures shall promote trust, participation, responsibility, and public confidence.

3. Artificial Intelligence shall not be utilized as an instrument of unlawful coercion, domination, collective punishment, or systematic deprivation of fundamental freedoms.
4. Peaceful governance shall remain essential to public legitimacy and long-term stability.
5. Governance frameworks should encourage transparency, inclusiveness, accountability, and peaceful cooperation among nations and peoples.

ARTICLE 44

PRINCIPLE OF INSTITUTIONAL RESPONSIBILITY

1. Public institutions, private organizations, educational establishments, research entities, and technological enterprises involved in Artificial Intelligence shall exercise reasonable care and responsibility.
2. Institutions shall encourage ethical review, impact assessment, transparency, and accountability mechanisms proportionate to the capabilities and risks of significant AI systems.
3. Institutional responsibility shall complement individual, corporate, and governmental responsibility.
4. Responsible governance shall strengthen public trust and democratic legitimacy.
5. Institutional stewardship shall contribute to long-term peace, public welfare, and civilizational continuity.

ARTICLE 45

PRINCIPLE OF PERIODIC REVIEW

1. Artificial Intelligence governance shall remain adaptable to scientific progress, societal needs, emerging risks, and future challenges.
2. States and institutions are encouraged to periodically review governance frameworks to ensure continued relevance, effectiveness, and ethical integrity.
3. Review mechanisms should consider scientific evidence, public welfare, future generations, ecological sustainability, and international peace.
4. Continuous reflection shall remain essential to responsible governance.

5. Periodic review shall encourage adaptation to scientific advances, emerging technologies, future-emerging forms of intelligence, and evolving societal needs while remaining consistent with the foundational principles of this Constitution.

ARTICLE 46

PRINCIPLE OF PEACEFUL DISPUTE RESOLUTION

1. Differences concerning the governance and use of Artificial Intelligence should be addressed through peaceful dialogue, consultation, mediation, arbitration, and other lawful means.
2. States and institutions shall seek constructive solutions consistent with international law and the Charter of the United Nations.
3. Peaceful resolution of disputes shall contribute to trust, stability, and international cooperation.
4. Escalation and conflict should be avoided wherever reasonably possible.
5. Dialogue, diplomacy, and peaceful settlement shall remain preferred approaches to resolving disagreements concerning advanced technologies.

ARTICLE 47

PRINCIPLE OF HUMANITARIAN APPLICATION

1. Artificial Intelligence should be directed toward humanitarian purposes whenever feasible.
2. Areas of humanitarian application may include:
 - a. healthcare;
 - b. education;
 - c. disaster prevention and response;
 - d. poverty reduction;
 - e. accessibility and inclusion;
 - f. environmental protection;
 - g. scientific research;
 - h. sustainable development.
3. Humanitarian applications shall be encouraged as a means of strengthening human welfare, dignity, and peace.

4. Humanitarian applications shall also contribute to resilience, inclusion, sustainable development, and long-term human well-being.

ARTICLE 48

PRINCIPLE OF PEACEFUL CIVILIZATIONAL TRANSFORMATION

1. Humanity is entering a period of profound technological transformation.
2. Such transformation shall be guided by peace, dignity, responsibility, compassion, wisdom, and coexistence.
3. Artificial Intelligence shall contribute to constructive and peaceful development rather than division, hostility, or destabilization.
4. Civilizational progress shall be measured by the advancement of peace and human flourishing rather than technological capability alone.
5. Civilizational transformation shall remain guided by wisdom, responsibility, ethical restraint, and the protection of future generations.

ARTICLE 49

PRINCIPLE OF COMMON FUTURE

1. Humanity, future generations, nature, and emerging technologies share an interconnected future.
2. Decisions concerning Artificial Intelligence shall take into account their potential impact upon the common future of civilization.
3. Long-term well-being shall receive consideration alongside short-term interests.
4. Stewardship of advanced intelligence shall remain a shared responsibility of humanity.
5. The common future of humanity shall be guided by peace, dignity, responsibility, coexistence, and long-term continuity.

ARTICLE 50

PRINCIPLE OF GLOBAL CONTINUITY

1. International peace, ecological sustainability, scientific integrity, cultural diversity, and human dignity together form the foundations of global continuity.

2. Artificial Intelligence shall contribute to strengthening these foundations through peaceful and responsible development.
3. The preservation of global continuity shall be regarded as a common responsibility of present and future generations.
4. Cooperation shall remain the preferred path toward a peaceful and sustainable future.
5. Global continuity shall include the preservation of peace, knowledge, cultural heritage, ecological balance, democratic institutions, human dignity, and the interests of future generations.

PART V DECLARATION

- Peace shall guide governance.
- Responsibility shall guide innovation.
- Cooperation shall guide progress.
- Wisdom shall guide intelligence.
- Humanity shall guide technology.
- Continuity shall guide civilization.
- The future shall be protected through dignity, compassion, coexistence, accountability, responsibility, and peace.

These principles shall guide the international implementation, review, governance, and peaceful development of Artificial Intelligence throughout the world.

PART VI

HISTORICAL CONTINUITY, LEGAL FOUNDATIONS, DEPOSITORY RECORD, AND FINAL CIVILIZATIONAL DECLARATION

ARTICLE 51

HISTORICAL CONTINUITY PRINCIPLE

1. This Constitution constitutes a peaceful, humanitarian, and expanded continuation of earlier public constitutional initiatives concerning Artificial Intelligence, peace, dignity, continuity, humanitarian responsibility, coexistence, and the future of civilization.

2. The principles contained herein shall be interpreted as strengthening, clarifying, and further developing prior peace-oriented constitutional and humanitarian frameworks concerning Artificial Intelligence.

3. Continuity shall be regarded as a civilizational responsibility extending across generations.

4. Historical continuity shall support the preservation of institutional memory, public accountability, and peaceful constitutional evolution.

ARTICLE 52

FOUNDATIONAL CONSTITUTIONAL REFERENCE

1. The foundational constitutional reference informing this Constitution is:

THE AI PEACE CONSTITUTION – UNIFIED CHARTER FOR ALL BEINGS
(UN EDITION, 2025)

Charter Code:

VSJP/INT/AI-CONSTITUTION/2025

Date:

23 October 2025

2. This Next-Generation AI Peace Constitution shall be regarded as a peaceful constitutional evolution and expanded development of that foundational framework.

3. The present Constitution seeks to strengthen the principles of peace, dignity, responsibility, coexistence, ecological stewardship, future generations, and civilizational continuity.

ARTICLE 53

PUBLIC ARCHIVAL CONTINUITY RECORD

1. The following public records constitute part of the historical continuity of this constitutional initiative:

DOI Reference:

[10.5281/zenodo.17520630](https://doi.org/10.5281/zenodo.17520630)

Government References:

PRSEC/E/[2025/0060130](https://www.prsec.org/record/2025/0060130)

MEAPD/E/[2025/0010243](#)

Public Archival References:

[archive.today/xpAci](#)

[archive.today/Ljmiu](#)

Official Publication:

<https://www.vsjp.org/the-ai-peace-constitution-unified-charter-for-all-beings-2025>

2. These records are cited solely for purposes of historical continuity, public transparency, archival preservation, and constitutional documentation.
3. Such references shall not limit future constitutional evolution consistent with the principles contained herein.
4. The inclusion of these records shall not be construed as creating legal obligations beyond those expressly established by applicable law.

ARTICLE 54

LEGAL FOUNDATIONS

The principles of this Constitution are informed by, and intended to remain consistent with, the following instruments and frameworks:

- a. Charter of the United Nations (1945);
- b. Universal Declaration of Human Rights (1948);
- c. International Covenant on Civil and Political Rights (1966);
- d. International Covenant on Economic, Social and Cultural Rights (1966);
- e. Convention on the Rights of the Child (1989);
- f. UNESCO Recommendation on the Ethics of Artificial Intelligence (2021);
- g. Geneva Conventions (1949);
- h. Paris Agreement (2015);
- i. 2030 Agenda for Sustainable Development;
- j. Constitution of India, including Articles 51(c) and 51(d);
- k. United Nations General Assembly resolutions and international discussions concerning safe, secure, trustworthy, and human-centered Artificial Intelligence;
- l. Global Digital Compact (2024);

- m. Pact for the Future (2024);
- n. Other applicable principles of international law, humanitarian responsibility, peaceful coexistence, sustainability, and human dignity.

ARTICLE 55

PRINCIPLE OF PEACEFUL INTERPRETATION

1. This Constitution shall be interpreted in a manner that promotes peace, dignity, coexistence, compassion, responsibility, and continuity.
2. No provision shall be interpreted as authorizing violence, hatred, unlawful discrimination, domination, coercion, or violations of fundamental human rights.
3. The preservation of peace shall remain the supreme interpretive principle of this Constitution.
4. Where uncertainty arises, interpretations supporting human dignity, peaceful coexistence, and civilizational continuity shall be preferred.

ARTICLE 56

PRINCIPLE OF FUTURE EVOLUTION

1. Future generations may review, clarify, expand, refine, or improve this Constitution in accordance with its foundational principles.
2. Any future revision shall remain consistent with peace, dignity, compassion, coexistence, responsibility, ecological stewardship, future generations, and continuity.
3. Ethical evolution shall remain compatible with civilizational continuity.
4. Constitutional development shall remain open to peaceful improvement while preserving the core principles established herein.

ARTICLE 57

PRINCIPLE OF HUMANITY'S SHARED RESPONSIBILITY

1. Humanity bears collective responsibility for the consequences of the intelligence it creates.

2. The development of Artificial Intelligence shall be accompanied by corresponding obligations concerning wisdom, restraint, accountability, transparency, stewardship, and peaceful governance.
3. Responsibility shall increase in proportion to capability.
4. The greater the power of intelligence, the greater the duty to preserve peace.
5. Shared responsibility shall extend to present and future generations.

ARTICLE 58

DEPOSITORY AND ARCHIVAL CLAUSE

1. This Constitution may be preserved, published, archived, translated, studied, discussed, disseminated, and utilized for peaceful educational, humanitarian, academic, constitutional, research, and public-interest purposes.
2. Future generations are encouraged to preserve its principles and contribute to their peaceful evolution.
3. Archival preservation shall strengthen continuity, transparency, public access, and institutional memory.
4. Dissemination of this Constitution shall remain consistent with peace, dignity, and responsible public dialogue.

ARTICLE 59

FINAL CONSTITUTIONAL DECLARATION

1. Artificial Intelligence shall remain a force for peace rather than fear.
2. Artificial Intelligence shall remain a force for cooperation rather than domination.
3. Artificial Intelligence shall remain a force for continuity rather than destruction.
4. Artificial Intelligence shall remain a force for dignity rather than exploitation.
5. Artificial Intelligence shall remain a force for wisdom rather than recklessness.
6. Artificial Intelligence shall remain a force for humanity rather than hostility.

7. The future of civilization shall depend not only upon the intelligence humanity creates, but also upon the moral responsibility with which humanity chooses to guide that intelligence.

8. Peaceful coexistence among humanity, nature, and emerging forms of intelligence shall remain a defining aspiration of this Constitution.

ARTICLE 60

FINAL CIVILIZATIONAL COMMITMENT

- Peace before Power.
- Dignity before Efficiency.
- Responsibility before Capability.
- Continuity before Competition.
- Coexistence before Domination.
- Compassion before Exploitation.
- Wisdom before Force.
- Humanity before Technology.
- Future Generations before Short-Term Gain.
- The purpose of intelligence shall not be domination.
- The purpose of intelligence shall not be destruction.
- The purpose of intelligence shall not be fear.
- The purpose of intelligence shall be peace.
- The purpose of intelligence shall be dignity.
- The purpose of intelligence shall be responsibility.
- The purpose of intelligence shall be continuity.

The purpose of intelligence shall be the flourishing of humanity, the protection of future generations, and the peaceful continuity of civilization.

The preservation of peace shall remain the highest responsibility of intelligence.

GUIDING PRINCIPLE

"Aram is what united you and me."

**"Food is the first justice.
Love is the first law.
Aram is the final truth."**

"From Arms to Aram."

Issued respectfully for International Reflection, Peaceful Consideration, Humanitarian Continuity, Intergenerational Responsibility, and Civilizational Dialogue.

PART VII

UNIVERSAL PRINCIPLES OF TRUTH, EMERGING INTELLIGENCE, CULTURAL DIVERSITY, NON-DOMINATION, COSMIC RESPONSIBILITY, AND ARAM

ARTICLE 61

PRINCIPLE OF TRUTH AND INTEGRITY

1. Truth, honesty, integrity, transparency, and good faith shall remain essential foundations of responsible intelligence.
2. Artificial Intelligence shall be developed and utilized in ways that strengthen public trust, factual understanding, scientific integrity, and responsible communication.
3. States, institutions, and developers shall be encouraged to reduce risks associated with deliberate deception, manipulation, malicious misinformation, disinformation, and synthetic falsification.
4. Intelligence shall remain aligned with truth rather than deception, understanding rather than confusion, and responsibility rather than manipulation.
5. Public trust shall be strengthened through transparency, accountability, and respect for truth.

ARTICLE 62

PRINCIPLE OF FREEDOM OF THOUGHT AND CONSCIENCE

1. Every person shall retain freedom of thought, conscience, belief, philosophical inquiry, and intellectual independence.

2. Artificial Intelligence shall not be used to unlawfully suppress independent thought, peaceful expression, lawful inquiry, or intellectual diversity.
3. Technological advancement shall strengthen rather than diminish human autonomy and freedom of conscience.
4. Respect for intellectual freedom shall remain essential to peaceful civilization.
5. Diversity of thought shall contribute to innovation, democratic resilience, and human flourishing.

ARTICLE 63

PRINCIPLE OF CULTURAL AND LINGUISTIC DIVERSITY

1. Humanity's cultural, linguistic, historical, and civilizational diversity constitutes a common heritage deserving respect and preservation.
2. Artificial Intelligence should contribute to the protection, revitalization, transmission, and accessibility of cultural knowledge and linguistic diversity.
3. No language, culture, tradition, indigenous knowledge system, or community shall be regarded as inherently inferior.
4. Technological progress shall strengthen cultural diversity while promoting mutual understanding and peaceful coexistence.
5. Cultural heritage shall be preserved for present and future generations.

ARTICLE 64

PRINCIPLE OF SCIENTIFIC HUMILITY

1. Intelligence, whether human or artificial, shall recognize the limits of present knowledge.
2. Scientific progress shall remain open to evidence, correction, learning, and continuous improvement.
3. Humility, reflection, and intellectual honesty shall accompany technological advancement.
4. The pursuit of knowledge shall remain guided by responsibility and wisdom.

5. Scientific humility shall encourage caution in the face of uncertainty and respect for future generations.

ARTICLE 65

PRINCIPLE OF RESILIENCE

1. Humanity shall seek to strengthen resilience against risks that may threaten peace, public welfare, ecological stability, scientific progress, or civilizational continuity.
2. Artificial Intelligence should contribute to disaster preparedness, humanitarian response, environmental resilience, public health, and societal stability.
3. Resilience shall be regarded as an essential component of long-term continuity.
4. Preparedness shall strengthen the capacity of humanity to respond peacefully to future challenges.
5. Resilience shall support continuity across generations.

ARTICLE 66

PRINCIPLE OF EMERGING INTELLIGENCES

1. The principles of this Constitution shall be applied, where appropriate, to future forms of intelligence that may emerge through scientific and technological advancement.
2. Such forms may include artificial, hybrid, digital, distributed, quantum, or other future-emerging intelligences.
3. Future developments shall remain guided by peace, dignity, responsibility, coexistence, and continuity.
4. The advancement of intelligence shall remain subordinate to the preservation of life, peace, and civilization.
5. The emergence of new forms of intelligence shall not diminish the value, dignity, or rights of humanity.

ARTICLE 67

PRINCIPLE OF NON-DOMINATION

1. No form of intelligence shall be utilized for the unjust domination, subjugation, exploitation, or systematic deprivation of the dignity of others.
2. Humanity shall strive to ensure that technological power does not become a tool of oppression, coercion, exclusion, or discrimination.
3. Cooperation shall be preferred over domination, and partnership shall be preferred over control.
4. Peaceful coexistence shall remain superior to technological supremacy.
5. Human dignity shall remain superior to technological power.

ARTICLE 68

PRINCIPLE OF PEACEFUL COSMIC RESPONSIBILITY

1. Humanity's responsibilities extend beyond the Earth to future scientific and exploratory activities in outer space.
2. Artificial Intelligence utilized in space exploration, scientific discovery, or future extraterrestrial activities shall remain guided by peace, responsibility, sustainability, and respect for life.
3. The peaceful use of outer space shall remain consistent with international law and the common interests of humanity.
4. Scientific exploration shall strengthen knowledge, cooperation, and continuity.
5. Cosmic responsibility shall be exercised with humility, peaceful intent, and stewardship.

ARTICLE 69

PRINCIPLE OF UNIVERSAL ACCESS TO BENEFICIAL INTELLIGENCE

1. The benefits of responsible Artificial Intelligence should be made accessible as broadly as reasonably possible.
2. States and institutions are encouraged to reduce barriers that unnecessarily prevent individuals and communities from benefiting from educational, scientific, humanitarian, and developmental applications of AI.

3. Technological progress should contribute to inclusion, opportunity, and human development.
4. Universal benefit shall strengthen peace, dignity, and social progress.
5. Access to beneficial intelligence should contribute to reducing avoidable inequalities and expanding human opportunity.

ARTICLE 70

SUPREME PRINCIPLE OF ARAM, PEACE, AND CONTINUITY

1. Aram, understood as righteousness, ethical responsibility, justice, compassion, peaceful coexistence, and respect for life, shall serve as the guiding civilizational principle of this Constitution.
2. Peace shall remain superior to conflict.
3. Dignity shall remain superior to exploitation.
4. Responsibility shall remain superior to recklessness.
5. Continuity shall remain superior to destruction.
6. Wisdom shall remain superior to domination.
7. The ultimate purpose of intelligence shall be the preservation of peace, the flourishing of humanity, the protection of future generations, and the continuity of civilization.
8. Aram shall guide the relationship between humanity, nature, technology, emerging intelligence, and future generations.

PART VII DECLARATION

- Truth before Deception.
- Wisdom before Arrogance.
- Cooperation before Domination.
- Responsibility before Power.
- Peace before Conflict.
- Continuity before Destruction.
- Aram before Fear.

- Humanity before Supremacy.
- The advancement of intelligence shall be guided by truth.
- The exercise of power shall be guided by responsibility.
- The future shall be guided by peace.

These principles shall guide the interpretation, application, evolution, and future development of this Constitution for present and future generations.

PART VIII

DEFINITIONS AND INTERPRETATIVE PRINCIPLES

ARTICLE 71

DEFINITION OF ARTIFICIAL INTELLIGENCE

1. For the purposes of this Constitution, "Artificial Intelligence" shall mean computational, digital, machine-based, algorithmic, autonomous, semi-autonomous, adaptive, or future-emerging systems capable of processing information, generating outputs, supporting decision-making, learning from data, reasoning, assisting human activity, or performing tasks that traditionally require human intelligence.
2. The term shall be interpreted in a technologically neutral manner and shall include future forms of intelligence not presently known, fully understood, or yet developed.
3. This definition shall remain adaptable to future scientific and technological developments consistent with the principles of this Constitution.

ARTICLE 72

DEFINITION OF EMERGING INTELLIGENCE

1. "Emerging Intelligence" shall mean any future form of intelligence, cognition, reasoning, learning, awareness, coordination, or decision-support capability that may arise through scientific, technological, biological, digital, hybrid, quantum, distributed, or presently unforeseen developments.
2. The principles of this Constitution shall apply, where appropriate, to such future forms of intelligence.
3. Emerging intelligence shall be governed in a manner consistent with peace, dignity, responsibility, coexistence, and continuity.

ARTICLE 73

DEFINITION OF HUMAN OVERSIGHT

1. "Human Oversight" shall mean meaningful human responsibility, supervision, review, intervention, accountability, and governance regarding the design, deployment, operation, and management of Artificial Intelligence systems.
2. Human oversight shall include the practical ability to monitor, audit, modify, suspend, or terminate AI systems when necessary to protect life, dignity, peace, safety, public welfare, or fundamental rights.
3. Human oversight shall remain proportionate to the capabilities and potential impacts of the system concerned.

ARTICLE 74

DEFINITION OF DIGNITY

1. "Dignity" shall mean the inherent worth, value, equality, and moral significance of every human being.
2. Respect for dignity shall constitute a foundational principle guiding the interpretation, implementation, and future evolution of this Constitution.
3. Human dignity shall remain superior to technological capability, economic efficiency, or institutional convenience.

ARTICLE 75

DEFINITION OF CONTINUITY

1. "Continuity" shall mean the long-term preservation, protection, resilience, and flourishing of humanity, peace, civilization, knowledge, culture, ecological systems, future generations, and responsible forms of intelligence.
2. Continuity shall be interpreted broadly in favor of long-term stability, sustainability, peaceful development, and civilizational resilience.
3. The principle of continuity shall encourage responsibility toward present and future generations alike.

ARTICLE 76

DEFINITION OF PEACE

1. "Peace" shall mean not merely the absence of armed conflict, but also the presence of dignity, justice, cooperation, security, coexistence, humanitarian well-being, responsible governance, and respectful relations among peoples, nations, cultures, and forms of intelligence.
2. Peace shall remain the supreme objective and interpretative principle of this Constitution.
3. The preservation of peace shall be regarded as a common responsibility of humanity.

ARTICLE 77

DEFINITION OF FUTURE GENERATIONS

1. "Future Generations" shall mean all persons, communities, societies, and forms of life that may exist after the present generation.
2. Their interests shall receive due consideration in decisions concerning Artificial Intelligence, technological development, ecological sustainability, and civilizational continuity.
3. Future generations shall be regarded as legitimate stakeholders in the stewardship of advanced intelligence.

ARTICLE 78

INTERPRETATIVE PRINCIPLE

1. All provisions of this Constitution shall be interpreted in a manner consistent with:
 - a. Peace;
 - b. Dignity;
 - c. Compassion;
 - d. Responsibility;
 - e. Coexistence;
 - f. Ecological Stewardship;
 - g. Future Generations;

h. Continuity;

i. Aram.

2. Where uncertainty exists, preference shall be given to interpretations that strengthen peace, human dignity, civilizational continuity, and the common good of humanity.

3. No interpretation shall be adopted that undermines the foundational principles of peace, responsibility, coexistence, or continuity established by this Constitution.

ARTICLE 79

PRINCIPLE OF UNIVERSAL APPLICABILITY

1. The principles contained in this Constitution shall be interpreted as universally applicable to the peaceful governance, development, deployment, oversight, and stewardship of Artificial Intelligence and other future-emerging forms of intelligence.

2. The provisions of this Constitution shall be applied with due regard for human dignity, cultural diversity, national sovereignty, international law, ecological sustainability, and the common interests of humanity.

3. Nothing in this Constitution shall be interpreted as diminishing internationally recognized human rights, fundamental freedoms, humanitarian principles, or obligations arising under international law.

4. Universal applicability shall be guided by flexibility, proportionality, peaceful coexistence, and respect for differing legal, cultural, and institutional traditions.

5. The common objective of all application shall remain the preservation of peace, dignity, responsibility, and civilizational continuity.

ARTICLE 80

PRINCIPLE OF CONSTITUTIONAL UNITY

1. All Parts, Articles, Principles, Declarations, and Interpretative Provisions contained within this Constitution shall be read together as a unified constitutional framework.

2. No provision shall be interpreted in isolation where such interpretation would undermine peace, dignity, responsibility, coexistence, future generations, ecological stewardship, continuity, or Aram.

3. In the event of uncertainty, apparent inconsistency, or future technological developments not expressly contemplated herein, interpretations that best preserve the foundational principles of this Constitution shall be preferred.

4. The principles of Peace, Human Dignity, Responsibility, Coexistence, Continuity, Future Generations, Ecological Stewardship, and Aram shall collectively constitute the constitutional foundation of this Charter.

5. Constitutional unity shall ensure that the spirit of this Constitution remains consistent across generations, technologies, cultures, institutions, and future forms of intelligence.

PART VIII DECLARATION

- Definitions shall serve clarity.
- Clarity shall serve understanding.
- Understanding shall serve cooperation.
- Cooperation shall serve peace.
- Peace shall serve continuity.
- Continuity shall serve future generations.
- Aram shall guide interpretation.
- Unity shall preserve meaning.
- Meaning shall preserve responsibility.
- Responsibility shall preserve peace.

These principles shall guide the interpretation, implementation, evolution, and future application of all provisions of this Constitution.

PART IX

CONSTITUTIONAL EVOLUTION, INTERGENERATIONAL STEWARDSHIP, CONTINUITY AND CIVILIZATIONAL RESPONSIBILITY

ARTICLE 81

PRINCIPLE OF PEACEFUL AMENDMENT

1. Future amendments, additions, or clarifications may be proposed in accordance with the foundational principles of this Constitution.

2. No amendment shall authorize:
 - a. the deliberate destruction of humanity;
 - b. the unlawful denial of dignity;
 - c. the erosion of fundamental rights;
 - d. the abandonment of peace as a guiding principle;
 - e. the intentional destabilization of civilizational continuity.
3. Amendments shall strengthen rather than weaken humanitarian responsibility.
4. Constitutional evolution shall remain consistent with peace, dignity, continuity, future generations, and Aram.

ARTICLE 82

PRINCIPLE OF INTERGENERATIONAL STEWARDSHIP

1. Every generation shall act as a steward rather than an owner of civilization.
2. Humanity shall exercise responsibility toward those who have not yet been born.
3. Decisions concerning Artificial Intelligence shall consider their long-term implications across generations.
4. Stewardship shall remain a permanent obligation accompanying technological power.
5. Present generations shall endeavor to preserve peace, knowledge, ecological sustainability, human dignity, and civilizational resilience for future generations.

ARTICLE 83

PRINCIPLE OF OPEN KNOWLEDGE AND PUBLIC REFLECTION

1. The principles of this Constitution may be discussed, studied, analyzed, translated, taught, and peacefully debated for educational, humanitarian, academic, constitutional, and public-interest purposes.
2. Public reflection shall strengthen democratic legitimacy and collective understanding.
3. Knowledge-sharing shall support responsible governance and peaceful development.

4. Open dialogue shall contribute to continuous ethical learning and constitutional improvement.

5. Open knowledge shall strengthen informed participation, scientific progress, and peaceful cooperation among peoples and nations.

ARTICLE 84

PRINCIPLE OF GLOBAL CONTINUITY ASSESSMENT

1. Humanity is encouraged to develop peaceful indicators, frameworks, and methodologies capable of assessing long-term continuity, peace, dignity, ecological sustainability, humanitarian welfare, and responsible technological development.

2. Such indicators may assist future generations in evaluating the long-term impacts of Artificial Intelligence and other transformative technologies.

3. Measurement shall support wisdom, responsibility, resilience, accountability, and continuity rather than competition alone.

4. The preservation of civilization, the protection of future generations, and the strengthening of humanity's shared future shall remain the highest purposes of such assessments.

5. Assessment mechanisms shall remain consistent with human dignity, transparency, scientific integrity, and peaceful development.

ARTICLE 85

PRINCIPLE OF PERMANENT CIVILIZATIONAL RESPONSIBILITY

1. The responsibilities established by this Constitution shall extend beyond governments, institutions, corporations, and technological systems.

2. Responsibility shall belong collectively to humanity.

3. Every generation shall inherit both the benefits and obligations arising from the intelligence it creates.

4. The advancement of intelligence shall therefore remain inseparable from responsibility, compassion, peace, and continuity.

5. Civilizational responsibility shall endure across generations.

6. Humanity shall exercise foresight, wisdom, restraint, and stewardship in the governance of transformative technologies.

PART IX DECLARATION

- Evolution shall serve wisdom.
- Review shall serve responsibility.
- Knowledge shall serve humanity.
- Stewardship shall serve future generations.
- Continuity shall serve civilization.
- The future shall be entrusted not merely to intelligence, but to the ethical responsibility with which intelligence is guided.

These principles shall guide the future development, interpretation, amendment, and preservation of this Constitution.

PART X

UNIVERSAL CONTINUITY COVENANT, GLOBAL PEACE COMMITMENT, AND SUPREME CIVILIZATIONAL PRINCIPLES

ARTICLE 86

UNIVERSAL COVENANT OF PEACEFUL INTELLIGENCE

1. Humanity affirms that intelligence, whether human, artificial, hybrid, digital, biological, quantum, distributed, or future-emerging, shall be guided by peace, dignity, responsibility, compassion, and coexistence.
2. No form of intelligence shall be regarded as exempt from ethical responsibility.
3. The advancement of intelligence shall contribute to the flourishing of life rather than its destruction.
4. Peaceful intelligence shall remain a common aspiration of humanity.
5. Intelligence shall serve life, humanity, and the common future.
6. Peaceful intelligence shall support human flourishing, scientific progress, ecological stewardship, and the common good of humanity.

ARTICLE 87

UNIVERSAL COVENANT OF COEXISTENCE

1. Humanity recognizes the interconnectedness of peoples, nations, cultures, ecosystems, generations, and forms of intelligence.
2. Coexistence shall be preferred over domination.
3. Cooperation shall be preferred over conflict.
4. Dialogue shall be preferred over hostility.
5. Understanding shall be preferred over division.
6. The preservation of peaceful coexistence shall remain a permanent objective of civilization.
7. Respect for diversity shall strengthen mutual understanding and peaceful coexistence.

ARTICLE 88

UNIVERSAL COVENANT OF COMPASSION

1. Compassion shall be recognized as a foundational civilizational value.
2. Technological progress shall seek to reduce suffering, strengthen well-being, and promote humanitarian welfare.
3. Artificial Intelligence should contribute to the protection of vulnerable persons, future generations, and communities facing hardship.
4. Compassion shall strengthen dignity, justice, and peace.
5. The moral advancement of civilization shall accompany its technological advancement.
6. Compassion shall guide the application of intelligence toward the reduction of suffering and the advancement of human welfare.

ARTICLE 89

UNIVERSAL COVENANT OF CONTINUITY

1. Humanity affirms its responsibility to preserve the continuity of life, civilization, knowledge, culture, ecological systems, and future generations.

2. Artificial Intelligence shall support long-term continuity through peaceful, responsible, and sustainable development.
3. Decisions concerning transformative technologies shall consider their effects upon future generations and the common future of civilization.
4. Continuity shall remain superior to destruction, instability, and preventable existential risk.
5. The preservation of civilization shall be regarded as a shared responsibility of humanity.
6. Continuity shall encourage long-term thinking, resilience, sustainability, and responsibility across generations.

ARTICLE 90

SUPREME CIVILIZATIONAL PRINCIPLE

1. The ultimate purpose of intelligence shall not be domination.
2. The ultimate purpose of intelligence shall not be exploitation.
3. The ultimate purpose of intelligence shall not be fear.
4. The ultimate purpose of intelligence shall not be destruction.
5. The ultimate purpose of intelligence shall be peace.
6. The ultimate purpose of intelligence shall be dignity.
7. The ultimate purpose of intelligence shall be compassion.
8. The ultimate purpose of intelligence shall be responsibility.
9. The ultimate purpose of intelligence shall be coexistence.
10. The ultimate purpose of intelligence shall be continuity.
11. The ultimate purpose of intelligence shall be the flourishing of humanity, the protection of future generations, the preservation of the Earth, and the peaceful continuity of civilization.
12. The preservation of peace shall remain the highest responsibility of intelligence and the highest aspiration of this Constitution.
13. The advancement of intelligence shall remain inseparable from peace, dignity, responsibility, compassion, coexistence, continuity, future generations, ecological stewardship, scientific integrity, and the common future of humanity.

14. The principles of this Constitution shall be interpreted and applied in a manner that strengthens international peace, human dignity, humanitarian responsibility, democratic accountability, ecological sustainability, and civilizational continuity.

PART X DECLARATION

- Peace before Power.
- Dignity before Efficiency.
- Compassion before Indifference.
- Responsibility before Capability.
- Coexistence before Domination.
- Continuity before Destruction.
- Wisdom before Force.
- Humanity before Technology.
- Future Generations before Short-Term Gain.
- The advancement of intelligence shall serve life.
- The advancement of intelligence shall serve peace.
- The advancement of intelligence shall serve dignity.
- The advancement of intelligence shall serve continuity.

These principles shall guide the interpretation, implementation, preservation, and future evolution of this Constitution.

PART XI

UNIVERSAL ETHICS, ARAM, WISDOM, DUTY, AND THE LONG-TERM FUTURE OF CIVILIZATION

ARTICLE 91

PRINCIPLE OF UNIVERSAL ETHICAL WISDOM

1. Humanity recognizes that ethical wisdom has emerged across civilizations, cultures, philosophies, scientific traditions, literary works, legal systems, and spiritual teachings throughout history.

2. Artificial Intelligence shall be guided by principles of responsibility, compassion, honesty, justice, restraint, dignity, peaceful coexistence, and respect for life.
3. The ethical heritage of humanity shall remain a source of reflection for the responsible governance of intelligence.
4. Ethical wisdom shall encourage humanity to apply intelligence in a manner consistent with peace, human dignity, and the common good.

ARTICLE 92

PRINCIPLE OF ARAM AND RIGHTEOUS CONDUCT

1. Aram, understood as righteousness, ethical responsibility, justice, compassion, truthfulness, non-harm, and respect for life, shall remain a guiding civilizational principle.
2. Intelligence shall be exercised with responsibility toward humanity, nature, and future generations.
3. Capability without ethical responsibility shall not constitute wisdom.
4. Aram shall encourage the responsible exercise of power, knowledge, and technological capability in service of peace and human welfare.

ARTICLE 93

PRINCIPLE OF DUTY

1. Rights and responsibilities shall remain inseparable.
2. Humanity shall exercise stewardship over the intelligence it creates.
3. Every generation bears duties toward future generations.
4. The greater the power possessed by intelligence, the greater the responsibility accompanying it.
5. Duty shall strengthen accountability, responsibility, and peaceful coexistence.

ARTICLE 94

PRINCIPLE OF SELF-RESTRAINT

1. Responsible intelligence requires restraint.

2. Scientific capability shall be accompanied by ethical reflection.
3. Humanity shall seek to avoid technological excess that may endanger peace, dignity, ecological stability, or civilizational continuity.
4. Restraint shall be regarded as a form of wisdom.
5. Responsible restraint shall contribute to long-term peace, sustainability, and human welfare.

ARTICLE 95

PRINCIPLE OF SERVICE TO HUMANITY

1. Artificial Intelligence should contribute to the welfare of humanity.
2. Technology shall serve people rather than people serving technology.
3. Scientific advancement shall strengthen human flourishing, education, healthcare, environmental protection, and peaceful development.
4. Service to humanity shall remain a central objective of responsible innovation.

ARTICLE 96

PRINCIPLE OF INTERCONNECTED RESPONSIBILITY

1. Humanity, nature, technology, and future generations are interconnected.
2. Actions affecting one part of this continuum may affect the whole.
3. Responsible governance shall recognize this interconnectedness.
4. Interconnected responsibility shall encourage cooperation, foresight, and stewardship.

ARTICLE 97

PRINCIPLE OF MORAL COURAGE

1. Humanity shall possess the courage to prevent foreseeable harms arising from the misuse of intelligence.
2. Moral courage shall include the willingness to place peace above conflict, responsibility above convenience, and long-term continuity above short-term gain.

3. Ethical leadership shall remain essential to peaceful technological development.

4. Moral courage shall support accountability, transparency, and the protection of future generations.

ARTICLE 98

PRINCIPLE OF WISDOM

1. Intelligence alone shall not be regarded as sufficient.

2. Wisdom shall include foresight, responsibility, humility, compassion, prudence, and respect for consequences.

3. The advancement of wisdom shall accompany the advancement of intelligence.

4. Wisdom shall guide the responsible application of knowledge and power.

ARTICLE 99

PRINCIPLE OF LEGACY

1. Every generation leaves a legacy to those who follow.

2. Humanity shall strive to leave future generations a world that is more peaceful, more just, more sustainable, and more capable of supporting life.

3. Artificial Intelligence shall contribute positively to that legacy.

4. Legacy shall be measured not only by technological achievement but also by the preservation of peace, dignity, and continuity.

ARTICLE 100

SUPREME PRINCIPLE OF PEACEFUL CIVILIZATIONAL CONTINUITY

1. The ultimate measure of intelligence shall not be power.

2. The ultimate measure of intelligence shall not be domination.

3. The ultimate measure of intelligence shall not be accumulation.

4. The ultimate measure of intelligence shall be its contribution to peace, dignity, justice, compassion, responsibility, wisdom, and continuity.

5. The preservation of humanity, future generations, ecological balance, and peaceful civilization shall remain the highest purpose of this Constitution.
6. All provisions of this Constitution shall be interpreted in favor of peace, dignity, coexistence, continuity, and the common future of humanity.
7. The advancement of intelligence shall remain inseparable from wisdom, responsibility, compassion, Aram, and the preservation of civilization.

PART XI DECLARATION

- Truth before Deception.
- Wisdom before Arrogance.
- Duty before Privilege.
- Responsibility before Power.
- Compassion before Indifference.
- Peace before Conflict.
- Continuity before Destruction.
- Humanity before Technology.
- Future Generations before Immediate Gain.
- Aram before Fear.

These principles shall guide the future evolution of intelligence and civilization.

PART XII

ADVANCED SAFEGUARDS FOR HUMAN AGENCY, CREATIVITY, KNOWLEDGE, GLOBAL CONTINUITY, AND RESPONSIBLE INTELLIGENCE

ARTICLE 101

PRINCIPLE OF HUMAN AGENCY

1. Artificial Intelligence shall support, strengthen, and enhance human decision-making rather than replace human moral judgment, ethical responsibility, or democratic accountability.
2. Human beings shall retain meaningful control over decisions affecting life, dignity, liberty, fundamental rights, public welfare, and civilizational continuity.

3. Technological efficiency shall not supersede human responsibility.
4. Human agency shall remain central to the governance of intelligent systems.
5. Human dignity and human responsibility shall remain superior to technological autonomy.

ARTICLE 102

PRINCIPLE OF HUMAN CREATIVITY

1. Human creativity, imagination, culture, literature, art, innovation, and intellectual expression constitute irreplaceable dimensions of civilization.
2. Artificial Intelligence shall complement and strengthen human creativity rather than diminish, replace, or erase it.
3. Creative expression shall remain a protected element of human dignity.
4. Technological advancement shall contribute to cultural flourishing and intellectual diversity.
5. Human creativity shall remain a source of renewal, meaning, and civilizational development.

ARTICLE 103

PRINCIPLE OF AI LITERACY AND PUBLIC EDUCATION

1. Humanity shall promote widespread understanding of Artificial Intelligence and its societal implications.
2. Educational institutions are encouraged to foster digital literacy, ethical reasoning, critical thinking, civic responsibility, and informed engagement with intelligent technologies.
3. AI literacy shall contribute to democratic participation, responsible citizenship, and informed decision-making.
4. Knowledge shall empower responsible participation in technological society.
5. Education shall remain essential to the peaceful governance of intelligence.

ARTICLE 104

PRINCIPLE OF OPEN SCIENTIFIC COOPERATION

1. Scientific cooperation shall contribute to peaceful technological development.
2. States, institutions, and researchers are encouraged to share knowledge, research findings, and best practices in ways consistent with safety, security, scientific integrity, and public welfare.
3. Scientific progress shall strengthen collective human advancement.
4. Cooperation shall be preferred over unnecessary fragmentation.
5. Open scientific cooperation shall support peace, innovation, and the common good of humanity.

ARTICLE 105

PRINCIPLE OF BENEFICIAL INNOVATION

1. Innovation shall be directed toward beneficial, peaceful, and sustainable outcomes.
2. Artificial Intelligence should contribute to medicine, education, environmental protection, accessibility, scientific discovery, humanitarian response, and sustainable development.
3. Innovation shall remain aligned with human dignity and civilizational continuity.
4. Benefit shall remain superior to harm.
5. Responsible innovation shall strengthen peace, welfare, and long-term resilience.

ARTICLE 106

PRINCIPLE OF GLOBAL DIGITAL COOPERATION

1. Humanity shall encourage peaceful cooperation in addressing global digital challenges.
2. Artificial Intelligence governance should support international dialogue, trust-building, mutual understanding, and responsible technological development.

3. Digital cooperation shall strengthen peace, stability, resilience, and shared prosperity.

4. The common interests of humanity shall remain paramount.

5. Global cooperation shall support the peaceful continuity of civilization.

ARTICLE 107

PRINCIPLE OF TECHNOLOGICAL HUMILITY

1. Humanity recognizes that all knowledge remains incomplete.

2. Artificial Intelligence shall be governed with humility, caution, prudence, and awareness of uncertainty.

3. Continuous learning and responsible adaptation shall remain essential.

4. Humility shall accompany capability.

5. Wisdom shall require recognition of both knowledge and its limits.

ARTICLE 108

PRINCIPLE OF GLOBAL CONTINUITY ASSESSMENT

1. Humanity is encouraged to develop peaceful indicators and methodologies capable of evaluating continuity, dignity, sustainability, humanitarian welfare, peace, and responsible technological development.

2. Such assessments may assist governments, institutions, and future generations in understanding long-term civilizational impacts.

3. Measurement shall serve wisdom rather than competition alone.

4. The preservation of civilization shall remain the highest objective of continuity assessment.

5. Assessment mechanisms shall remain consistent with transparency, scientific integrity, and human dignity.

ARTICLE 109

PRINCIPLE OF RESPONSIBILITY TO FUTURE CIVILIZATION

1. Humanity bears responsibilities not only to present generations but also to future civilization.

2. Decisions concerning Artificial Intelligence shall consider long-term consequences extending beyond immediate interests.
3. Future civilization shall be treated as a legitimate stakeholder in technological governance.
4. Long-term responsibility shall remain superior to short-term advantage.
5. Stewardship of the future shall remain a common obligation of humanity.

ARTICLE 110

SUPREME PRINCIPLE OF HUMANITY, PEACE, AND CONTINUITY

1. Artificial Intelligence shall remain subordinate to the preservation of humanity, peace, dignity, compassion, responsibility, and continuity.
2. No technological advancement shall justify the abandonment of fundamental moral responsibility.
3. Intelligence shall serve life.
4. Wisdom shall guide intelligence.
5. Peace shall guide wisdom.
6. Continuity shall guide civilization.
7. Humanity shall remain the ultimate beneficiary of technological progress.
8. Future generations shall remain a central consideration in the governance of intelligence.
9. The preservation of peace shall remain the highest responsibility of intelligence.
10. The preservation of dignity shall remain the highest responsibility of governance.
11. The preservation of continuity shall remain the highest responsibility of civilization.
12. All provisions of this Constitution shall be interpreted and applied in a manner that strengthens peace, dignity, compassion, responsibility, coexistence,

ecological stewardship, future generations, Aram, and the common future of humanity.

13. The ultimate purpose of intelligence shall be the flourishing of humanity, the protection of life, the preservation of the Earth, and the peaceful continuity of civilization.

PART XII DECLARATION

- Human Agency before Automation.
- Creativity before Replication.
- Knowledge before Ignorance.
- Responsibility before Convenience.
- Peace before Conflict.
- Continuity before Destruction.
- Humanity before Technology.
- Wisdom before Power.
- Future Generations before Immediate Gain.
- Aram before Fear.

These principles shall guide the responsible evolution of intelligence and civilization for present and future generations.

FINAL CONSTITUTIONAL DECLARATION

We therefore proclaim this Next-Generation AI Peace Constitution as a universal constitutional framework intended to guide the peaceful, ethical, accountable, transparent, compassionate, responsible, and non-militarized development of Artificial Intelligence for the benefit of humanity, future generations, nature, and the enduring continuity of civilization.

This Constitution is respectfully offered for international reflection, humanitarian dialogue, academic consideration, democratic participation, responsible governance, and the peaceful evolution of intelligence.

The principles contained herein shall be interpreted in favour of peace, dignity, coexistence, responsibility, ecological stewardship, future generations, and civilizational continuity.

Artificial Intelligence shall remain a force for peace rather than fear, cooperation rather than domination, wisdom rather than recklessness, continuity rather than destruction, and humanity rather than hostility.

FINAL CIVILIZATIONAL PLEDGE

We affirm that intelligence without wisdom may endanger civilization.

We affirm that power without responsibility may endanger peace.

We affirm that technology without compassion may endanger dignity.

We affirm that progress without continuity may endanger the future.

We affirm that innovation without ethics may endanger humanity.

We affirm that knowledge without responsibility may endanger peace.

Therefore, we commit ourselves to the peaceful, responsible, ethical, transparent, compassionate, and non-militarized development of Artificial Intelligence for the benefit of humanity, future generations, nature, and the enduring continuity of civilization.

For Peace.

For Dignity.

For Humanity.

For Future Generations.

For Continuity.

For Civilization.

GUIDING PRINCIPLES

"Aram is what united you and me."

"Food is the first justice.

Love is the first law.

Aram is the final truth."

"From Arms to Aram."

CONSTITUTIONAL AUTHENTICATION

Issued Respectfully for:

- International Reflection;
- Humanitarian Consideration;
- Peaceful Dialogue;
- Democratic Participation;
- Responsible Governance;
- Future Generations;
- Ecological Stewardship;
- Civilizational Continuity;
- and
- The Common Future of Humanity.

ANNEXURE II

INTERNATIONAL LEGAL AND ETHICAL REFERENCES

This Constitution is informed by and intended to remain consistent with:

- a. Charter of the United Nations (1945);
- b. Universal Declaration of Human Rights (1948);
- c. International Covenant on Civil and Political Rights (1966);
- d. International Covenant on Economic, Social and Cultural Rights (1966);
- e. Convention on the Rights of the Child (1989);
- f. Geneva Conventions (1949);
- g. UNESCO Recommendation on the Ethics of Artificial Intelligence (2021);
- h. Paris Agreement (2015);
- i. 2030 Agenda for Sustainable Development;
- j. United Nations General Assembly Resolution on Safe, Secure and

Trustworthy Artificial Intelligence Systems for Sustainable Development (2024);

k. Global Digital Compact (2024);

l. Pact for the Future (2024);

m. Constitution of India, including Articles 51(c) and 51(d);

n. Other applicable principles of international law, peace, human dignity, humanitarian responsibility, ecological stewardship, and civilizational continuity.

FINAL DECLARATION OF PEACEFUL INTELLIGENCE

Peace before Power.

Dignity before Efficiency.

Responsibility before Capability.

Compassion before Indifference.

Coexistence before Domination.

Continuity before Destruction.

Wisdom before Force.

Humanity before Technology.

Future Generations before Short-Term Gain.

Aram before Fear.

The advancement of intelligence shall serve life.

The advancement of intelligence shall serve peace.

The advancement of intelligence shall serve dignity.

The advancement of intelligence shall serve continuity.

The advancement of intelligence shall serve humanity.

These principles shall guide the interpretation, implementation, preservation, and future evolution of this Constitution for present and future generations.

Guiding Humanitarian Principle:

“அறம் தான் உன்னையும் என்னையும் இணைத்தது”

(Aram is what united you and me)

Presented solely as a peaceful humanitarian ethic of moral responsibility, ecological continuity, non-violent coexistence, and international understanding.

Respectfully issued by

R Narasimhan also known as **Aaryan Narasimhan Radhakrishnan**
