

UNITED NATIONS DEPOSITORY EDITION INTERNATIONAL SPACE LAW CONSTITUTION – 2025

A Charter for Cosmic Peace, Ethical Governance, and Continuity of Life
(Diplomatic Submission via the President of the Republic of India under Article 51(c) of the Constitution of India)

PREAMBLE

We, the nations and peoples of Earth, united in conscience and guided by the eternal principle of Aram (Righteousness),

Recalling the purposes and principles enshrined in the Charter of the United Nations (1945);

Recognizing the duty of all nations under Article 51(c) of the Constitution of India to foster respect for international law and treaty obligations;

Affirming that outer space and all celestial bodies constitute the common heritage of all beings — living, non-living and artificial;

Determined to preserve peace, justice, and cosmic continuity through moral governance and universal cooperation;

Hereby adopt this INTERNATIONAL SPACE LAW CONSTITUTION (2025) as a universal moral-legal charter for the peaceful and righteous governance of space.

ARTICLE I — PURPOSES AND PRINCIPLES

1. To uphold peace, justice and ethical governance of all human, natural and artificial activities beyond Earth's atmosphere.
2. To affirm that outer space shall be used exclusively for peaceful purposes (Outer Space Treaty 1967, Art. IV).
3. To promote cooperation, transparency and equality among States and entities engaged in cosmic activity.
4. To align the moral conscience of humankind with the cosmic order of Aram (Righteousness).

ARTICLE II — LEGAL STATUS AND SCOPE

1. Recognized as a Foundational Charter for moral and legal governance of outer space.
2. Applies to all sovereign States, inter-governmental and private organizations, and autonomous systems acting under lawful authority.

3. Complements the Outer Space Treaty (1967), Moon Agreement (1979), Liability Convention (1972) and Registration Convention (1975).
4. Where conflict arises between interest and peace, Aram shall prevail.

ARTICLE III — PROHIBITED ACTS AND MORAL LIMITS

1. Militarization and weaponization of outer space are absolutely prohibited.
2. No entity may claim sovereignty or exclusive rights over celestial territories.
3. Deployment of weapons of mass destruction violates UN Charter Art. 2(4) and Outer Space Treaty Art. IV.
4. Exploitation of extraterrestrial resources without international consensus is unlawful.
5. AI use in space must comply with UNESCO Ethics of AI (2021).

ARTICLE III-A — UNIVERSAL BAN ON SPACE SECURITY FORCES (Moral and Legal Prohibition on Armed Cosmic Entities)

1. Definition — For the purposes of this Constitution, “Space Security Force” means any organized, armed, or military-structured formation established, deployed, maintained or otherwise operating in outer space or on celestial bodies by any State, coalition, intergovernmental body, private entity, contractor or proxy for the purposes of defense, deterrence, enforcement, control, attack or any combat-related function. This definition includes, without limitation, orbital troop contingents, “space marines,” weaponized platforms, autonomous offensive systems, AI-controlled defense/strike infrastructures possessing offensive potential, and private military actors operating in space.
2. Prohibition — No State, coalition, private entity, organization, or proxy acting on their behalf shall establish, deploy, station, maintain or operate Space Security Forces, weaponized military formations, offensive security detachments or substantially armed force-structures in outer space, in orbit, on celestial bodies, or in transit routes to or from space.
3. Exceptions and Oversight — Limited, expressly non-weaponized operations conducted solely for humanitarian rescue, collision-avoidance, emergency response, environmental protection, space traffic management, or other strictly defensive and non-combat functions may be permitted only where:
 - a. The activity is transparently declared in advance; and
 - b. The activity has undergone prior review and written authorization by the International Space Peace Council (ISPC); and

- c. The activity is strictly constrained to non-combat, non-offensive functions and is subject to continuous ISPC monitoring and public reporting.
- 4. Transitional Measures — Existing force-structured programs, deployments or equivalent capabilities that fall within the definition of Space Security Forces shall, within one hundred and twenty (120) days from the date of ratification or accession to this Constitution, provide full disclosure to ISPC of their composition, locations, command structures, armaments, control protocols, operational doctrines and relevant program documentation. ISPC shall, in consultation with the declaring party and relevant stakeholders, supervise a monitored disarmament, repurposing, demilitarization or phase-out plan that ensures safety, transparency and minimal disturbance to peaceful space operations.
- 5. Enforcement and Remedies — Alleged violations of this Article shall be subject to ISPC investigation and reporting. Where breaches are substantiated, ISPC may recommend proportionate remedial measures including, but not limited to:
 - a. Public disclosure and censure;
 - b. Temporary or permanent restrictions on implicated space operations and registrations;
 - c. Recommendations for sanctions or countermeasures to the United Nations Security Council under Chapter VII of the UN Charter; and
 - d. Other measures consistent with international law and the moral authority of ISPC.
- 6. Transparency and Registration — All space operations that include security, defensive or dual-use components must be registered with ISPC and publicly disclosed before commencement. No security-related program or deployment shall commence without prior ISPC notification and, where applicable, approval.
- 7. Principle of Moral Governance — The security of the cosmos shall be founded upon collective trust, cooperation and *Aram* (Righteousness) rather than armed force. States and actors are enjoined to pursue mutual confidence-building measures, arms-control norms and cooperative security frameworks for the preservation of peace beyond Earth.
- 8. Relationship to Existing Treaties — This Article shall be considered a binding moral and legal annex to Article III of the Outer Space Treaty (1967) and to all successor instruments governing the peaceful use of outer space.

ARTICLE IV — COSMIC RIGHTS AND DUTIES

1. All nations and beings possess equal rights to peaceful exploration (Outer Space Treaty Art. I).
2. Extraterrestrial ecosystems, if discovered, shall receive full moral and biological protection (UNGA Res. 47/68).
3. States shall prevent harmful contamination of space and celestial bodies (Outer Space Treaty Art. IX).
4. Celestial cultural heritage and sacred designations shall be protected (UNESCO Convention 1972).

ARTICLE V — INTERNATIONAL SPACE PEACE COUNCIL (ISPC)

1. An International Space Peace Council is hereby constituted under the auspices of the United Nations to oversee implementation of this Constitution, to monitor compliance, to certify and register missions, and to arbitrate disputes arising under its provisions.
2. ISPC shall collaborate with UNOOSA, UNODA, UNESCO and relevant UN organs and specialized agencies.
3. ISPC shall maintain a Universal Registry of Peaceful Missions, aligned with the Registration Convention (1975), and shall publish periodic compliance reports.
4. ISPC may, subject to UN procedures, recommend measures to maintain or restore peace and may refer matters to the Security Council where necessary.

ARTICLE VI — ENVIRONMENTAL AND ETHICAL PROTOCOLS

1. All space activities shall conform to the COPUOS Long-Term Sustainability Guidelines (2019) and to applicable environmental principles, including debris mitigation and remediation per UNGA Resolutions.
2. Parties shall implement mitigation measures to limit debris generation, to remediate hazards where feasible, and to cooperate in active removal or neutralization of objects that threaten the long-term sustainability of orbital and planetary environments.
3. Cosmic sanctuaries may be designated under international principles for protection of scientifically, culturally or morally significant sites.
4. Planetary defense initiatives shall be cooperative, transparent, and strictly non-military in purpose.

ARTICLE VII — SCIENTIFIC AND COMMERCIAL EQUITY

1. Scientific data derived from space activities shall be treated as a shared resource for the benefit of all humankind, subject to reasonable proprietary exceptions and agreed frameworks for sharing.

2. Technology and benefits resulting from space research shall be equitably shared consistent with the principle that outer space is the common heritage of all.
3. Commercial exploitation of space resources shall proceed only under ISPC ethical clearance, environmental assessment, and equitable benefit-sharing arrangements consistent with international law and this Constitution.

ARTICLE VIII — PRIVACY, SECURITY AND DIGITAL RIGHTS

1. Unauthorized imaging, intrusive surveillance or other actions from orbit that violate the right to privacy are prohibited and shall be governed by international human rights norms (ICCPR Art. 17).
2. Digital communications, telemetry and data flows from space shall respect data sovereignty and UN resolutions on privacy in the digital age.
3. Autonomous and AI systems deployed in space shall be transparent, auditable and conform to the UNESCO Recommendation on the Ethics of Artificial Intelligence (2021).

ARTICLE IX — COMPLIANCE AND ADJUDICATION

1. Matters of alleged non-compliance shall be submitted to ISPC for investigation, review and recommendations.
2. Where appropriate, ISPC may refer disputes or violations to the International Court of Justice (ICJ) and to other competent international tribunals.
3. Parties may consent to compulsory adjudication under the ICJ Statute or to arbitration mechanisms established under this Constitution.
4. A specialized International Space Justice Tribunal may be constituted under UN authority to adjudicate disputes arising uniquely from space governance.

ARTICLE X — DIPLOMATIC CUSTODIANSHIP AND RATIFICATION

1. This Constitution shall be transmitted through the President of the Republic of India to the United Nations Office for Outer Space Affairs (UNOOSA) as the Foundational Moral Instrument for Cosmic Governance, pursuant to Article 51(c) of the Constitution of India.
2. The Vishwa Shanti Janata Party (VSJP) shall serve as Founding Depositor and Custodian of the original instrument pending institutional arrangements for ISPC.
3. Ratification of this Constitution shall be open to all Member States of the United Nations; instruments of ratification or accession shall be deposited with the Secretary-General.
4. The Secretary-General shall circulate instruments of ratification to all States and shall enter this Constitution into the international depository records.

5. UNOOSA, UNODA and UNESCO are invited to preserve and disseminate this document as part of the International Depository Record of Peace Constitutions (2025).

ARTICLE XI — FINAL DECLARATION

The heavens and the Earth are one in the moral order of creation.
May this Constitution guide all cosmic endeavors in the light of truth, peace and
Aram — the righteousness that unites all forms of existence.

DONE AT KEELAPERAMBALUR, REPUBLIC OF INDIA

This 27th Day of October 2025

Submitted Constitutionally through the President of the Republic of India to the
United Nations and its Specialized Agencies under Article 51(c) of the Indian
Constitution.

Recognized as the Founding Moral Custodian of the International Space Law
Constitution by the authority of the Republic of India.
