UNITED NATIONS DEPOSITORY SUBMISSION

(Under Article 51(c) of the Constitution of India)

Date: 08th April 2026

Place: Republic of India

To

His Excellency,

The Hon'ble President of the Republic of India,

Rashtrapati Bhavan

New Delhi – [110004](#)

India

SUBJECT:

Submission of an Official International Moral–Legal Declaration on Food Justice, Non-Violent Food Systems and the Protection of the Continuity of All Beings for Transmission to the United Nations and Relevant International Bodies – Reg

Your Excellency,

With the highest respect to the constitutional office of the President of the Republic of India, I humbly submit this representation under Article 51(c) of the Constitution of India, which calls upon the State to promote respect for international law, treaty obligations, and peaceful global cooperation.

In this spirit, I respectfully place before Your Excellency an OFFICIAL INTERNATIONAL MORAL–LEGAL DECLARATION, titled:

“Declaration on Food Justice, Non-Violent Food Systems, and the Protection of the Continuity of All Beings.”

This Declaration, together with its comprehensive Annexures, is presented as a non-binding, non-coercive, and non-adversarial international policy and moral framework, intended to contribute constructively to global discourse on:

- Food justice and equitable access
- Food quality and public health
- Ecological sustainability
- Ethical and non-violent food systems
- The continuity of all living and non-living beings

The submission is grounded in:

- The Charter of the United Nations
- Universal human rights principles
- Sustainable Development Goals
- Established international legal and ethical frameworks

This representation does not seek any enforcement action, directive, or adjudication. It is respectfully offered as a civilizational, humanitarian, and policy-level contribution from India, in alignment with its constitutional values and long-standing traditions of Ahimsa (non-violence), Aram (moral righteousness), and peaceful coexistence.

REQUEST

I respectfully request that this Declaration and its Annexures may be:

- Kindly taken on official record
- Examined within the appropriate constitutional and administrative framework
- Transmitted, as deemed appropriate, to:
 - The Secretary-General of the United Nations
 - The United Nations General Assembly
 - The Economic and Social Council (ECOSOC)
 - FAO, WHO, UNEP, UNDP
 - Relevant United Nations bodies and Member States

for the purpose of global awareness, consultation, and constructive engagement.

CONCLUSION

Your Excellency,

It is humbly submitted that the integrity of food systems is inseparable from the future of humanity, ecological balance, and the continuity of all beings.

This Declaration is placed before Your Excellency in the spirit of:

- Responsibility
- Constitutional respect
- Global cooperation
- And enduring peace

I remain deeply grateful for the time, consideration, and constitutional dignity accorded to this submission.

Yours faithfully,
A Human Being,

R NARASIMHAN Digitally signed by R NARASIMHAN

Keelaperambalur Village, Perambalur District, Tamil Nadu – 621716

OFFICIAL INTERNATIONAL MORAL–LEGAL DECLARATION **ON FOOD JUSTICE, NON-VIOLENT FOOD SYSTEMS, AND** **THE PROTECTION OF THE CONTINUITY OF ALL BEINGS**

Submitted in Respectful Reference to Articles 51(c) of the Constitution of India

Date: 08th April 2026

Place: Republic of India

Submitted with utmost constitutional respect to:

His Excellency,

The Hon'ble President of the Republic of India,

Rashtrapati Bhavan, New Delhi – [110004](#)

India.

For Transmission to:

- United Nations Secretary-General
- United Nations General Assembly
- United Nations Economic and Social Council (ECOSOC)
- Food and Agriculture Organization (FAO)
- World Health Organization (WHO)
- United Nations Environment Programme (UNEP)
- United Nations Development Programme (UNDP)
- All Member States of the United Nations

PREAMBULAR CONSIDERATIONS

Recalling the Charter of the United Nations, in particular:

- Article 1(1) – Maintenance of international peace and security
- Article 1(3) – Promotion of social progress and better standards of life
- Article 55 – Conditions for stability and well-being necessary for

peaceful relations

- Article 56 – Collective responsibility of Member States

Recalling further:

- Universal Declaration of Human Rights (UDHR), Article 25 – Right to adequate food
- International Covenant on Economic, Social and Cultural Rights (ICESCR), Article 11 – Right to food and freedom from hunger
- Sustainable Development Goals (SDG 2 – Zero Hunger, SDG 3 – Health, SDG 12 – Responsible Consumption, SDG 15 – Life on Land)

Reaffirming:

- The principle of dignity of all beings
- The obligation to protect ecological continuity
- The responsibility of States to ensure safe and adequate food systems

Recognizing that food is not merely a commodity, but the fundamental basis of life, continuity, and peace for all beings.

STATEMENT OF GLOBAL CONCERN

It is respectfully placed on the global public record that humanity is currently facing a profound moral and ecological crisis in relation to food systems.

Food, which was once a natural and life-sustaining necessity, is increasingly being transformed into:

- A tool of economic control
- A source of ecological destruction
- A system of chemical dependency
- A mechanism of inequality and exploitation

It is observed with deep concern that:

- Industrial food production increasingly relies on excessive chemical inputs harmful to health and ecosystems
- Food preservation and distribution systems prioritize profit over safety and quality

- Living beings are being systematically exploited, harmed, or eliminated in the process of food production
- Food systems are contributing to rising health disorders, unexplained deaths, and long-term generational risks

This trajectory represents a fundamental deviation from natural law, moral responsibility, and sustainable human evolution.

MORAL AND CIVILIZATIONAL POSITION

It is affirmed that:

- Hunger is the first form of violence
- Food must never become a weapon
- The destruction of life for consumption reflects a failure of moral evolution
- An economy that compromises food quality compromises life itself

The transformation of food into a system of profit, domination, and control constitutes a threat not only to humanity but to all living and interdependent systems on Earth.

GLOBAL RISKS IDENTIFIED

The continuation of current food practices may lead to:

- Irreversible health crises across populations
- Collapse of ecological food chains
- Loss of biodiversity and species continuity
- Long-term genetic and reproductive harm
- Permanent damage to future generations

These risks extend beyond national boundaries and constitute a global concern requiring collective international attention.

FORMAL INTERNATIONAL APPEAL

In alignment with Article 51(c) of the Constitution of India, which promotes respect for international law and peaceful cooperation, this Declaration respectfully calls upon the international community to:

1. Ensure that food is never used as an instrument of control, profit exploitation, or political manipulation.
2. Establish globally enforceable standards for food quality, safety, and ecological sustainability.
3. Transition toward non-violent, life-protective food systems that do not harm living beings or ecological balance.
4. Reduce and regulate the excessive use of chemical fertilizers, pesticides, and preservation agents harmful to life.
5. Prioritize agriculture as a global peace activity, shifting focus from conflict and weaponization toward food security and ecological harmony.
6. Encourage international cooperation for sustainable, natural, and ethical food production systems.
7. Review and restrict research practices that threaten the continuity of life, ecological balance, or food integrity.
8. Promote ethical, Aram-based (moral righteousness) living standards that prioritize health, balance, and coexistence.

LEGAL AND DIPLOMATIC CLARIFICATION

This Declaration:

- Is non-binding, non-coercive, and non-accusatory
- Fully respects the sovereignty and equality of all States
- Does not interfere with domestic governance
- Aligns with international law and United Nations principles
- Is presented as a moral, humanitarian, and civilizational appeal

CIVILIZATIONAL PRINCIPLE

True peace cannot exist without pure and just food.

Food is not merely nourishment — it is the foundation of life, health, continuity, and moral balance.

A world that compromises food quality compromises its own future.

FINAL DECLARATION

Humanity must now make a decisive choice:

- Between profit and life
- Between exploitation and coexistence
- Between destruction and continuity

The global community is respectfully urged to act collectively, responsibly, and urgently to ensure that:

Food remains a source of life —
not a source of harm.

Issued by,
A Human Being,

R NARASIMHAN Digitally signed by R NARASIMHAN

ANNEXURES
(Integral Part of the UNITED NATIONS DEPOSITORY EDITION
DECLARATION)

ANNEXURE – I

LEGAL & INTERNATIONAL LAW ALIGNMENT

This Declaration is fully aligned with established principles of international law and does not conflict with any binding treaty obligations.

Relevant Legal Foundations:

- Charter of the United Nations
 - Article 1(1): Maintenance of international peace and security
 - Article 1(3): Promotion of social progress and better standards of life
 - Article 55: Economic and social stability for peaceful relations
 - Article 56: Collective responsibility of Member States
- Universal Declaration of Human Rights (UDHR)
 - Article 25: Right to adequate food and well-being
- International Covenant on Economic, Social and Cultural Rights (ICESCR)
 - Article 11: Fundamental right to be free from hunger
- Sustainable Development Goals (SDGs)
 - SDG 2: Zero Hunger
 - SDG 3: Good Health and Well-being
 - SDG 12: Responsible Consumption
 - SDG 15: Life on Land

This Declaration strengthens and reinforces these existing frameworks by introducing a moral–civilizational dimension to food justice.

ANNEXURE – II

SCIENTIFIC & PUBLIC HEALTH BASIS

Modern scientific understanding confirms that food quality directly impacts human health, ecological systems, and long-term survival.

Key Observations:

- Excessive use of chemical fertilizers and pesticides is associated with soil degradation and contamination of food systems
- Food preservation chemicals may affect long-term health outcomes
- Declining nutritional quality of food contributes to chronic health conditions
- Environmental toxins in food systems impact both human and non-human life

This Annexure establishes that the issue of food quality is not philosophical alone, but scientifically and medically relevant.

ANNEXURE – III

ENVIRONMENTAL & ECOLOGICAL IMPACT

Food systems are directly linked to environmental stability.

Observed Impacts:

- Soil degradation due to chemical-intensive agriculture
- Loss of biodiversity, including pollinators and micro-organisms
- Water contamination from agricultural runoff
- Disruption of natural ecosystems and food chains

This confirms that food systems, when misaligned with nature, contribute to ecological imbalance and threaten planetary continuity.

ANNEXURE – IV

ETHICAL & MORAL FRAMEWORK (ARAM-BASED PRINCIPLE)

This Declaration is grounded in the universal ethical principle of **Aram (Moral Righteousness)**.

Core Moral Assertions:

- Food must sustain life, not destroy life
- No being should be harmed for the purpose of consumption
- Interdependence is natural; domination is artificial
- Dignity applies to all living and non-living existence

Traditional Knowledge Alignment:

- “**Unave Marunthu**” (**Food is Medicine**) – Tamil civilizational principle
- Ahimsa – Non-violence as a foundational life principle

This Annexure establishes the moral legitimacy of transitioning toward non-violent food systems.

ANNEXURE – V

NON-ACCUSATORY DIPLOMATIC CLARIFICATION

This Declaration is issued:

- Without accusation against any State, institution, or individual
- Without intent to assign responsibility or blame
- Without seeking coercive enforcement mechanisms

It is:

- A voluntary moral appeal
- A diplomatic contribution to global discourse
- A non-adversarial framework for collective reflection

This ensures full compliance with principles of sovereignty, neutrality, and international respect.

ANNEXURE – VI

VOLUNTARY IMPLEMENTATION FRAMEWORK

This Declaration encourages voluntary adoption through:

- Gradual transition to sustainable agricultural practices
- Reduction in harmful chemical inputs
- Promotion of natural and ecological farming systems
- Strengthening food safety standards
- Encouraging international cooperation and knowledge sharing

No State is obligated; all participation is based on sovereign choice and mutual respect.

ANNEXURE – VII

FUTURE RISK ASSESSMENT

If current trends continue, potential risks include:

- Large-scale health crises across populations
- Declining fertility and generational health
- Collapse of ecosystems and biodiversity
- Long-term contamination of soil, water, and food chains
- Irreversible damage to future generations

This Annexure highlights the urgency of addressing food systems as a global priority.

ANNEXURE VIII

GLOBAL CONSULTATION & COOPERATION INVITATION

The international community is respectfully invited to engage in:

- Multilateral dialogue on food justice and sustainability
- Scientific collaboration on safe food systems

- Policy discussions within UN bodies and international institutions
- Inclusive participation of civil society, researchers, and communities

This Declaration remains open for global consultation, refinement, and cooperative evolution.

ANNEXURE IX

DEFINITIONS & TERMINOLOGY FRAMEWORK

For the purpose of clarity, consistency, and international understanding, the following definitions are established:

1. Non-Violent Food System

A food system in which production, distribution, and consumption do not involve harm, killing, exploitation, or suffering of any living being, and remain aligned with ecological balance.

2. Food Justice

The equitable, safe, and dignified access to nutritious food for all beings, ensuring fairness across human, non-human, and ecological systems.

3. Food Weaponization

The use of food systems, supply chains, pricing mechanisms, or access control as tools of political, economic, or strategic domination.

4. Ecological Continuity

The uninterrupted existence and balance of ecosystems, including soil, water, biodiversity, and climate systems, ensures sustainability for present and future generations.

5. Chemical Dependency in Food Systems

A condition where agricultural productivity and food preservation rely excessively on synthetic chemical inputs, potentially compromising health and environmental integrity.

These definitions aim to ensure uniform interpretation across international legal, policy, and scientific platforms.

ANNEXURE X

GLOBAL GOVERNANCE & MONITORING FRAMEWORK

Recognizing the importance of coordinated global action, this Declaration encourages the establishment of a voluntary, cooperative monitoring framework:

1. International Coordination

Relevant United Nations bodies such as FAO, WHO, UNEP, and UNDP may facilitate dialogue and cooperation among Member States.

2. Voluntary Reporting Mechanism

Member States may, at their discretion, share periodic updates on improvements in food quality, sustainability, and safety.

3. Knowledge Sharing Platforms

Encouragement of global exchange of best practices in sustainable agriculture, non-violent food systems, and ecological preservation.

4. Scientific Collaboration

Promotion of interdisciplinary research focused on safe, natural, and sustainable food production.

This framework remains non-binding and fully respects national sovereignty.

ANNEXURE XI

RIGHTS OF ALL BEINGS FRAMEWORK

This Declaration affirms a broader ethical expansion of rights:

1. Right to Nourishment

All living beings have a fundamental right to access sustenance necessary for survival.

2. Right to Non-Harm

No being should be subjected to unnecessary harm, suffering, or destruction for the purpose of consumption or economic gain.

3. Interdependence Principle

All forms of existence—human, animal, plant, and ecological—are interconnected and mutually sustaining.

4. Ecological Dignity

Non-living systems such as soil, water, and air possess intrinsic value essential for life continuity.

5. Continuity of Life

The survival of future generations depends on the protection of present ecosystems and ethical food systems.

This framework is presented as a moral and civilizational expansion, consistent with evolving international consciousness.

ANNEXURE XII

ECONOMIC TRANSITION FRAMEWORK

Recognizing the need for a gradual and practical transition, this Declaration encourages:

1. Shift Toward Natural Agriculture

Reduction of chemical dependency and adoption of ecological farming practices.

2. Farmer-Centric Models

Strengthening the role and dignity of farmers as primary custodians of global food systems.

3. Sustainable Trade Practices

Encouraging ethical, transparent, and non-exploitative food trade.

4. Reduction of Waste and Overproduction

Minimizing resource misuse and ensuring equitable distribution.

5. Alignment with Ecological Limits

Economic activities must respect environmental thresholds and sustainability.

This transition is voluntary, adaptive, and respectful of diverse national contexts.

ANNEXURE XIII

PRECAUTIONARY PRINCIPLE & RESEARCH ETHICS

In recognition of emerging global risks, this Declaration affirms:

1. Precautionary Principle

Where scientific uncertainty exists, actions that may cause harm to life or ecosystems should be approached with caution.

2. Ethical Boundaries in Research

Research that may threaten the continuity of life, ecological balance, or food integrity must be carefully evaluated and regulated.

3. Non-Harm Scientific Progress

Scientific advancement must prioritize safety, sustainability, and respect for all forms of existence.

4. Prohibition of Harmful Practices

States are encouraged to review and restrict research activities that may introduce long-term risks to health, environment, or biodiversity.

5. Aram-Based Ethical Standard

All research and innovation should be guided by moral responsibility, compassion, and non-violence.

This Annexure establishes that progress must not come at the cost of life.

ANNEXURE XIV

UNIVERSAL FOOD ACCESS & QUALITY PRINCIPLE

Recognizing that food is the fundamental basis of life, dignity, health, and continuity for all beings;

Reaffirming that the right to food must be understood not only as access to food, but as access to **safe, nutritious, and life-sustaining food of adequate quality**;

Acknowledging that the existence of food alone is insufficient if its quality compromises health, ecological balance, or long-term survival;

This Annexure establishes the **Universal Food Access & Quality Principle** as a core extension of global food justice.

1. UNIVERSAL ACCESS TO FOOD

It is affirmed that:

- All living beings have the right to access sufficient food necessary for survival
- No being should experience hunger, deprivation, or forced scarcity
- Food systems must be organized to ensure equitable distribution without discrimination
- Access to food must not be restricted by economic, political, or structural barriers

Food is not a privilege.

Food is a fundamental condition of existence.

2. QUALITY OF FOOD AS A FUNDAMENTAL RIGHT

It is further affirmed that:

- Food must be safe, clean, and free from harmful substances
- Food must not contain elements that cause long-term harm to health or ecosystems
- Nutritional integrity must be preserved from production to consumption
- Chemical dependency in food systems must be reduced and responsibly regulated

The right to food is incomplete without the right to quality food.

3. NON-HARM PRINCIPLE IN FOOD SYSTEMS

Food systems must be guided by the principle that:

- No unnecessary harm should be caused to living beings in the process of food production
- Ecological balance must be preserved
- Food production must align with sustainability and continuity of life

Food must sustain life — not destroy it.

4. RESPONSIBILITY OF STATES

States are encouraged, within their sovereign capacity, to:

- Ensure availability of safe and nutritious food for populations
- Establish and enforce food safety and quality standards
- Promote sustainable and natural agricultural practices
- Protect ecosystems that form the foundation of food systems

This responsibility extends to safeguarding both present and future generations.

5. GLOBAL COOPERATION

The international community is invited to:

- Promote global standards for food quality and safety
- Share knowledge and practices for sustainable food production
- Collaborate through UN bodies and international institutions
- Support efforts to eliminate hunger in all forms

Food security and food quality are shared global responsibilities.

6. CIVILIZATIONAL PRINCIPLE

A world where food is available but unsafe is not a just world.

A world where food is safe but inaccessible is not a humane world.

A just and sustainable world must ensure both:

Food for all beings — and food that preserves life.

FINAL AFFIRMATION

Food shall not be treated as a weapon, a commodity of control, or a source of harm.

Food shall remain what it was meant to be:

A universal source of life, health, dignity, and continuity.

ANNEXURE XV

GLOBAL EVIDENCE & FACTUAL FOUNDATION

This Annexure forms an integral part of the

OFFICIAL INTERNATIONAL MORAL–LEGAL DECLARATION ON FOOD JUSTICE, NON-VIOLENT FOOD SYSTEMS, AND THE PROTECTION OF THE CONTINUITY OF ALL BEINGS.

Its purpose is to establish that the concerns raised in the Declaration are not merely ethical or philosophical, but are also supported by broad scientific, public health, ecological, and developmental evidence.

1. GLOBAL HUNGER & MALNUTRITION EVIDENCE

It is widely recognized through international development discourse that:

- Hunger and undernourishment continue to affect significant populations across the world
- Malnutrition, food insecurity, and micronutrient deficiencies remain major barriers to human development
- The burden of food insecurity is not limited to low-income populations alone, but increasingly affects global stability, migration, conflict exposure, and social resilience

This demonstrates that the right to food remains incompletely realized at the global level.

2. FOOD QUALITY & HEALTH EVIDENCE

There is growing concern across public health and scientific communities regarding:

- Declining nutritional integrity in food systems
- Excessive chemical inputs in agricultural production
- Harmful preservation and processing practices
- Long-term health implications associated with unsafe or low-quality food

These concerns extend beyond immediate illness and include possible long-term consequences for:

- human health
- reproductive stability

- child development
- intergenerational well-being

Accordingly, food access without food quality cannot be regarded as full food justice.

3. ECOLOGICAL EVIDENCE

Global ecological observations increasingly confirm that present food systems may contribute to:

- soil degradation
- biodiversity decline
- contamination of water systems
- destruction of pollinator networks
- weakening of ecological food chains

Where food systems become chemically dependent, ecologically extractive, and profit-driven, the continuity of life-support systems is placed at risk.

4. ECONOMIC & DISTRIBUTIVE EVIDENCE

It is further recognized that the global food crisis is not solely a question of production, but also of:

- unequal access
- waste
- inequitable distribution
- speculative pricing
- hoarding and structural manipulation

This demonstrates that hunger persists not only because of scarcity, but often because of systemic imbalance in the moral and economic organization of food.

5. CIVILIZATIONAL EVIDENCE

Historical and cultural traditions across civilizations affirm that food was originally understood as:

- nourishment
- continuity
- health
- shared life support

The reduction of food into a mere commercial instrument or strategic commodity reflects a civilizational distortion rather than a natural condition.

6. CONCLUSION OF EVIDENCE

The evidence broadly supports the following conclusions:

- Food insecurity remains a global reality
- Food quality is inseparable from health and continuity
- Ecological destruction and food degradation are interlinked
- Economic distortion contributes to hunger and inequality
- A reorientation toward safe, non-violent, and life-protective food systems is scientifically, morally, and civilizational justified

Accordingly, this Declaration is supported not only by moral reasoning, but also by substantial evidence from public health, environmental observation, development discourse, and ecological reality.

ANNEXURE XVI

VOLUNTARY GLOBAL IMPLEMENTATION ROADMAP

This Annexure forms an integral part of the **OFFICIAL INTERNATIONAL MORAL–LEGAL DECLARATION ON FOOD JUSTICE, NON-VIOLENT FOOD SYSTEMS, AND THE PROTECTION OF THE CONTINUITY OF ALL BEINGS.**

Its purpose is to provide a phased, voluntary, sovereignty-respecting pathway for the gradual implementation of the principles set forth in the Declaration.

PHASE I — IMMEDIATE ACTIONS (0–5 YEARS)

States, institutions, and relevant international bodies are encouraged to:

1. Review food quality and safety standards within existing national frameworks.
2. Assess the extent of chemical dependency in food production and storage systems.
3. Strengthen food safety testing, transparency, and public awareness mechanisms.

4. Promote reduction of toxic agricultural inputs where safer alternatives are available.
5. Encourage ethical and ecological farming pilots, especially in vulnerable regions.
6. Begin dialogue on food justice as a peace, health, and ecological issue.

Objective:

To establish awareness, regulatory review, and minimum corrective action.

PHASE II — STRUCTURAL TRANSITION (5–15 YEARS)

States and international partners may progressively work toward:

1. Scaling safe, natural, and low-harm agriculture systems.
2. Reducing structural dependence on ecologically harmful inputs.
3. Integrating food quality with national health, environment, and development policies.
4. Establishing stronger anti-waste, anti-hoarding, and equitable distribution systems.
5. Expanding research into sustainable, non-violent, and biodiversity-friendly food systems.
6. Encouraging farmer-centered, community-centered, and ecosystem-sensitive models.

Objective:

To shift from reactive food control to long-term life-protective food governance.

PHASE III — CIVILIZATIONAL ALIGNMENT (15–50 YEARS)

The international community may progressively strive to:

1. Recognize food quality and food justice as foundational peace concerns.
2. Build global norms linking safe food, ecological continuity, and dignity of all beings.
3. Integrate non-violent food principles into education, research ethics, and public policy.
4. Move from exploitative food economies toward continuity-based food civilizations.
5. Advance intergenerational protection by safeguarding the long-term integrity of food systems.

Objective:

To establish a civilization where food sustains life without violence, degradation, or structural injustice.

GUIDING IMPLEMENTATION PRINCIPLES

This roadmap is guided by the following principles:

- Sovereign equality of States
- Voluntary participation
- Respect for diverse developmental contexts
- Scientific prudence
- Ecological sustainability
- Moral responsibility
- Protection of present and future generations

CONCLUSION

This Roadmap does not impose obligations.

It offers a phased path through which nations and institutions may, according to their own constitutional and policy frameworks, progressively align food systems with peace, health, dignity, and continuity.

True transformation is not achieved in a single moment.

It is achieved through principled transition, lawful adaptation, and sustained moral clarity.

ANNEXURE XVII

**PROPOSAL FOR A GLOBAL INSTITUTIONAL FRAMEWORK
ON FOOD JUSTICE, FOOD QUALITY, AND NON-VIOLENT FOOD
SYSTEMS**

This Annexure forms an integral part of the

*OFFICIAL INTERNATIONAL MORAL–LEGAL DECLARATION ON FOOD
JUSTICE, NON-VIOLENT FOOD SYSTEMS, AND THE PROTECTION OF
THE CONTINUITY OF ALL BEINGS.*

Its purpose is to propose a voluntary international institutional mechanism capable of facilitating dialogue, consultation, coordination, and policy evolution in relation to food justice and food integrity.

1. PROPOSED GLOBAL INSTITUTIONAL IDEA

It is respectfully proposed for international consultation that an appropriate multilateral framework may be considered under the United Nations system, or in cooperation with relevant international institutions, for the advancement of:

- Food justice
- Food quality and safety
- Non-violent food systems
- Ecological continuity in food production
- Ethical and life-protective food governance

A possible consultative designation may be:

Global Council / International Platform on Food Justice, Food Quality, and Non-Violent Food Systems

This is proposed solely as a voluntary institutional idea for international reflection.

2. POSSIBLE FUNCTIONS

Such a framework, if ever considered appropriate by the international community, may facilitate:

1. Dialogue among States on food quality, food ethics, and sustainability
2. Exchange of best practices on safe and low-harm food systems
3. Scientific consultation on food integrity, health, and environmental effects
4. Collaboration among FAO, WHO, UNEP, UNDP, ECOSOC, and other relevant bodies
5. Voluntary policy guidance on non-violent and life-protective food frameworks
6. Encouragement of food access and food quality as complementary global concerns

3. NORMATIVE BASIS

The proposed institutional framework would be consistent with:

- Charter of the United Nations
- Human rights principles related to food, health, and dignity
- Sustainable Development Goals
- Principles of peaceful cooperation
- Sovereignty-respecting multilateral engagement

It is not proposed as an enforcement body, but as a platform for constructive international cooperation.

4. NON-COERCIVE CHARACTER

This proposal:

- Creates no binding obligation
- Does not interfere with domestic governance
- Does not replace existing institutions
- Does not challenge sovereign equality of States

Its purpose is only to encourage greater coordination, consultation, and moral-political attention to food as a foundational peace issue.

5. POSSIBLE ROLE OF INDIA

In light of India's civilizational traditions of Ahimsa, Aram, and peaceful coexistence, and in view of Article 51(c) of the Constitution of India, India may contribute meaningfully to international reflection on food justice, ethical continuity, and non-violent food systems.

This is not proposed as a claim of domination, but as a contribution rooted in moral responsibility and peaceful civilizational dialogue.

6. INSTITUTIONAL VISION

The long-term vision of such a framework would be to help advance a world in which:

- Food is not weaponized
- Food is not degraded in quality for profit
- Food systems do not destroy ecosystems
- Hunger is reduced through just, safe, and ethical systems
- All beings are protected through continuity-based food governance

CONCLUSION

This Annexure respectfully proposes that the future of food governance may require not only national reform, but also an international institutional space where food quality, food justice, and non-violent continuity are discussed together.

A world that seeks peace must treat food not merely as a market subject, but as a matter of life, dignity, ecological continuity, and shared human responsibility.

ANNEXURE XVIII FORMAL REQUEST FOR GLOBAL CONSULTATION, ACKNOWLEDGEMENT, AND TRANSMISSION

This Annexure forms an integral and concluding part of the
*UNITED NATIONS DEPOSITORY EDITION – OFFICIAL INTERNATIONAL
MORAL–LEGAL DECLARATION ON FOOD JUSTICE, NON-VIOLENT
FOOD SYSTEMS, AND THE PROTECTION OF THE CONTINUITY OF ALL
BEINGS.*

Its purpose is to formally place on record a respectful, non-coercive, and globally oriented request for consideration, consultation, and appropriate transmission through constitutional and international channels.

1. FORMAL CONSTITUTIONAL REQUEST

In accordance with **Article 51(c) of the Constitution of India**, which promotes respect for international law, treaty obligations, and peaceful global cooperation, it is respectfully requested that:

This Declaration, together with all its Annexures, may be:

- Taken on official record
- Considered within the appropriate constitutional framework
- Transmitted, as deemed appropriate, through competent diplomatic and administrative channels

This request is made with full respect for constitutional processes, institutional dignity, and sovereign authority.

2. REQUEST FOR TRANSMISSION TO INTERNATIONAL BODIES

It is respectfully submitted that, subject to due consideration, this Declaration may be transmitted for awareness and consultation to:

- The Secretary-General of the United Nations
- The United Nations General Assembly
- The Economic and Social Council (ECOSOC)
- The Food and Agriculture Organization (FAO)
- The World Health Organization (WHO)
- The United Nations Environment Programme (UNEP)
- The United Nations Development Programme (UNDP)
- Relevant United Nations specialized agencies and affiliated bodies
- Member States of the United Nations

This transmission is sought not as a demand, but as a **peaceful and constructive contribution** to international dialogue.

3. REQUEST FOR GLOBAL CONSULTATION

The international community is respectfully invited to:

- Examine the concerns raised regarding food justice and food quality
- Consider the moral and ecological implications of current food systems
- Engage in dialogue, research, and policy reflection
- Explore voluntary pathways toward safer, non-violent, and sustainable food systems

This Declaration is presented as an **open framework**, intended for global consultation, refinement, and cooperative evolution.

4. NON-ADVERSARIAL AND NON-COERCIVE NATURE

This submission:

- Does not seek enforcement or mandatory adoption
- Does not accuse or attribute responsibility to any State or institution
- Does not interfere with sovereignty or domestic governance

It is:

- A moral–legal reflection
- A civilizational appeal
- A constructive international contribution

All participation remains voluntary and based on sovereign choice.

5. PURPOSE AND INTENT

The purpose of this Annexure and the Declaration as a whole is to:

- Elevate global awareness on food as a foundational issue of life and peace
- Encourage alignment of food systems with health, ecology, and dignity
- Contribute to the long-term continuity of all beings
- Support the evolution of ethical, sustainable, and non-violent global systems

6. FINAL AFFIRMATION

It is respectfully affirmed that:

The future of humanity and the continuity of all beings depend upon the integrity of food systems.

Food must remain:

- A source of life
- A foundation of dignity
- A pillar of peace
- A bridge of shared existence

This Declaration is submitted in humility, responsibility, and hope — that global cooperation, guided by law and moral clarity, will safeguard the future of all forms of existence.

“Let food sustain life.

Let law guide humanity.

And let Aram unite all existence.”

Guiding Principle:

“அறம் தான் உன்னையும் என்னையும் இணைத்தது”
(Aram is what united you and me)
