(For Submission under Article 51(c) of the Constitution of India)

To

His Excellency,

The President of the Republic of India

Rashtrapati Bhavan, New Delhi – 110004

India

Subject:

Humble Submission under Article 51(c) of the Constitution of India Seeking Transmission to the United Nations and Associated Bodies – “Global Petition for the Protection of the Arctic and the Continuity, Dignity, and Peace of All Living and Non-Living Beings”

Your Excellency,

With the deepest respect to the constitutional office of the President of the Republic of India, I humbly submit this representation under **Article 51(c) of the Constitution of India**, which mandates the State to promote international peace, justice, and respect for international law.

I respectfully place before Your Excellency the enclosed document titled:

“Global Petition for the Protection of the Arctic and the Continuity, Dignity, and Peace of All Living and Non-Living Beings”

This Petition is submitted as a **non-binding moral, ethical, and diplomatic representation**, intended to assist international dialogue and cooperative action, and to place on record India’s civilization commitment to peace, Aram (righteousness), Ahimsa (non-violence), and the continuity of all life forms.

The Arctic region, already severely impacted by climate change, is now facing increasing strategic competition, militarization, and ecological degradation. The irreversible harm to this fragile region poses a grave threat not only to Arctic

ecosystems and indigenous communities, but also to global climate stability and international peace.

For thousands of years, India (**Akanda Bharatham**) has stood as a moral civilization that has never sought domination or colonization, but has consistently upheld the protection of life, dignity, and balance. In this spirit, the enclosed Petition respectfully urges the international community, through appropriate United Nations mechanisms, to consider the recognition of the Arctic as a **Global Peace and Continuity Zone**, and to encourage restraint, cooperation, and peaceful use in accordance with international law.

I humbly request Your Excellency to be pleased to **cause this Petition to be transmitted through appropriate governmental channels**, including the **Ministry of External Affairs**, to the **United Nations and its relevant bodies**, for their kind consideration.

This submission is made in good faith, without prejudice to the sovereignty of any State, and solely in the interest of global peace, environmental preservation, inter-generational justice, and the dignity and continuity of all living and non-living beings.

I remain ever guided by the constitutional ideals of the Republic of India and place my full faith in the moral leadership of India in advancing peace in the international community.

Date: 19 December 2025

With the highest respect and humility,

Yours faithfully,

R NARASIMHAN Digitally signed by R NARASIMHAN

GLOBAL PETITION FOR THE PROTECTION OF THE ARCTIC AND THE CONTINUITY, DIGNITY, AND PEACE OF ALL LIVING AND NON-LIVING BEINGS

(With Scientific & Environmental Evidence Annex)

SUBMISSION AUTHORITY

Submitted under Article 51(c) of the Constitution of India

Through:

His Excellency,

The Hon'ble President of the Republic of India,

Rashtrapati Bhavan, New Delhi – 110004.

For Official Transmission to:

- The United Nations
- United Nations General Assembly
- United Nations Security Council
- United Nations Environment Programme (UNEP)
- UNESCO
- United Nations Development Programme (UNDP)
- Arctic Council
- International Maritime Organization (IMO)
- All Member States of the United Nations

LEGAL AND INTERNATIONAL BASIS

This Petition is respectfully submitted in accordance with:

- Article 51(c), Constitution of India
(Promotion of international peace, justice, and respect for international law)
- Charter of the United Nations:
 - Article 1 (Maintenance of international peace and security)
 - Article 2 (Peaceful relations among nations)
 - Articles 55 & 56 (International cooperation)
 - Article 99 (Discretionary authority of the Secretary-General)

- Universal Declaration of Human Rights (UDHR):
 - Article 1 (Human dignity)
 - Article 3 (Right to life, liberty, and security)
 - Article 28 (Right to an international order)
- International Covenant on Civil and Political Rights (ICCPR):
 - Article 6 (Right to life)
- United Nations Convention on the Law of the Sea (UNCLOS)
- Convention on Biological Diversity (CBD)
- Paris Agreement on Climate Change
- UN General Assembly Resolution 53/243
(Declaration and Program of Action on a Culture of Peace)
- UNESCO Declarations on Bioethics and the Ethics of Science and Technology

ALIGNMENT WITH UNITED NATIONS SUSTAINABLE DEVELOPMENT GOALS (SDGs)

This Petition aligns with the following United Nations Sustainable Development Goals:

- SDG 13 – Climate Action
- SDG 14 – Life Below Water
- SDG 15 – Life on Land
- SDG 16 – Peace, Justice, and Strong Institutions
- SDG 17 – Partnerships for the Goals

PREAMBLE

The universe has been formed with profound balance and beauty — from the smallest cell to the mightiest stone — sustaining every living and non-living entity in continuity and harmony.

Human intelligence was bestowed to protect life, not to destroy it. Yet today, humanity has diverted its intelligence toward violence, domination, and the disruption of continuity.

The five elements — Earth, Water, Fire, Air, and Space — have increasingly been transformed into instruments of commerce, conflict, and exploitation.

Human conflict has expanded across land, oceans, airspace, fire-based weaponry, and even microbial and technological domains.

This is not merely an environmental crisis. It is a collapse of Aram — righteousness, moral responsibility, and universal ethical order.

INTERGENERATIONAL AND PLANETARY TRUST

Recognizing that the Arctic constitutes an intergenerational trust of humanity, held not only for present populations but for future generations of all beings, and that irreversible damage to this region would constitute a permanent moral and ecological loss to the planetary commons.

STATEMENT OF GLOBAL CONCERN

Humanity now confronts a civilizational breakdown:

- War and militarization are normalized across multiple domains
- Living beings are destroyed for profit, power, and dominance
- Non-living elements are stripped of dignity and balance
- Climate systems are destabilized
- Evolutionary continuity of all beings is endangered
- Compassion is increasingly confined by artificial boundaries

Nowhere is this crisis more evident than in the Arctic region.

Already weakened by climate impacts largely attributable to human activity, the Arctic is now facing intensified strategic competition, resource extraction pressures, and growing military presence by major global powers.

The Arctic is also home to indigenous communities whose cultural survival, intergenerational rights, and traditional harmony with nature are increasingly endangered by militarization and unsustainable exploitation.

The Arctic is not an empty frontier.

It is a living and fragile sanctuary essential to planetary balance.

INDIA'S CIVILIZATIONAL RESPONSIBILITY

For thousands of years, India (**Akanda Bharatham**) has been guided by Aram and Ahimsa.

India has never pursued colonization, plunder, or domination. Its civilizational strength has consistently been exercised to protect life and uphold dignity.

Article 51(c) of the Constitution of India obligates the State to promote international peace, justice, and respect for international law.

Guided by this constitutional mandate, India carries a unique moral responsibility to advocate for the protection of the continuity, dignity, and peaceful existence of all living and non-living beings — including those inhabiting the Arctic region.

FORMAL PETITION AND REQUEST

I respectfully petition, through the Hon'ble President of India, that:

1. The United Nations give due consideration to recognizing the Arctic as a Global Peace and Continuity Zone, prioritizing environmental preservation and peaceful use.
2. All further escalation of militarization, aggressive strategic deployment and unsustainable resource exploitation in the Arctic region be restrained in accordance with international law.
3. The dignity, continuity, and peaceful existence of Arctic life forms — including polar bears, seals, marine species and fragile ecosystems — be acknowledged as integral to global peace and planetary stability.
4. India be supported by the international community to establish a Permanent Arctic Peace and Continuity Mission, operating strictly for:
 - Protection of life
 - Environmental conservation
 - Scientific cooperation
 - Peace assurance
 - Continuity of all beings
5. India's armed forces, recognized for ethical restraint, discipline and humanitarian conduct, be considered for deployment only in a peace-protection and non-militarized capacity, strictly under international law and an appropriate United Nations mandate.
6. The Secretary-General of the United Nations may, if deemed appropriate, consider this matter within the scope of Article 99 of the UN Charter, recognizing the Arctic situation as a matter with potential implications for international peace and security.

NON-BINDING NATURE AND GOOD-FAITH INTENT

This Petition is submitted as a non-binding moral, ethical, and diplomatic representation, intended to assist international dialogue, policy consideration, and cooperative action in good faith, without prejudice to the sovereignty of States or existing international legal frameworks.

DECLARATION

All beings possess dignity.

All beings experience existence and continuity.

No life is inferior.

Non-living forms also carry intrinsic moral value.

A world that abandons Aram risks self-destruction.

A world guided by Aram can still preserve peace and continuity.

India steps forward not to dominate, but to protect life.

HISTORICAL RECORD AND PUBLIC ARCHIVAL INTENT

This Petition is intended to serve as a public moral and diplomatic record of India's constitutional commitment under Article 51(c) of the Constitution of India, and is respectfully placed on record for present and future reference within international institutional memory.

ANNEX – I

SCIENTIFIC, ENVIRONMENTAL & HUMAN-CAUSED EVIDENCE

A. ARCTIC ICE AND CLIMATE IMPACTS

- Arctic warming is occurring at approximately three to four times the global average.
- Summer Arctic sea ice extent has declined by nearly forty percent since the late twentieth century.
- Permafrost thaw is releasing methane, posing significant planetary risk.
- International scientific assessments identify anthropogenic greenhouse gas emissions as the primary driver.

B. POLAR BEARS (*Ursus maritimus*)

- Global population estimated at approximately 26,000 individuals.
- Multiple sub-populations are documented to be in decline.
- Certain regions have recorded population reductions between 30–50 percent.
- Primary factors include sea ice loss, industrial disturbance, shipping activity, and regulated or illegal hunting.
- Conservation status: Vulnerable.

C. SEALS AND ICE-DEPENDENT SPECIES

- Arctic seal species rely on stable sea ice for breeding and survival.
- Ice loss has resulted in increased pup mortality and reproductive failure.
- Historical and ongoing commercial hunting has caused extensive population losses.

D. MARINE ECOSYSTEM DISRUPTION

- Arctic marine ecosystems face growing stress from overfishing, industrial shipping, and acoustic pollution.
- Disruption of fish migration threatens food chains and ecological balance.

E. MILITARIZATION AND STRATEGIC PRESSURES

- Expansion of military infrastructure and patrol activity by multiple global actors.
- Increased risk of instability in a region critical to global climate regulation.

- These trends challenge principles of peaceful use and environmental protection.

F. MICROBIOLOGICAL AND INVISIBLE IMPACTS

- Disturbance of Arctic microbial ecosystems increase the risk of releasing unknown pathogens.
- The Arctic functions as a planetary biological stabilizer; its disruption endangers all forms of life.

FINAL NOTE

The Arctic is not a resource depot.
It is not a battlefield.
It is a shared responsibility of humanity.

Protecting the Arctic is protecting the future of all beings.
