Through

His Excellency,

The Hon'ble President of the Republic of India,

Rashtrapati Bhavan

New Delhi – [110004](https://www.india.gov.in)

Republic of India

To

His Excellency

The Hon'ble Secretary-General

United Nations Headquarters

New York, United States of America

Copy To:

1. The President of the United Nations General Assembly
2. Permanent Representatives of United Nations Member States

3. Relevant United Nations Specialized Agencies, Programmes, Funds, Institutes, and Bodies

SUBJECT:

Respectful Submission of the "**International Petition for Ethical Science, Global Peace, Ecological Continuity, Responsible Artificial Intelligence, Intergenerational Responsibility, and the Establishment of a Global Aram Framework for Responsible Research**" (United Nations Depository Edition) – Reg.

Your Excellency,

Greetings.

I respectfully submit for consideration, public record, educational reference, and future international dialogue the accompanying document entitled:

"International Petition for Ethical Science, Global Peace, Ecological Continuity, Responsible Artificial Intelligence, Intergenerational Responsibility, and the Establishment of a Global Aram Framework for Responsible Research."

This submission is respectfully made under Article 51(c) and Article 51(d) of the Constitution of India, which encourage respect for international law, peaceful relations among nations, treaty obligations, and international cooperation.

The accompanying document is presented as a peaceful, non-binding, humanitarian, academic, ethical, constitutional, and public-policy contribution intended solely to encourage constructive international dialogue concerning.

The submission also acknowledges the relevance of the UNESCO Recommendation on the Ethics of Artificial Intelligence (2021) and other international efforts promoting responsible, human-centred, and peace-oriented technological development.

- Ethical Scientific Governance
- Responsible Artificial Intelligence
- Peace-Centered Research
- Environmental Continuity
- Human Dignity
- Intergenerational Responsibility
- International Cooperation
- Scientific Responsibility
- Global Continuity
- Sustainable Development

- Long-Term Civilizational Continuity
- Peaceful Technological Advancement

The Petition further proposes several voluntary international frameworks for consideration, including:

- Global Aram Framework
- Global Continuity Index (GCI)
- Global Aram Peace Mitran Meet (GAPMM)
- Global Aram Peace Village (GAPV)
- Global Charter for Peace-Centered Research
- Future Generations Declaration

The submission does not seek to impose obligations upon any State, institution, organization, university, scientific body, corporation, or individual. No coercive demand, hostile intent, political accusation, legal claim, interference with sovereignty, or adversarial objective is intended or implied.

The document fully respects:

- The Charter of the United Nations
- International Human Rights Law
- International Environmental Law
- International Humanitarian Law
- Scientific Freedom
- Democratic Governance
- Sovereign Equality of States
- Peaceful International Cooperation
- Existing International Treaty Frameworks

The objectives of this submission are also broadly consistent with the spirit of the United Nations Sustainable Development Goals (SDGs), particularly SDG 16 (Peace, Justice and Strong Institutions), SDG 17 (Partnerships for the Goals), SDG 13 (Climate Action), and SDG 15 (Life on Land).

The Petition is respectfully offered as a contribution to ongoing international discussions concerning the future relationship between science, ethics, peace, environmental stewardship, responsible innovation, technological governance, and humanity's shared future.

The central ethical principle proposed throughout the document is the concept of "Aram" (Moral Responsibility), respectfully presented as a voluntary universal ethical

invitation encouraging responsibility, dignity, peace, sustainability, cooperation, and continuity.

ANNEXURES INCLUDED

1. Annexure I
Civilizational Foundation of Aram
2. Annexure II
India's Historical Contribution to Peaceful Civilization
3. Annexure III
International Legal Basis and Compatibility Framework
4. Annexure IV
Ethical Risks of Uncontrolled Scientific Development
5. Annexure V
Global Aram Framework – Ten Universal Principles of Aram
6. Annexure VI
Global Continuity Index (GCI)
7. Annexure VII
Global Aram Peace Mithran Meet (GAPMM)
8. Annexure VIII
Global Aram Peace Village (GAPV)
9. Annexure IX
Future Generations Declaration
10. Annexure X
Final Global Aram Declaration
11. Annexure XI
Universal Ethical Traditions of Humanity
12. Annexure XII
Peaceful Science Success Stories and the Positive Contributions of International Scientific Cooperation
13. Annexure XIII
Rights and Responsibilities of Future Generations
14. Annexure XIV
Global Charter for Peace-Centered Research
15. Annexure XV
Global Declaration of Continuity
16. Annexure XVI
Implementation and Institutional Roadmap
17. Annexure XVII
Draft United Nations General Assembly Resolution Model

The accompanying Annexures collectively provide philosophical, historical, legal, ethical, scientific, environmental, technological, intergenerational, and policy-oriented foundations supporting the objectives of the Petition.

I would be grateful if this communication may be retained on record and made available for reference, consideration, educational purposes, and future international dialogue by relevant offices, agencies, institutions, researchers, policymakers, and stakeholders as deemed appropriate.

This communication is submitted in good faith, with respect for all nations, peoples, cultures, civilizations, institutions, and future generations, and with the sincere hope that humanity may continue advancing peace, responsibility, scientific integrity, environmental stewardship, cooperation, dignity, and continuity.

Please accept, Your Excellency, the assurances of my highest consideration.

With highest respect,

R Narasimhan also known as **Aaryan Narasimhan Radhakrishnan**

Date: 08th June 2026

Place: The Republic of India.

SUBMISSION AUTHORITY

Respectfully submitted through:

His Excellency,

The Hon'ble President of the Republic of India,

Rashtrapati Bhavan,

New Delhi – [110004](#),

Republic of India.

For Respectful Transmission To:

1. The Secretary-General of the United Nations
2. The President of the United Nations General Assembly
3. The Presidents and Executive Heads of Relevant United Nations Specialized Agencies
4. All United Nations Member States
5. Relevant International Scientific Institutions

6. Universities and Research Organizations
7. Civil Society Organizations
8. Future Generations

PREAMBLE

Recognizing the purposes and principles of the Charter of the United Nations, particularly the maintenance of international peace and security, the peaceful settlement of disputes, respect for international law, and cooperation among nations for the advancement of humanity;

Recalling the Universal Declaration of Human Rights (1948), the International Covenant on Civil and Political Rights (1966), the International Covenant on Economic, Social and Cultural Rights (1966), the Convention on Biological Diversity (1992), the United Nations Framework Convention on Climate Change (1992), the Paris Agreement (2015), the UNESCO Recommendation on the Ethics of Artificial Intelligence (2021), and other relevant international instruments;

Recognizing that science has contributed immeasurably to human progress, health, communication, education, environmental understanding, disaster prevention, food production, and international cooperation;

Recognizing further that scientific and technological advances may also generate significant risks when applied in ways that contribute to armed conflict, ecological degradation, mass destruction, uncontrolled surveillance, environmental harm, technological inequality, or threats to future generations;

Affirming that peace, dignity, continuity, responsibility, and coexistence are fundamental values that should guide humanity's scientific and technological development;

Recognizing that scientific advancement should serve not only present generations but also future generations and the long-term continuity of life and ecological systems;

Recognizing that scientific freedom remains essential to human progress and that responsible ethical oversight should strengthen, rather than suppress, legitimate scientific inquiry;

Acknowledging that all living beings and natural systems possess intrinsic value within the broader continuity of planetary existence;

Recalling that humanity increasingly possesses technologies capable of producing consequences extending beyond national borders and affecting future generations on a global scale;

Recognizing the growing importance of ethical governance frameworks concerning artificial intelligence, biotechnology, autonomous systems, environmental engineering, and other emerging technologies;

Affirming that transparency, accountability, responsibility, peaceful cooperation, and public trust are essential foundations for scientific legitimacy;

The undersigned respectfully submits the following recommendations for dialogue, consideration, voluntary cooperation, and future international reflection.

GUIDING PRINCIPLE

"Aram is what united you and me."

The principle of Aram (**Moral Righteousness**) is respectfully proposed as a universal ethical foundation encouraging peace, responsibility, dignity, coexistence, and continuity for present and future generations.

NON-BINDING CHARACTER OF THIS PETITION

This petition is entirely peaceful, non-binding, advisory, and voluntary in nature.

Nothing contained herein shall be interpreted as creating legal obligations upon any State, international organization, scientific institution, university, corporation, or individual.

This petition is respectfully submitted solely for international dialogue, ethical reflection, peaceful cooperation, public record, and future consideration.

ARTICLE I

PRINCIPLE OF ARAM-BASED ETHICAL SCIENCE

1. Scientific research and technological innovation should be guided not only by technical capability and economic advancement but also by ethical responsibility, human dignity, ecological sustainability, peaceful coexistence, transparency, accountability, and intergenerational continuity.
2. The principle of Aram (Moral Righteousness) is respectfully proposed as a universal ethical framework encouraging responsible scientific conduct for the benefit of present and future generations.
3. Scientific advancement should seek to maximize peace, wellbeing, dignity, and continuity while minimizing unnecessary harm, suffering, ecological disruption, and risks to future generations.

4. Member States, scientific institutions, universities, and research organizations are respectfully encouraged to promote ethical reflection alongside scientific excellence.

5. Scientific success should not be measured solely by technological achievement but also by its contribution to peace, sustainability, responsibility, and long-term continuity.

ARTICLE II

GLOBAL ETHICAL REVIEW OF HIGH-RISK RESEARCH

1. The international community is respectfully encouraged to strengthen dialogue concerning scientific activities that may create substantial risks to humanity, biodiversity, ecological systems, or international peace.

2. Member States may voluntarily consider enhancing ethical review mechanisms concerning:

- Autonomous weapons systems
- Artificial intelligence employed for military purposes
- Advanced biological and genetic research with significant transboundary implications
- Environmental modification technologies
- Research capable of causing large-scale ecological disruption
- High-risk emerging technologies with global consequences
- Technologies affecting critical planetary systems

3. Ethical review should seek to complement scientific progress while reducing foreseeable risks to humanity and future generations.

4. Nothing contained in this Article shall be interpreted as restricting legitimate scientific inquiry conducted in accordance with applicable national and international law.

ARTICLE III

PROTECTION OF SCIENTIFIC FREEDOM

1. Scientific freedom remains a fundamental pillar of human progress, innovation, education, and international cooperation.

2. Ethical oversight should strengthen public trust in science rather than impede legitimate scientific advancement.

3. Scientific freedom and ethical responsibility should be viewed as complementary principles rather than competing objectives.
4. Researchers should be encouraged to pursue scientific inquiry freely while maintaining appropriate standards of responsibility, transparency, and accountability.
5. The purpose of this petition is not to restrict scientific knowledge but to promote its peaceful, responsible, and sustainable application.

ARTICLE IV

ETHICAL GOVERNANCE OF ARTIFICIAL INTELLIGENCE

1. Recognizing the growing impact of Artificial Intelligence upon humanity, governance systems, economies, and future generations, Member States are respectfully encouraged to promote ethical frameworks consistent with international human rights standards.
2. In accordance with the UNESCO Recommendation on the Ethics of Artificial Intelligence (2021), AI systems should be guided by principles including:
 - Human dignity
 - Transparency
 - Accountability
 - Human oversight
 - Non-discrimination
 - Safety and security
 - Peaceful applications
 - Environmental responsibility
3. Artificial Intelligence should be developed and deployed in ways that contribute to peace, human wellbeing, ecological sustainability, and international cooperation.
4. The international community may consider expanding cooperation regarding the governance of advanced AI systems capable of producing significant societal impacts.
5. AI should remain a tool serving humanity rather than contributing to conflict, instability, or large-scale harm.

ARTICLE V

PROMOTION OF SCIENTIFIC TRANSPARENCY

1. Transparency strengthens public confidence in scientific institutions and contributes to international trust-building.
2. Without prejudice to legitimate national security considerations, Member States are respectfully encouraged to expand public communication concerning:
 - Ethical objectives of major research programs
 - Societal benefits of scientific initiatives
 - Environmental implications of scientific activities
 - Risk mitigation frameworks
 - Public accountability mechanisms
3. Greater transparency may contribute to international cooperation, confidence-building, and peaceful relations among nations.
4. Scientific transparency should seek to balance public accountability, legitimate confidentiality requirements, intellectual property rights, and national security considerations.
5. Transparency is respectfully proposed as a foundational element of responsible scientific governance.

"Aram is what united you and me."

ARTICLE VI

GLOBAL ARAM PEACE DIALOGUE FOR SCIENCE

1. The United Nations, Member States, scientific institutions, universities, civil society organizations, and other relevant stakeholders are respectfully invited to explore the establishment of a voluntary annual Global Aram Peace Dialogue for Science.
2. The purpose of such dialogue shall be to promote international cooperation concerning:
 - Ethical scientific advancement
 - Peace-centered innovation
 - Environmental continuity
 - Responsible artificial intelligence

- Intergenerational responsibility
- Global risk reduction
- Humanitarian technological development

3. The dialogue may serve as a platform for the peaceful exchange of ideas, experiences, best practices, and ethical perspectives regarding emerging scientific and technological developments.

4. Participation shall remain entirely voluntary and consistent with the sovereign equality of all States as recognized under the Charter of the United Nations.

5. The dialogue should seek to strengthen trust, cooperation, transparency, and peaceful engagement among nations.

ARTICLE VII

GLOBAL ARAM PEACE MITHRAN MEET (GAPMM)

1. The international community is respectfully invited to consider the creation of a voluntary annual **Global Aram Peace Mithran Meet (GAPMM)**.

2. The GAPMM may bring together:

- Heads of State and Government
- United Nations representatives
- Scientists
- Ethicists
- Indigenous knowledge holders
- Academic institutions
- Civil society organizations
- Youth representatives
- International peace advocates

3. The objectives of the GAPMM may include:

- Promoting mutual understanding among nations
- Reducing mistrust and geopolitical tensions
- Encouraging peaceful dialogue regarding emerging technologies
- Advancing ethical scientific cooperation

- Supporting environmental continuity
- Strengthening long-term international peace

4. Direct **face-to-face** engagement among leaders and stakeholders may contribute to greater understanding, confidence-building, and peaceful international relations.

5. The GAPMM is respectfully proposed as a forum of friendship, cooperation, dialogue, and shared responsibility for the future of humanity and the planet.

ARTICLE VIII

GLOBAL CONTINUITY INDEX (GCI)

1. Recognizing the importance of measurable progress toward peace, sustainability, and ethical governance, the international community is respectfully invited to consider the development of a voluntary Global Continuity Index (GCI).

2. The GCI may seek to evaluate progress concerning:

- Peace and conflict reduction
- Environmental sustainability
- Biodiversity protection
- Ethical technology governance
- Scientific responsibility
- Human dignity
- Public wellbeing
- Intergenerational continuity
- International cooperation

3. The GCI should be educational, analytical, voluntary, and non-punitive in character.

4. The purpose of the GCI shall be to encourage constructive reflection and continuous improvement rather than ranking nations for political purposes.

5. The GCI may assist policymakers, researchers, international organizations, and civil society in assessing long-term continuity indicators relevant to humanity and the planet.

ARTICLE IX

ANNUAL GLOBAL ETHICAL SCIENCE REPORT

1. Member States may voluntarily consider publishing annual public reports concerning ethical safeguards applied to major scientific and technological research initiatives.
2. Such reports may include:
 - Ethical review mechanisms
 - Environmental safeguards
 - Human rights considerations
 - Artificial intelligence governance measures
 - Public accountability initiatives
 - Long-term sustainability assessments
3. The publication of such reports may contribute to greater public trust, international cooperation, and transparency.
4. The purpose of this recommendation is not to impose obligations but to encourage voluntary confidence-building measures among nations.
5. The international community is respectfully encouraged to explore opportunities for sharing best practices concerning ethical scientific governance.

ARTICLE X

INDIA AS A POTENTIAL HOST OF A GLOBAL ARAM PEACE VILLAGE

1. Recognizing India's historical contributions to peace, non-violence, coexistence, moral philosophy, democratic governance, and international cooperation, the Republic of India may voluntarily consider exploring the establishment of a **Global Aram Peace Village**.
2. Such a platform may serve as an international venue dedicated to:
 - Peaceful dialogue
 - Ethical scientific reflection
 - Environmental responsibility
 - Artificial intelligence ethics
 - International cooperation

- Intergenerational continuity
- Cultural understanding

3. The proposed **Aram Peace Village** may provide opportunities for regular dialogue among world leaders, scientists, ethicists, youth representatives, and civil society participants.

4. Participation shall remain voluntary and fully respectful of the sovereignty, equality, and independence of all nations.

5. This proposal is entirely non-binding and subject to the sovereign decisions of India and the international community.

6. The Aram Peace Village is respectfully envisioned as a symbol of dialogue, friendship, responsibility, continuity, and peace for present and future generations.

"Aram is what united you and me."

FINAL APPEAL, IMPLEMENTATION FRAMEWORK, INTERNATIONAL LEGAL COMPATIBILITY DECLARATION AND CONCLUSION

ARTICLE XI

VOLUNTARY IMPLEMENTATION FRAMEWORK

1. The recommendations contained within this Petition are respectfully proposed as voluntary measures intended to stimulate dialogue, ethical reflection, international cooperation, and peaceful scientific advancement.

2. Interested Member States, international organizations, universities, research institutions, and civil society organizations may voluntarily explore opportunities for cooperation concerning:

- Ethical scientific governance
- Artificial intelligence responsibility
- Environmental continuity
- Peace-centered innovation
- Intergenerational responsibility
- International confidence-building measures

3. Nothing in this Petition shall be interpreted as diminishing the sovereign rights, responsibilities, or constitutional structures of any State.

4. The implementation of any recommendation contained herein shall remain entirely subject to applicable national laws, international obligations, institutional mandates, and voluntary participation.

ARTICLE XII

INTERNATIONAL LEGAL COMPATIBILITY DECLARATION

1. This Petition is respectfully submitted in full recognition of:

- The Charter of the United Nations
- International Human Rights Law
- International Humanitarian Law
- International Environmental Law
- International Scientific Cooperation Frameworks
- The Sovereign Equality of States

2. This Petition does not seek to alter, override, amend, or diminish any existing international legal instrument.

3. The recommendations contained herein are intended solely to complement existing international efforts promoting peace, sustainability, ethical responsibility, and international cooperation.

4. This Petition fully respects the independence, sovereignty, territorial integrity, constitutional systems, and lawful governance structures of all States.

ARTICLE XIII

FUTURE GENERATIONS DECLARATION

1. Humanity possesses a shared responsibility toward future generations.

2. Scientific advancement should be evaluated not only according to present-day benefits but also according to its potential long-term impacts upon:

- Human civilization
- Ecological systems
- Biodiversity
- International peace
- Future generations

3. The international community is respectfully encouraged to strengthen ethical reflection concerning the long-term consequences of scientific and technological activities.

4. Future generations should inherit a world characterized by peace, dignity, responsibility, sustainability, and cooperation.

ARTICLE XIV

GLOBAL RESPONSIBILITY FOR PEACEFUL KNOWLEDGE

1. Knowledge represents one of humanity's greatest achievements.

2. Scientific knowledge should be applied in ways that contribute to:

- Peace
- Human wellbeing
- Ecological continuity
- International cooperation
- Responsible innovation

3. The international community is respectfully encouraged to continue promoting scientific advancement that reduces suffering, prevents conflict, strengthens understanding, and contributes to the flourishing of life.

4. The ultimate purpose of knowledge should be the advancement of peace, responsibility, dignity, and continuity.

FINAL APPEAL

The undersigned respectfully calls upon:

- The United Nations
- The United Nations General Assembly
- The Secretary-General of the United Nations
- United Nations Specialized Agencies
- All United Nations Member States
- International Scientific Institutions
- Universities and Research Organizations
- Civil Society Organizations

- Youth Representatives
- Future Generations

to consider promoting scientific advancement that serves:

Peace rather than conflict,

Continuity rather than destruction,

Responsibility rather than recklessness,

Cooperation rather than hostility,

And dignity rather than exploitation.

Let science remain a force for peace.

Let knowledge be guided by wisdom.

Let innovation be guided by responsibility.

Let humanity be guided by Aram.

FINAL DECLARATION

This Petition is respectfully submitted as a peaceful, non-binding, constitutional, humanitarian, academic, ethical, and public-policy contribution intended solely for:

- International dialogue
- Ethical reflection
- Scientific responsibility
- Environmental continuity
- Public record
- Peaceful cooperation
- Future consideration

No coercive demand, hostile intent, legal accusation, political hostility, or unlawful claim is made herein.

This Petition is submitted in good faith and in the spirit of peace, friendship, international cooperation, and respect for all peoples and nations.

"Aram is what united you and me."

May peace guide knowledge.

May responsibility guide innovation.

May continuity guide civilization.

May dignity guide humanity.

Respectfully Submitted By

R Narasimhan also known as **Aaryan Narasimhan Radhakrishnan**

Guiding Humanitarian Principle:

“அறம் தான் உன்னையும் என்னையும் இணைத்தது”

(Aram is what united you and me)

Presented solely as a peaceful humanitarian ethic of moral responsibility, ecological continuity, non-violent coexistence, and international understanding.

ANNEXURE – I

CIVILIZATIONAL FOUNDATION OF ARAM

(Philosophical and Ethical Basis for the Global Aram Framework)

PURPOSE

This Annexure provides the philosophical, ethical, and civilizational foundation supporting the principles contained within the International Petition for Ethical Science, Global Peace, Ecological Continuity, and the Establishment of a Global Aram Framework for Responsible Research.

INTRODUCTION

Throughout human history, civilizations have sought principles capable of guiding humanity toward peace, justice, dignity, and responsible coexistence.

Among the enduring ethical traditions of the world is the concept of “Aram,” a classical Tamil moral principle emphasizing righteousness, responsibility, compassion, justice, peaceful conduct, and respect for life.

The principle of Aram is not presented as a religious doctrine, political ideology, or legal obligation.

Rather, it is respectfully proposed as a universal ethical framework capable of complementing contemporary international efforts concerning peace, sustainability, scientific responsibility, environmental stewardship, and human dignity.

THE MEANING OF ARAM

Aram may be understood as:

- Moral responsibility
- Ethical conduct
- Compassion toward living beings
- Respect for dignity
- Commitment to justice
- Peaceful coexistence
- Responsible use of power
- Protection of future generations
- Preservation of continuity

Aram encourages individuals, institutions, governments, and societies to act with awareness of the consequences of their actions upon others.

ARAM AND HUMAN CIVILIZATION

Human civilization advances not merely through power, wealth, or technological capability, but through the ethical principles that guide the use of such capabilities.

Scientific knowledge without responsibility may create risk.

Technological power without ethical reflection may create instability.

Economic advancement without sustainability may create environmental degradation.

Aram therefore proposes that progress should be accompanied by responsibility.

ARAM AND PEACE

Peace is not merely the absence of conflict.

Peace also includes:

- Mutual respect
- Human dignity
- Social trust
- Environmental stability
- International cooperation
- Intergenerational responsibility

The principle of Aram encourages peaceful solutions, dialogue, understanding, and coexistence among individuals, communities, nations, and future generations.

ARAM AND SCIENTIFIC RESPONSIBILITY

Scientific progress has greatly benefited humanity.

At the same time, history demonstrates that scientific discoveries may produce unintended consequences when applied without sufficient ethical oversight.

Aram therefore encourages:

- Responsible innovation
- Ethical reflection
- Transparency
- Accountability

- Long-term thinking
- Peaceful applications of science

The objective is not to restrict science, but to strengthen public trust and ensure that scientific progress contributes positively to humanity and the planet.

ARAM AND ECOLOGICAL CONTINUITY

Human wellbeing depends upon healthy ecosystems, biodiversity, clean air, water, soil, and stable climatic conditions.

Aram recognizes that environmental stewardship is not merely a technical responsibility but also a moral responsibility.

Future generations inherit the consequences of present decisions.

Therefore, ecological continuity forms an essential component of responsible governance.

ARAM AND FUTURE GENERATIONS

Every generation possesses obligations not only to itself but also to those who will inherit the future.

Aram encourages decision-making that considers:

- Long-term consequences
- Sustainability
- Human dignity
- Ecological continuity
- Peaceful coexistence

The interests of future generations should be respected alongside present needs.

CONCLUDING OBSERVATION

The principle of Aram respectfully seeks to encourage a civilization guided by responsibility rather than recklessness, cooperation rather than hostility, continuity rather than destruction, and peace rather than conflict.

In this spirit, Aram is respectfully presented as a complementary ethical foundation supporting international dialogue concerning science, technology, peace, sustainability, and humanity's shared future.

GUIDING AFFIRMATION

"Aram is what united you and me."

ANNEXURE – II

INDIA'S HISTORICAL CONTRIBUTION TO PEACEFUL CIVILIZATION

(Historical Foundations Supporting the Global Aram Framework)

PURPOSE

This Annexure highlights selected historical, philosophical, ethical, and civilizational contributions originating from the Republic of India and the Indian subcontinent that have promoted peace, non-violence, moral responsibility, human dignity, coexistence, and international harmony.

The purpose of this Annexure is not to assert superiority over any nation or civilization.

Rather, it respectfully acknowledges contributions that may support contemporary international dialogue concerning peace, ethics, sustainability, scientific responsibility, and global cooperation.

INTRODUCTION

Throughout history, civilizations have contributed valuable ideas to humanity's collective development.

India has historically contributed a range of ethical, philosophical, spiritual, scientific, and humanitarian traditions that continue to influence global discussions concerning peace, coexistence, responsibility, and human dignity.

These traditions provide important perspectives relevant to the objectives of the Global Aram Framework.

THE PRINCIPLE OF AHIMSA

One of India's most widely recognized contributions is the principle of Ahimsa (Non-Violence).

Ahimsa encourages:

- Respect for life

- Peaceful conduct
- Restraint from unnecessary harm
- Compassion toward living beings
- Resolution of disputes through peaceful means

The principle has influenced moral philosophy, civil society movements, peace initiatives, and international discussions concerning human rights and conflict resolution.

THE CONTRIBUTION OF LORD BUDDHA

The teachings associated with Siddhartha Gautama (the Buddha) emphasized:

- Compassion
- Mindfulness
- Peaceful conduct
- Reduction of suffering
- Ethical responsibility

The global influence of these principles has contributed to peace-oriented traditions across many regions of the world.

THE CONTRIBUTION OF MAHAVIRA

The teachings associated with Mahavira emphasized:

- Non-violence
- Ethical discipline
- Respect for life
- Personal responsibility
- Peaceful coexistence

These principles continue to influence ethical thought concerning responsibility toward living beings and the environment.

EMPEROR ASHOKA AND MORAL GOVERNANCE

Following the Kalinga War, Emperor Ashoka embraced principles of peace, tolerance, ethical governance, and humanitarian responsibility.

Historical records indicate efforts to promote:

- Religious tolerance
- Compassion
- Welfare measures
- Peaceful governance
- International cultural exchange

Ashoka's example remains significant in discussions concerning ethical leadership and peaceful statecraft.

THIRUVALLUVAR AND THE THIRUKKURAL

Among the most influential ethical works originating from India is the Tirukkural.

The Tirukkural addresses:

- Virtue (Aram)
- Responsible governance
- Justice
- Ethical conduct
- Social responsibility
- Human dignity

The work continues to provide valuable ethical insights relevant to contemporary discussions concerning governance, responsibility, and peaceful coexistence.

MAHATMA GANDHI AND NON-VIOLENT SOCIAL CHANGE

Mahatma Gandhi demonstrated the practical application of non-violence as a tool for social and political transformation.

His emphasis upon:

- Peaceful resistance
- Human dignity
- Moral courage
- Dialogue
- Ethical responsibility

continues to influence movements promoting human rights, social justice, and peaceful change worldwide.

VASUDHAIVA KUTUMBAKAM

The concept of Vasudhaiva Kutumbakam is commonly interpreted as:

"The world is one family."

This principle encourages:

- Global cooperation
- Mutual respect
- Shared responsibility
- International friendship
- Human solidarity

Its spirit aligns with many contemporary international efforts promoting peace and cooperation among nations.

INDIA AND DEMOCRATIC CONTINUITY

As the world's largest democracy, India has demonstrated the possibility of maintaining democratic institutions across a highly diverse society.

This experience contributes valuable lessons concerning:

- Democratic participation
- Constitutional governance
- Cultural pluralism
- Peaceful political processes
- Respect for diversity

RELEVANCE TO THE GLOBAL ARAM FRAMEWORK

The historical principles discussed in this Annexure support several objectives of the Global Aram Framework, including:

- Peace-centered governance
- Ethical responsibility
- Scientific accountability
- Environmental stewardship
- Human dignity

- International cooperation
- Intergenerational continuity

The purpose of referencing these traditions is to encourage constructive international dialogue rather than promote any single cultural model.

CONCLUDING OBSERVATION

The future of humanity will be shaped not only by technological capability but also by the ethical principles guiding its use.

India's historical contributions concerning non-violence, moral responsibility, coexistence, and peaceful governance may provide valuable perspectives supporting international efforts toward peace, sustainability, and continuity.

GUIDING AFFIRMATION

"Aram is what united you and me."

ANNEXURE – III

INTERNATIONAL LEGAL BASIS AND COMPATIBILITY FRAMEWORK

(Legal Foundations Supporting the Global Aram Framework)

PURPOSE

This Annexure identifies selected international legal instruments, principles, declarations, and frameworks that are relevant to the objectives of the International Petition for Ethical Science, Global Peace, Ecological Continuity, Responsible Artificial Intelligence, and the Establishment of a Global Aram Framework for Responsible Research.

This Annexure is intended solely to demonstrate legal compatibility and shall not be interpreted as creating new legal obligations.

I. CHARTER OF THE UNITED NATIONS

The Charter of the United Nations remains the foundational legal instrument governing international peace and cooperation.

Relevant provisions include:

Article 1

The purposes of the United Nations include:

- Maintaining international peace and security
- Developing friendly relations among nations
- Achieving international cooperation in solving international problems
- Promoting respect for human rights and fundamental freedoms

Article 2

The Organization is founded upon:

- Sovereign equality of all Member States
- Peaceful settlement of disputes
- Respect for international law

The Global Aram Framework seeks to support these objectives through ethical scientific cooperation and peace-centered governance.

II. UNIVERSAL DECLARATION OF HUMAN RIGHTS (1948)

The Universal Declaration of Human Rights establishes universal principles concerning dignity, equality, and human rights.

Relevant provisions include:

Article 1

"All human beings are born free and equal in dignity and rights."

Article 3

"Everyone has the right to life, liberty and security of person."

Article 28

Everyone is entitled to a social and international order in which the rights and freedoms set forth in the Declaration can be fully realized.

The Global Aram Framework seeks to strengthen conditions supporting human dignity, peace, and responsible governance.

III. INTERNATIONAL COVENANT ON CIVIL AND POLITICAL RIGHTS (ICCPR)

The ICCPR establishes protections concerning:

- Human dignity

- Personal security
- Freedom of thought
- Freedom of expression
- Political participation

The promotion of peaceful scientific development and responsible technological governance may contribute to the protection of these principles.

IV. INTERNATIONAL COVENANT ON ECONOMIC, SOCIAL AND CULTURAL RIGHTS (ICESCR)

The ICESCR recognizes:

- The right to health
- The right to education
- The right to scientific progress
- The right to an adequate standard of living

The Global Aram Framework seeks to encourage scientific advancement that benefits humanity while minimizing foreseeable risks.

V. CONVENTION ON BIOLOGICAL DIVERSITY (CBD)

The Convention on Biological Diversity recognizes:

- Conservation of biodiversity
- Sustainable use of biological resources
- Fair and equitable sharing of benefits

The protection of biodiversity and ecological continuity represents a central objective of the Global Aram Framework.

VI. UNITED NATIONS FRAMEWORK CONVENTION ON CLIMATE CHANGE (UNFCCC)

The UNFCCC recognizes the importance of protecting the climate system for present and future generations.

The Global Aram Framework supports:

- Environmental responsibility
- Long-term sustainability

- Climate-conscious scientific development

VII. PARIS AGREEMENT (2015)

The Paris Agreement emphasizes:

- Long-term climate resilience
- Sustainable development
- Intergenerational responsibility

The principle of continuity contained within the Global Aram Framework aligns with these objectives.

VIII. UNESCO RECOMMENDATION ON THE ETHICS OF ARTIFICIAL INTELLIGENCE (2021)

The UNESCO Recommendation encourages:

- Human dignity
- Transparency
- Accountability
- Human oversight
- Environmental sustainability
- International cooperation

The Global Aram Framework adopts these principles as guiding considerations for responsible AI governance.

IX. UNITED NATIONS SUSTAINABLE DEVELOPMENT GOALS (SDGs)

The Global Aram Framework supports several Sustainable Development Goals, including:

SDG 3 – Good Health and Well-Being

SDG 4 – Quality Education

SDG 9 – Industry, Innovation and Infrastructure

SDG 13 – Climate Action

SDG 15 – Life on Land

SDG 16 – Peace, Justice and Strong Institutions

SDG 17 – Partnerships for the Goals

X. FUTURE GENERATIONS AND EMERGING INTERNATIONAL PRACTICE

Contemporary international discussions increasingly recognize the importance of considering:

- Future generations
- Long-term sustainability
- Responsible technological development
- Global risk reduction
- Environmental stewardship

The Global Aram Framework seeks to contribute constructively to these emerging areas of international dialogue.

LEGAL COMPATIBILITY DECLARATION

The Global Aram Framework:

- Respects the sovereignty of all States
- Respects the Charter of the United Nations
- Respects international human rights law
- Respects international environmental law
- Respects scientific freedom
- Respects democratic governance
- Respects peaceful international cooperation

Nothing contained within this Petition shall be interpreted as:

- Creating binding legal obligations
- Altering existing international law
- Restricting legitimate scientific inquiry
- Interfering with the sovereign authority of States

The Petition is submitted solely as a peaceful, non-binding, humanitarian, ethical, and public-policy contribution.

CONCLUDING OBSERVATION

The Global Aram Framework seeks to complement—not replace—existing international legal and institutional efforts promoting peace, responsibility, sustainability, scientific progress, and human dignity.

Its purpose is to encourage constructive dialogue concerning the ethical foundations of humanity's scientific and technological future.

GUIDING AFFIRMATION

"Aram is what united you and me."

ANNEXURE – IV

ETHICAL RISKS OF UNCONTROLLED SCIENTIFIC DEVELOPMENT

(Historical, Humanitarian, Environmental, and Technological Considerations)

PURPOSE

This Annexure identifies selected historical, humanitarian, environmental, technological, and ethical concerns associated with scientific and technological developments that have produced unintended or harmful consequences.

The purpose of this Annexure is not to oppose science, innovation, or technological advancement.

Rather, it seeks to encourage responsible scientific development guided by ethical reflection, transparency, accountability, and peaceful objectives.

INTRODUCTION

Science has transformed human civilization.

Scientific discoveries have improved health, communication, education, transportation, agriculture, and environmental understanding.

At the same time, history demonstrates that scientific knowledge may generate serious risks when applied without sufficient ethical safeguards, humanitarian considerations, or long-term responsibility.

This Annexure highlights selected examples illustrating the importance of ethical governance.

I. NUCLEAR WEAPONS AND EXISTENTIAL RISK

The development of nuclear weapons represents one of the most significant examples of scientific advancement producing both technological achievement and existential risk.

Potential consequences include:

- Mass civilian casualties
- Long-term environmental contamination
- Humanitarian crises
- Intergenerational health impacts
- Global security instability

The continued existence of nuclear arsenals demonstrates the importance of ethical reflection concerning scientific capabilities.

II. CHEMICAL AND BIOLOGICAL WEAPONS

Scientific knowledge has occasionally been applied toward the development of chemical and biological weapons.

Historical experience demonstrates the potential for:

- Human suffering
- Public health emergencies
- Environmental harm
- Violations of humanitarian principles

These experiences highlight the importance of maintaining strong ethical safeguards.

III. ENVIRONMENTAL DEGRADATION

Industrial and technological development has contributed significantly to economic progress.

However, certain activities have also contributed to:

- Climate change
- Biodiversity loss
- Deforestation
- Pollution

- Soil degradation
- Freshwater contamination

Scientific and technological advancement should therefore be accompanied by environmental responsibility.

IV. AUTONOMOUS WEAPONS SYSTEMS

Rapid advances in artificial intelligence and automation have generated discussions concerning autonomous weapons systems.

Ethical concerns include:

- Reduced human oversight
- Accountability challenges
- Escalation risks
- Civilian protection concerns

The international community continues to examine these issues through ongoing dialogue and legal review.

V. MASS SURVEILLANCE TECHNOLOGIES

Advances in digital technologies have increased the capacity for large-scale monitoring and surveillance.

While such technologies may provide legitimate security benefits, concerns may arise regarding:

- Privacy
- Human rights
- Accountability
- Democratic oversight

Responsible governance remains essential.

VI. ARTIFICIAL INTELLIGENCE RISKS

Artificial Intelligence presents significant opportunities for humanity.

Potential benefits include:

- Medical research
- Education

- Environmental monitoring
- Disaster response
- Scientific discovery

At the same time, advanced AI systems may generate concerns regarding:

- Bias
- Lack of transparency
- Misuse
- Security risks
- Social disruption

Ethical governance and human oversight remain important considerations.

VII. EMERGING BIOTECHNOLOGIES

Advances in biotechnology and genetic research possess enormous potential for improving health and wellbeing.

However, responsible governance remains necessary concerning:

- Biosecurity
- Ethical review
- Long-term impacts
- Human dignity
- Environmental consequences

Scientific progress should be accompanied by ethical safeguards.

VIII. SHORT-TERM INCENTIVES VS LONG-TERM CONSEQUENCES

Scientific and technological initiatives may sometimes prioritize short-term gains while overlooking long-term consequences.

Examples may include:

- Environmental degradation
- Resource depletion
- Social instability
- Ecological disruption

Responsible governance requires long-term thinking.

IX. FUTURE GENERATIONS

Future generations cannot directly participate in present-day decision-making.

Yet they may inherit:

- Environmental consequences
- Technological risks
- Benefits of innovation
- Institutional decisions

Ethical governance should therefore consider the interests of future generations.

X. THE NEED FOR ETHICAL SCIENTIFIC GOVERNANCE

The examples described in this Annexure do not diminish the importance of science.

Rather, they demonstrate the importance of ensuring that scientific advancement remains guided by:

- Responsibility
- Accountability
- Transparency
- Human dignity
- Environmental stewardship
- Peaceful objectives

The objective is not to restrict knowledge.

The objective is to ensure that knowledge contributes to continuity rather than destruction.

CONCLUDING OBSERVATION

History demonstrates that scientific capability alone does not guarantee wisdom.

Technological power alone does not guarantee responsibility.

Progress requires both knowledge and ethical reflection.

The Global Aram Framework therefore respectfully proposes that scientific advancement should be guided by responsibility, peace, dignity, continuity, and international cooperation.

GUIDING AFFIRMATION

Science without responsibility may create risk.

Power without ethics may create instability.

Knowledge guided by Aram may contribute to peace, continuity, and human flourishing.

"Aram is what united you and me."

ANNEXURE – V

GLOBAL ARAM FRAMEWORK: TEN UNIVERSAL PRINCIPLES OF ARAM

(Ethical Foundations for Peace, Scientific Responsibility, and Global Continuity)

PURPOSE

This Annexure presents ten universal principles of Aram proposed as an ethical framework supporting peace, responsibility, scientific integrity, ecological continuity, human dignity, and the long-term wellbeing of humanity and the planet.

These principles are intended solely as voluntary ethical guidelines and do not create legal obligations.

INTRODUCTION

Human civilization increasingly possesses scientific and technological capabilities capable of influencing the future of humanity, biodiversity, ecological systems, and future generations.

The responsible exercise of such capabilities requires ethical guidance.

The Global Aram Framework respectfully proposes the following ten principles as a voluntary foundation for responsible decision-making.

PRINCIPLE I

DIGNITY

Every human being possesses inherent dignity.

Respect for dignity should guide governance, science, education, technology, and international cooperation.

Human progress should never be pursued through the degradation of human dignity.

PRINCIPLE II

RESPONSIBILITY

Every action generates consequences.

Individuals, institutions, corporations, governments, and international organizations share responsibility for the foreseeable impacts of their actions.

Scientific capability should be accompanied by ethical responsibility.

PRINCIPLE III

CONTINUITY

The continuity of humanity, biodiversity, ecological systems, and future generations represents a shared global responsibility.

Decisions should consider long-term impacts rather than immediate benefits alone.

PRINCIPLE IV

NON-VIOLENCE

Peaceful methods should be preferred wherever possible.

Dialogue, diplomacy, cooperation, and mutual understanding contribute to long-term stability and peace.

The reduction of unnecessary suffering remains an important ethical objective.

PRINCIPLE V

TRANSPARENCY

Public trust depends upon transparency.

Scientific institutions, governments, and organizations should seek to promote openness, accountability, and responsible communication consistent with legitimate legal requirements.

Transparency strengthens confidence and cooperation.

PRINCIPLE VI

ECOLOGICAL STEWARDSHIP

Human wellbeing depends upon healthy ecosystems.

Environmental protection, biodiversity conservation, climate responsibility, and sustainable resource use are essential components of long-term continuity.

Humanity acts as a steward rather than an owner of the natural world.

PRINCIPLE VII

ACCOUNTABILITY

Power should be accompanied by accountability.

Scientific institutions, governments, corporations, and organizations should remain answerable for their actions and decisions.

Accountability strengthens legitimacy and public confidence.

PRINCIPLE VIII

COMPASSION

Compassion encourages understanding, empathy, and respect for the wellbeing of others.

Compassion contributes to peaceful coexistence, humanitarian responsibility, and ethical decision-making.

The reduction of suffering represents a constructive objective of human civilization.

PRINCIPLE IX

COOPERATION

Many global challenges require international cooperation.

Scientific advancement, environmental protection, public health, peacebuilding, and sustainable development benefit from collaborative approaches.

Mutual respect and partnership strengthen global resilience.

PRINCIPLE X

PEACE

Peace represents both an objective and a process.

Peace includes:

- Security
- Human dignity
- Justice

- Environmental stability
- International cooperation
- Responsible governance

Peace provides the foundation upon which all other principles may flourish.

THE ARAM EQUILIBRIUM

The Global Aram Framework proposes that lasting progress emerges when the ten principles operate together.

Dignity without responsibility may become fragile.

Responsibility without compassion may become rigid.

Knowledge without accountability may become dangerous.

Power without peace may become unstable.

Continuity without cooperation may become impossible.

The ten principles therefore function as a mutually reinforcing ethical framework.

APPLICATION TO SCIENCE AND TECHNOLOGY

The principles of Aram may assist decision-makers in evaluating:

- Scientific research
- Artificial intelligence
- Environmental policy
- Emerging technologies
- International cooperation
- Long-term sustainability

The objective is not to restrict innovation but to ensure that innovation contributes positively to humanity and future generations.

CONCLUDING OBSERVATION

The Global Aram Framework respectfully proposes that ethical responsibility should evolve alongside scientific capability.

As humanity enters an era of increasingly powerful technologies, the principles of dignity, responsibility, continuity, non-violence, transparency, ecological stewardship,

accountability, compassion, cooperation, and peace may provide valuable guidance for the future.

GUIDING AFFIRMATION

Let dignity guide power.

Let responsibility guide knowledge.

Let compassion guide action.

Let peace guide civilization.

Let Aram guide humanity.

"Aram is what united you and me."

ANNEXURE – VI

GLOBAL CONTINUITY INDEX (GCI)

A Voluntary Framework for Measuring Peace, Responsibility, Sustainability, And Long-Term Civilizational Continuity

PURPOSE

This Annexure presents the conceptual framework of the Global Continuity Index (GCI), a voluntary, educational, analytical, and policy-oriented framework designed to encourage long-term thinking concerning peace, ecological continuity, scientific responsibility, ethical governance, and the wellbeing of future generations.

The GCI is not intended to replace existing international indices.

Rather, it is respectfully proposed as a complementary framework supporting international reflection concerning humanity's collective future.

INTRODUCTION

Traditional measurements of national progress frequently focus upon economic indicators, industrial output, military capability, financial growth, or short-term development metrics.

While these indicators remain important, long-term continuity requires consideration of additional factors including:

- Peace
- Environmental sustainability
- Scientific responsibility
- Human dignity
- Future generations
- International cooperation

The Global Continuity Index seeks to encourage a broader understanding of progress.

CORE OBJECTIVE

The primary objective of the GCI is to encourage governments, institutions, researchers, and civil society organizations to evaluate policies according to their contribution to long-term continuity rather than short-term gain alone.

The GCI seeks to promote:

- Responsible governance
- Peaceful development
- Ethical innovation
- Environmental stewardship
- Human wellbeing
- Intergenerational responsibility

THE TEN DIMENSIONS OF GCI

DIMENSION I

PEACE AND SECURITY

Indicators may include:

- Conflict reduction
- Diplomatic engagement
- Peaceful dispute resolution
- International cooperation
- Human security

DIMENSION II

HUMAN DIGNITY

Indicators may include:

- Human rights protection
- Equality before the law
- Access to justice
- Protection of vulnerable populations
- Social inclusion

DIMENSION III

ECOLOGICAL CONTINUITY

Indicators may include:

- Biodiversity protection
- Climate resilience
- Sustainable resource management
- Ecosystem conservation
- Environmental restoration

DIMENSION IV

SCIENTIFIC RESPONSIBILITY

Indicators may include:

- Ethical review systems
- Research transparency
- Public accountability
- Risk mitigation measures
- Responsible innovation practices

DIMENSION V

ETHICAL TECHNOLOGY GOVERNANCE

Indicators may include:

- AI ethics implementation

- Human oversight mechanisms
- Transparency frameworks
- Digital responsibility
- Technological accountability

DIMENSION VI

INTERGENERATIONAL RESPONSIBILITY

Indicators may include:

- Long-term planning
- Sustainability commitments
- Future impact assessments
- Educational investments
- Resource preservation

DIMENSION VII

PUBLIC WELLBEING

Indicators may include:

- Health outcomes
- Educational access
- Social resilience
- Community wellbeing
- Quality of life

DIMENSION VIII

COOPERATION AND TRUST

Indicators may include:

- International partnerships
- Regional cooperation
- Scientific collaboration
- Confidence-building measures
- Public trust indicators

DIMENSION IX

RESPONSIBLE GOVERNANCE

Indicators may include:

- Institutional accountability
- Transparency
- Rule of law
- Public participation
- Administrative integrity

DIMENSION X

CONTINUITY OF CIVILIZATION

Indicators may include:

- Long-term sustainability
- Cultural preservation
- Knowledge transmission
- Peaceful development
- Protection of future generations

GUIDING PRINCIPLES

The GCI shall be:

- Voluntary
- Non-binding
- Educational
- Analytical
- Non-punitive
- Future-oriented
- Respectful of national sovereignty
- Compatible with international law

The GCI is not intended to rank nations for political purposes.

Its purpose is to encourage reflection, cooperation, and continuous improvement.

POTENTIAL APPLICATIONS

The GCI may assist:

- Governments
- Universities
- Research institutions
- International organizations
- Civil society organizations
- Policy analysts
- Future generations

in evaluating long-term continuity considerations relevant to public policy and development.

RELATIONSHIP TO THE GLOBAL ARAM FRAMEWORK

The GCI serves as an analytical companion to the Global Aram Framework.

While the Global Aram Framework provides ethical principles, the GCI provides a voluntary mechanism for assessing progress toward those principles.

Together, they seek to encourage peace, responsibility, continuity, and sustainable development.

CONCLUDING OBSERVATION

The future of humanity depends not only upon what is achieved today but also upon what remains possible tomorrow.

The Global Continuity Index respectfully proposes that progress should be measured not merely by growth, power, or wealth, but also by peace, dignity, responsibility, sustainability, and continuity.

GUIDING AFFIRMATION

What is developed today should strengthen tomorrow.

What is achieved today should not endanger future generations.

Continuity is a responsibility shared by all humanity.

"Aram is what united you and me."

ANNEXURE – VII

GLOBAL ARAM PEACE MITHRAN MEET (GAPMM)

Annual International Forum for Peace, Ethical Science, Global Continuity, And Human Cooperation

PURPOSE

This Annexure presents the conceptual framework of the Global Aram Peace Mithran Meet (GAPMM), a voluntary annual international forum intended to encourage dialogue, trust-building, ethical reflection, scientific responsibility, international cooperation, and long-term continuity.

The GAPMM is respectfully proposed as a peaceful platform dedicated to constructive engagement among nations, institutions, and future generations.

INTRODUCTION

Throughout history, dialogue has served as one of humanity's most effective instruments for preventing conflict, strengthening cooperation, and promoting mutual understanding.

Direct communication among leaders often reduces misunderstanding, encourages trust, and supports peaceful solutions to shared challenges.

Recognizing these realities, the Global Aram Peace Mithran Meet is respectfully proposed as a recurring international forum dedicated to peace-centered dialogue and responsible global cooperation.

MISSION

The mission of the GAPMM is:

To strengthen peace, trust, cooperation, ethical responsibility, scientific accountability, and continuity through regular dialogue among leaders, institutions, and stakeholders from across the world.

CORE OBJECTIVES

The GAPMM seeks to:

- Promote peaceful international dialogue
- Strengthen mutual understanding among nations
- Encourage ethical scientific governance
- Support responsible technological development

- Advance environmental continuity
- Promote long-term thinking
- Encourage intergenerational responsibility
- Foster friendship among nations
- Strengthen global confidence-building measures
- Support the objectives of the United Nations Charter

PARTICIPATION

Participation may include:

- Heads of State
- Heads of Government
- Representatives of the United Nations
- International organizations
- Scientific institutions
- Universities
- Research organizations
- Civil society organizations
- Indigenous knowledge representatives
- Youth delegates
- Environmental experts
- Technology and AI specialists
- Peacebuilding practitioners

Participation shall remain entirely voluntary.

GUIDING PRINCIPLES

The GAPMM shall be guided by:

- Peace
- Dialogue
- Respect
- Cooperation

- Responsibility
- Transparency
- Human dignity
- Ecological continuity
- Scientific integrity
- Intergenerational responsibility

ANNUAL THEMATIC DIALOGUES

The forum may address themes including:

- Peace and international security
- Responsible Artificial Intelligence
- Ethical scientific development
- Environmental continuity
- Biodiversity protection
- Climate resilience
- Global health cooperation
- Future generations
- Sustainable development
- Human dignity
- Responsible innovation

THE FACE-TO-FACE DIALOGUE PRINCIPLE

The GAPMM respectfully recognizes the unique value of direct human engagement.

Face-to-face dialogue may:

- Reduce misunderstanding
- Build trust
- Encourage empathy
- Improve diplomatic communication
- Strengthen peaceful relationships
- Promote constructive problem-solving

The forum therefore encourages personal interaction and respectful exchange of views.

GLOBAL CONTINUITY REPORTING

The GAPMM may serve as a venue for the public presentation of:

- Global Continuity Index (GCI) findings
- Ethical science initiatives
- Environmental continuity assessments
- Responsible AI governance developments
- International cooperation achievements

Such reporting may contribute to transparency and public awareness.

NON-BINDING CHARACTER

The GAPMM is proposed solely as:

- A voluntary forum
- A dialogue mechanism
- A confidence-building initiative
- A platform for peaceful engagement

The GAPMM shall not possess legislative, judicial, enforcement, or coercive authority.

Participation and implementation shall remain entirely voluntary.

RELATIONSHIP TO THE UNITED NATIONS

The GAPMM is respectfully proposed as complementary to existing international institutions.

The forum seeks to support:

- The Charter of the United Nations
- International cooperation
- Peaceful settlement of disputes
- Sustainable development
- Scientific responsibility

- Human dignity

The GAPMM is not intended to replace any existing international organization or treaty framework.

EXPECTED LONG-TERM BENEFITS

Potential benefits may include:

- Increased trust among nations
- Reduced geopolitical tensions
- Greater scientific transparency
- Improved international cooperation
- Stronger ethical governance
- Enhanced environmental responsibility
- Better understanding among leaders
- Greater public confidence in international dialogue

CONCLUDING OBSERVATION

Humanity's future will depend not only upon scientific capability and economic development, but also upon the quality of its dialogue, cooperation, and mutual understanding.

The Global Aram Peace Mithran Meet respectfully proposes that regular engagement among leaders, institutions, and societies may contribute to a more peaceful, responsible, and sustainable future.

GUIDING AFFIRMATION

Let leaders meet before conflicts emerge.

Let dialogue continue before trust is lost.

Let cooperation grow before divisions deepen.

Let peace become a shared responsibility.

"Aram is what united you and me."

ANNEXURE – VIII

GLOBAL ARAM PEACE VILLAGE (GAPV)

A Proposed International Centre for Peace, Ethical Science, Global Continuity, And Human Cooperation

PURPOSE

This Annexure presents the conceptual framework of the Global Aram Peace Village (GAPV), respectfully proposed as a voluntary international platform dedicated to peace, dialogue, ethical scientific reflection, responsible innovation, environmental continuity, and international cooperation.

The proposal is submitted as a non-binding, humanitarian, educational, and peace-oriented initiative intended solely for international consideration and dialogue.

INTRODUCTION

Human civilization increasingly possesses unprecedented scientific, technological, economic, and political capabilities.

At the same time, humanity faces complex global challenges including:

- Armed conflict
- Environmental degradation
- Climate instability
- Technological risks
- Biodiversity loss
- Global mistrust
- Intergenerational concerns

These challenges increasingly require dialogue, cooperation, trust-building, and ethical reflection.

The Global Aram Peace Village is respectfully proposed as a permanent international venue dedicated to supporting these objectives.

VISION

The Global Aram Peace Village envisions a world in which:

- Dialogue is preferred over conflict
- Cooperation is preferred over hostility

- Ethical responsibility accompanies scientific progress
- Human dignity is respected
- Ecological continuity is protected
- Future generations are considered
- International friendship is strengthened

The Village is proposed as a symbol of peaceful coexistence and shared responsibility.

MISSION

The mission of the Global Aram Peace Village shall be:

To provide a permanent international platform for dialogue, ethical reflection, scientific responsibility, peacebuilding, environmental stewardship, and cooperation among nations.

POTENTIAL FUNCTIONS

The Global Aram Peace Village may serve as a venue for:

- Global Aram Peace Mithran Meet (GAPMM)
- Ethical science dialogues
- Responsible Artificial Intelligence forums
- Environmental continuity conferences
- Peacebuilding workshops
- Youth leadership exchanges
- Intergenerational dialogue initiatives
- International academic cooperation
- Global Continuity Index (GCI) presentations
- Cultural understanding programs

INSTITUTIONAL PRINCIPLES

The Global Aram Peace Village shall be guided by:

- Peace
- Non-violence
- Human dignity

- Transparency
- Responsibility
- Cooperation
- Ecological stewardship
- Scientific integrity
- Intergenerational continuity
- Respect for sovereignty

POSSIBLE STRUCTURAL COMPONENTS

The Village may include:

1. Global Dialogue Centre

A venue for diplomatic engagement, international dialogue, and peacebuilding activities.

2. Ethical Science Forum

A platform for discussions concerning responsible scientific development and emerging technologies.

3. Artificial Intelligence Ethics Centre

A venue dedicated to dialogue concerning AI governance, accountability, transparency, and peaceful applications.

4. Global Continuity Research Centre

A research and policy platform supporting long-term sustainability and continuity assessments.

5. Future Generations Forum

A platform encouraging participation by youth representatives and future-oriented policymakers.

6. Environmental Continuity Centre

A venue supporting dialogue concerning biodiversity, climate resilience, and ecological stewardship.

7. International Peace Library and Archives

A repository preserving knowledge concerning peace, ethics, scientific responsibility, and global cooperation.

POTENTIAL HOSTING ROLE OF INDIA

Recognizing India's historical contributions concerning:

- Ahimsa (non-violence)
- Aram (Moral Responsibility)
- Peaceful coexistence
- Democratic governance
- International cooperation

The Republic of India may voluntarily consider exploring opportunities to host such a platform.

This proposal is submitted entirely as a voluntary and non-binding suggestion.

Nothing contained herein shall be interpreted as creating obligations upon the Republic of India.

INTERNATIONAL PARTICIPATION

Participation may include:

- United Nations representatives
- Member States
- Scientific institutions
- Universities
- Civil society organizations
- Youth representatives
- Indigenous knowledge holders
- Environmental experts
- Peacebuilding organizations
- Technology governance experts

Participation shall remain voluntary and inclusive.

RELATIONSHIP TO EXISTING INTERNATIONAL INSTITUTIONS

The Global Aram Peace Village is intended to complement existing international institutions.

It is not proposed as a replacement for:

- The United Nations
- International treaties
- Existing multilateral organizations
- Sovereign national institutions

The Village seeks only to support dialogue, cooperation, and peaceful engagement.

LONG-TERM OBJECTIVES

Potential long-term objectives include:

- Strengthening international trust
- Encouraging responsible scientific development
- Supporting peace-centered innovation
- Promoting environmental continuity
- Advancing ethical AI governance
- Encouraging intergenerational responsibility
- Supporting international friendship
- Strengthening humanity's long-term continuity

CONCLUDING OBSERVATION

Humanity's future depends not only upon what it builds, but also upon the principles guiding what is built.

The Global Aram Peace Village respectfully proposes a space where dialogue may continue, understanding may deepen, cooperation may strengthen, and peace may flourish.

GUIDING AFFIRMATION

Let nations meet in friendship.

Let science serve peace.

Let responsibility guide innovation.

Let continuity guide civilization.

Let Aram guide humanity.

"Aram is what united you and me."

ANNEXURE – IX

FUTURE GENERATIONS DECLARATION

A Declaration on Intergenerational Responsibility, Long-Term Continuity, And The Shared Future of Humanity

PURPOSE

This Annexure respectfully affirms the principle that present generations possess responsibilities toward future generations.

It seeks to encourage long-term thinking concerning peace, scientific responsibility, environmental stewardship, technological governance, and humanity's shared future.

INTRODUCTION

Every generation inherits a world shaped by the decisions of previous generations.

Likewise, every generation contributes to the conditions inherited by those who will follow.

Humanity therefore possesses responsibilities extending beyond immediate interests and present circumstances.

The future cannot speak for itself.

Future generations cannot vote in present elections.

Future generations cannot directly participate in current policy decisions.

Yet future generations may inherit the consequences of today's actions.

This reality creates an ethical responsibility toward those who will live after us.

PRINCIPLE OF INTERGENERATIONAL RESPONSIBILITY

The present generation should seek to ensure that future generations inherit:

- Peace rather than conflict
- Sustainability rather than depletion
- Knowledge rather than ignorance

- Cooperation rather than hostility
- Opportunity rather than limitation
- Continuity rather than irreversible destruction

The interests of future generations deserve consideration in contemporary decision-making.

PEACE AND FUTURE GENERATIONS

Future generations benefit when present generations reduce conflict and strengthen cooperation.

Wars may create consequences extending far beyond their immediate duration.

Peaceful dialogue, diplomacy, and cooperation therefore represent investments in the future.

The maintenance of peace contributes to long-term continuity.

SCIENCE AND FUTURE GENERATIONS

Scientific advancement possesses the capacity to improve the lives of future generations.

At the same time, scientific and technological activities may also create long-term risks if pursued without sufficient responsibility.

Future-oriented scientific governance should consider:

- Long-term consequences
- Ethical implications
- Environmental impacts
- Human dignity
- Sustainability

Scientific knowledge should contribute positively to future generations.

ENVIRONMENTAL CONTINUITY

Future generations depend upon:

- Healthy ecosystems
- Biodiversity
- Clean air

- Clean water
- Stable climatic systems

Environmental stewardship therefore represents both a practical and ethical responsibility.

The natural world should be preserved and strengthened wherever possible.

TECHNOLOGICAL RESPONSIBILITY

Emerging technologies increasingly influence the future trajectory of civilization.

Responsible governance should encourage:

- Transparency
- Accountability
- Human oversight
- Ethical safeguards
- Peaceful applications

The benefits of innovation should be shared while minimizing foreseeable risks.

THE RIGHT TO A LIVABLE FUTURE

Future generations should inherit conditions supporting:

- Human dignity
- Public wellbeing
- Ecological stability
- Peaceful coexistence
- Educational opportunity
- Scientific progress
- Responsible governance

While future generations cannot directly assert these interests today, present generations may responsibly consider them.

A SHARED HUMAN RESPONSIBILITY

The future belongs to no single nation, ideology, institution, or generation.

The future is a shared inheritance.

Protecting continuity therefore requires:

- International cooperation
- Scientific responsibility
- Environmental stewardship
- Ethical governance
- Human solidarity

Humanity shares a collective responsibility toward the future.

CONCLUDING OBSERVATION

Civilizations are ultimately remembered not only for what they achieved, but also for what they preserved.

The decisions made today will influence generations yet unborn.

The principle of continuity therefore encourages humanity to act with wisdom, responsibility, foresight, and compassion.

FUTURE GENERATIONS AFFIRMATION

May knowledge serve continuity.

May innovation serve responsibility.

May progress serves peace.

May humanity remembers those who will inherit the future.

"Aram is what united you and me."

ANNEXURE – X

FINAL GLOBAL ARAM DECLARATION

A Declaration for Peace, Responsibility, Continuity, Human Dignity and the Shared Future of Humanity

PURPOSE

This Final Global Aram Declaration serves as the concluding moral, ethical, civilizational, and humanitarian statement of the International Petition for Ethical

Science, Global Peace, Ecological Continuity, Responsible Artificial Intelligence, Intergenerational Responsibility, and the Establishment of a Global Aram Framework for Responsible Research.

It respectfully summarizes the guiding principles, aspirations, and responsibilities proposed throughout this Petition.

PREAMBLE

Recognizing that humanity possesses unprecedented scientific, technological, economic, and political capabilities;

Recognizing that such capabilities may contribute either to peace or conflict, continuity or destruction, cooperation or division;

Recognizing that future generations will inherit the consequences of present actions;

Recognizing that international peace, human dignity, ecological continuity, responsible innovation, and ethical governance remain among the most important responsibilities of our time;

The undersigned respectfully issues the following declaration.

DECLARATION OF PRINCIPLE

We affirm that knowledge should be guided by wisdom.

We affirm that power should be guided by responsibility.

We affirm that innovation should be guided by ethics.

We affirm that governance should be guided by accountability.

We affirm that development should be guided by sustainability.

We affirm that cooperation should be guided by mutual respect.

We affirm that peace should remain humanity's highest shared objective.

DECLARATION OF SCIENTIFIC RESPONSIBILITY

Science represents one of humanity's greatest achievements.

Scientific advancement has improved health, education, communication, environmental understanding, and human wellbeing.

At the same time, scientific capability should be accompanied by ethical responsibility.

Scientific progress should contribute to:

- Peace
- Human dignity
- Environmental stewardship
- International cooperation
- Future generations
- Long-term continuity

The purpose of knowledge should not be destruction, instability, or suffering.

The purpose of knowledge should be the advancement of humanity and the protection of the future.

DECLARATION OF PEACE

Peace is not merely the absence of war.

Peace also includes:

- Human dignity
- Mutual respect
- Justice
- Cooperation
- Environmental stability
- Responsible governance

Peace remains essential for humanity's long-term flourishing.

The international community is respectfully encouraged to strengthen dialogue, diplomacy, and cooperation wherever possible.

DECLARATION OF ECOLOGICAL CONTINUITY

Human civilization depends upon healthy ecosystems.

Future generations depend upon the decisions made today.

Environmental stewardship is therefore both a practical necessity and a moral responsibility.

The protection of biodiversity, climate stability, ecological resilience, and natural systems contributes to humanity's shared future.

DECLARATION OF TECHNOLOGICAL RESPONSIBILITY

Emerging technologies possess extraordinary potential.

Artificial Intelligence, biotechnology, advanced computing, robotics, and other innovations may benefit humanity significantly.

Responsible governance should seek to ensure that technological progress remains:

- Transparent
- Accountable
- Ethical
- Human-centered
- Peace-oriented
- Sustainable

Innovation should strengthen humanity rather than endanger it.

DECLARATION OF HUMAN DIGNITY

Every human being possesses inherent dignity.

Human dignity should remain central to governance, science, education, public policy, and international cooperation.

Respect for dignity strengthens peace, stability, trust, and social wellbeing.

DECLARATION OF FUTURE GENERATIONS

Future generations represent humanity's continuing story.

Present generations possess responsibilities extending beyond immediate interests.

The future should inherit:

- Peace rather than conflict
- Sustainability rather than depletion
- Cooperation rather than hostility
- Knowledge rather than ignorance
- Continuity rather than irreversible harm

The interests of future generations deserve thoughtful consideration.

DECLARATION OF GLOBAL COOPERATION

No nation alone can fully address every challenge facing humanity.

International cooperation remains essential concerning:

- Peace and security
- Environmental continuity
- Scientific responsibility
- Public health
- Sustainable development
- Ethical technology governance

Mutual respect and partnership strengthen humanity's collective resilience.

DECLARATION OF ARAM

Aram is respectfully proposed as a universal ethical principle encouraging:

- Responsibility
- Compassion
- Peace
- Dignity
- Accountability
- Sustainability
- Cooperation
- Continuity

Aram is not presented as a legal obligation.

Aram is respectfully presented as an ethical invitation.

An invitation to act responsibly.

An invitation to think long-term.

An invitation to strengthen peace.

An invitation to preserve continuity.

FINAL GLOBAL APPEAL

The undersigned respectfully calls upon:

- The United Nations
- All United Nations Member States
- International Organizations
- Scientific Institutions
- Universities
- Research Organizations
- Civil Society
- Youth Representatives
- Future Generations

to continue advancing peace, responsibility, cooperation, scientific integrity, ecological continuity, and human dignity.

May humanity choose wisdom over recklessness.

May humanity chooses cooperation over hostility.

May humanity choose continuity over destruction.

May humanity chooses peace over conflict.

FINAL AFFIRMATION

Let knowledge serve peace.

Let science serve humanity.

Let innovation serve responsibility.

Let governance serve dignity.

Let development serve continuity.

Let cooperation serve the future.

Let Aram guide civilization.

HISTORICAL DECLARATION

The future of humanity shall not be determined solely by what humanity can do.

The future of humanity shall also be determined by what humanity chooses not to do.

The greatest achievement of civilization may not be the power it acquires.

The greatest achievement of civilization may be the wisdom with which that power is used.

CLOSING AFFIRMATION

"Aram is what united you and me."

ANNEXURE – XI

UNIVERSAL ETHICAL TRADITIONS OF HUMANITY

A Comparative Foundation for the Global Aram Framework

PURPOSE

This Annexure respectfully recognizes that humanity's ethical heritage has emerged through many civilizations, cultures, traditions, philosophies, and knowledge systems.

The purpose of this Annexure is to demonstrate that the Global Aram Framework seeks not to replace any tradition, but rather to contribute to a shared international ethical dialogue concerning peace, responsibility, dignity, sustainability, and continuity.

INTRODUCTION

Throughout history, diverse civilizations have developed principles encouraging peaceful coexistence, moral responsibility, respect for life, justice, cooperation, and human dignity.

Despite differences in language, geography, culture, and historical experience, many ethical traditions share remarkably similar aspirations.

The Global Aram Framework respectfully recognizes these common values.

ARAM

(Tamil Ethical Tradition)

Aram emphasizes:

- Moral responsibility
- Justice
- Compassion

- Ethical conduct
- Peaceful coexistence
- Human dignity
- Long-term continuity

The principle encourages responsible action guided by awareness of consequences.

AHIMSA

(Indian Tradition)

Ahimsa promotes:

- Non-violence
- Respect for life
- Compassion
- Peaceful conduct
- Reduction of suffering

The principle has influenced peace movements and humanitarian thought worldwide.

VASUDHAIVA KUTUMBAKAM

(Indian Civilizational Principle)

Often translated as:

"The World Is One Family"

This principle encourages:

- Global cooperation
- Mutual respect
- Human solidarity
- Shared responsibility
- Peaceful coexistence

UBUNTU

(African Ethical Tradition)

Ubuntu is commonly expressed as:

"I Am Because We Are"

Ubuntu emphasizes:

- Community
- Human dignity
- Mutual care
- Interdependence
- Shared humanity

THE GOLDEN RULE

(Present Across Multiple Civilizations)

Various traditions express a similar principle:

"Treat others as you would wish to be treated."

This principle promotes:

- Empathy
- Respect
- Reciprocity
- Responsibility
- Peaceful interaction

INDIGENOUS STEWARDSHIP TRADITIONS

Many Indigenous traditions emphasize:

- Respect for nature
- Intergenerational responsibility
- Ecological stewardship
- Community wellbeing
- Long-term thinking

These traditions provide valuable perspectives regarding sustainability and continuity.

CONFUCIAN RESPONSIBILITY

(East Asian Ethical Tradition)

Confucian thought emphasizes:

- Moral leadership

- Responsibility
- Social harmony
- Respect
- Ethical governance

These principles continue to influence discussions concerning public responsibility and leadership.

HUMANIST ETHICS

Humanist traditions emphasize:

- Human dignity
- Rational inquiry
- Human rights
- Responsibility
- Global cooperation

These principles contribute significantly to contemporary international dialogue.

COMMON VALUES OF HUMANITY

Despite cultural differences, many ethical traditions support:

- Peace
- Responsibility
- Compassion
- Dignity
- Cooperation
- Justice
- Sustainability
- Respect for life
- Continuity

These common values represent a shared heritage of humanity.

RELATIONSHIP TO THE GLOBAL ARAM FRAMEWORK

The Global Aram Framework seeks to contribute to this wider ethical conversation.

It does not seek to replace existing traditions.

It seeks to encourage dialogue among traditions.

It seeks to strengthen cooperation among civilizations.

It seeks to promote peace through shared values.

CONCLUDING OBSERVATION

Humanity's diversity represents one of its greatest strengths.

The future may be strengthened when ethical traditions cooperate rather than compete.

The Global Aram Framework respectfully recognizes the wisdom contained within humanity's shared moral heritage.

GUIDING AFFIRMATION

Different traditions.

Shared responsibility.

Different histories.

Shared future.

Different cultures.

Shared humanity.

"Aram is what united you and me."

ANNEXURE – XII

PEACEFUL SCIENCE SUCCESS STORIES AND THE POSITIVE CONTRIBUTIONS OF INTERNATIONAL SCIENTIFIC COOPERATION

A Recognition of Science as a Force for Peace, Human Wellbeing, And Global Continuity

PURPOSE

This Annexure respectfully recognizes major examples of scientific achievement and international cooperation that have significantly benefited humanity.

The purpose of this Annexure is to affirm that the Global Aram Framework supports science, innovation, education, and technological advancement when guided by responsibility, ethics, transparency, and peaceful objectives.

INTRODUCTION

Science has transformed human civilization.

Scientific discovery has contributed to:

- Improved health
- Increased life expectancy
- Better communication
- Disaster preparedness
- Environmental understanding
- Food security
- Education
- International cooperation

The Global Aram Framework recognizes these achievements and encourages their continued advancement.

I. GLOBAL ERADICATION OF SMALLPOX

The eradication of smallpox represents one of humanity's greatest scientific achievements.

Through international cooperation, scientific research, public health initiatives, and global solidarity:

- Millions of lives were saved
- Human suffering was reduced
- International collaboration demonstrated its effectiveness

This achievement illustrates the positive potential of science guided by humanitarian objectives.

II. GLOBAL POLIO REDUCTION INITIATIVES

Scientific research, vaccination programs, and international partnerships have dramatically reduced the prevalence of polio.

These efforts demonstrate:

- International cooperation
- Humanitarian commitment
- Long-term scientific dedication
- Collective responsibility

Scientific progress can improve the lives of future generations.

III. INTERNATIONAL SPACE COOPERATION

Projects such as the International Space Station demonstrate that scientific cooperation can transcend political differences.

Such initiatives have promoted:

- Scientific discovery
- International trust
- Educational advancement
- Technological innovation
- Peaceful cooperation

These examples illustrate the value of collaboration among nations.

IV. EARTHQUAKE AND DISASTER EARLY WARNING SYSTEMS

Scientific monitoring and forecasting technologies have saved countless lives.

Advances in:

- Seismology
- Meteorology
- Satellite observation
- Emergency communications

have strengthened humanity's ability to reduce disaster-related suffering.

Science can contribute directly to human safety and resilience.

V. GLOBAL CLIMATE SCIENCE COOPERATION

Scientific research has improved humanity's understanding of climate systems and environmental change.

International cooperation has strengthened:

- Environmental monitoring
- Climate resilience
- Sustainable development planning
- Public awareness

Science provides essential knowledge for responsible environmental stewardship.

VI. AGRICULTURAL AND FOOD SECURITY RESEARCH

Scientific advances have contributed to:

- Increased agricultural productivity
- Improved crop resilience
- Reduced hunger
- Better resource management

When guided responsibly, scientific innovation can strengthen human wellbeing.

VII. MEDICAL SCIENCE AND PUBLIC HEALTH

Medical research has contributed significantly to:

- Disease prevention
- Improved treatments
- Public health systems
- Increased life expectancy
- Reduced mortality

Scientific advancement remains one of humanity's most important tools for improving quality of life.

VIII. DIGITAL COMMUNICATION AND KNOWLEDGE SHARING

Modern communication technologies have expanded access to:

- Education
- Scientific knowledge
- International dialogue
- Human cooperation

The responsible use of digital technologies can strengthen understanding among peoples and nations.

IX. ARTIFICIAL INTELLIGENCE FOR HUMAN BENEFIT

Artificial Intelligence possesses significant potential for:

- Medical research
- Environmental monitoring
- Disaster response
- Education
- Scientific discovery
- Accessibility technologies

The Global Aram Framework supports the peaceful and ethical application of AI for the benefit of humanity.

X. SCIENCE AS A SHARED HUMAN ACHIEVEMENT

Scientific knowledge belongs to humanity's collective heritage.

Scientific progress has emerged through contributions from:

- Diverse cultures
- Multiple civilizations
- Different nations
- Successive generations

The future of science will benefit from continued international cooperation and mutual respect.

THE PRINCIPLE OF PEACEFUL SCIENCE

The Global Aram Framework respectfully affirms:

Science is not the problem.

Irresponsible application of knowledge creates risk.

Science guided by ethics can strengthen peace.

Science guided by responsibility can strengthen continuity.

Science guided by compassion can strengthen humanity.

CONCLUDING OBSERVATION

The greatest achievements of science have occurred when knowledge served humanity.

The future of science should continue to expand knowledge while strengthening responsibility, dignity, sustainability, and peace.

The objective of the Global Aram Framework is therefore not to limit science.

The objective is to encourage science that contributes positively to humanity, future generations, and the continuity of life.

GUIDING AFFIRMATION

Science can heal.

Science can educate.

Science can protect.

Science can unite.

Science guided by Aram can strengthen peace, dignity, responsibility, and continuity.

"Aram is what united you and me."

ANNEXURE – XIII

RIGHTS AND RESPONSIBILITIES OF FUTURE GENERATIONS

A Voluntary Declaration for Intergenerational Justice, Human Dignity, Ecological Continuity, And Peaceful Coexistence

PURPOSE

This Annexure respectfully affirms that future generations represent an integral part of humanity's continuing story.

The purpose of this Declaration is to encourage consideration of the long-term consequences of present actions and to strengthen international dialogue concerning intergenerational responsibility, sustainability, peace, and continuity.

This Declaration is voluntary, non-binding, and educational in nature.

INTRODUCTION

Future generations cannot directly participate in present-day decision-making.

They cannot vote.

They cannot negotiate treaties.

They cannot attend international conferences.

Yet future generations will inherit the consequences of today's decisions.

The present generation therefore possesses a unique responsibility toward those who will inherit the future.

RIGHTS OF FUTURE GENERATIONS

RIGHT 1

THE RIGHT TO PEACE

Future generations should inherit a world where peaceful coexistence remains a central objective of humanity.

Efforts to prevent conflict and strengthen international cooperation contribute to this right.

RIGHT 2

THE RIGHT TO A LIVABLE PLANET

Future generations should inherit environmental conditions capable of supporting human life, biodiversity, and ecological continuity.

RIGHT 3

THE RIGHT TO CLEAN AIR

Future generations should benefit from responsible environmental stewardship supporting healthy atmospheric conditions.

RIGHT 4

THE RIGHT TO CLEAN WATER

Freshwater resources should be protected and managed responsibly for present and future generations.

RIGHT 5

THE RIGHT TO BIODIVERSITY

Future generations should inherit a world enriched by biological diversity and healthy ecosystems.

RIGHT 6

THE RIGHT TO SCIENTIFIC BENEFIT

Future generations should benefit from scientific progress, innovation, education, and responsible technological advancement.

RIGHT 7

THE RIGHT TO KNOWLEDGE

The preservation and transmission of knowledge contribute to humanity's long-term continuity.

RIGHT 8

THE RIGHT TO HUMAN DIGNITY

Future generations should inherit institutions and societies that respect human dignity and fundamental rights.

RIGHT 9

THE RIGHT TO CULTURAL CONTINUITY

Humanity's diverse cultural traditions, languages, knowledge systems, and heritage deserve preservation for future generations.

RIGHT 10

THE RIGHT TO RESPONSIBLE GOVERNANCE

Future generations benefit when present institutions act with accountability, transparency, and long-term responsibility.

RESPONSIBILITIES OF PRESENT GENERATIONS

RESPONSIBILITY 1

To consider long-term consequences when making significant decisions.

RESPONSIBILITY 2

To strengthen peace and reduce the risk of conflict.

RESPONSIBILITY 3

To promote responsible scientific development.

RESPONSIBILITY 4

To encourage ethical technological governance.

RESPONSIBILITY 5

To protect biodiversity and ecological systems.

RESPONSIBILITY 6

To preserve knowledge and educational opportunity.

RESPONSIBILITY 7

To strengthen international cooperation.

RESPONSIBILITY 8

To reduce avoidable risks to future generations.

RESPONSIBILITY 9

To promote sustainability and continuity.

RESPONSIBILITY 10

To act with wisdom, responsibility, and foresight.

THE INTERGENERATIONAL COMPACT

The present generation inherits responsibilities from the past and transmits responsibilities to the future.

The continuity of civilization depends upon:

- Peace
- Knowledge
- Responsibility
- Cooperation
- Sustainability
- Human dignity
- Ecological stewardship

Future generations should be viewed not as distant abstractions but as future members of the human family.

CONCLUDING OBSERVATION

The future cannot protect itself.

The future depends upon decisions made today.

Intergenerational responsibility therefore represents one of humanity's most important ethical obligations.

The Global Aram Framework respectfully encourages humanity to act in ways that strengthen continuity, dignity, sustainability, and peace for generations yet to come.

FUTURE GENERATIONS AFFIRMATION

May we leave more wisdom than conflict.

May we leave more peace than division.

May we leave more continuity than destruction.

May we leave future generations a world worthy of inheritance.

GUIDING AFFIRMATION

The future is not owned.

The future is entrusted.

The future is shared.

"Aram is what united you and me."

ANNEXURE – XIV

GLOBAL CHARTER FOR PEACE-CENTERED RESEARCH

A Voluntary International Charter for Ethical Science, Responsible Innovation, And Global Continuity

PURPOSE

This Charter respectfully proposes a voluntary framework encouraging scientific research and technological innovation that contribute to peace, human dignity, ecological continuity, responsible governance, and the wellbeing of future generations.

This Charter is non-binding, educational, and advisory in nature.

PREAMBLE

Recognizing the extraordinary contributions of science to human progress;

Recognizing the importance of scientific freedom, innovation, education, and international cooperation;

Recognizing that scientific knowledge may generate both benefits and risks depending upon its application;

Recognizing humanity's responsibility toward present and future generations;

The following principles are respectfully proposed as voluntary guidelines for peace-centered research.

PRINCIPLE 1

PEACE FIRST

Scientific research should seek, wherever possible, to contribute to peaceful development, human wellbeing, international cooperation, and the reduction of suffering.

PRINCIPLE 2

RESPECT FOR HUMAN DIGNITY

Scientific activity should respect human dignity, human rights, equality, and fundamental freedoms.

Human beings should never be treated merely as instruments of experimentation or exploitation.

PRINCIPLE 3

SCIENTIFIC FREEDOM WITH RESPONSIBILITY

Scientific freedom remains essential to human progress.

At the same time, freedom should be accompanied by responsibility, transparency, and ethical reflection.

PRINCIPLE 4

TRANSPARENCY

Research institutions are encouraged to promote transparency concerning objectives, methodologies, ethical safeguards, and public accountability, consistent with legitimate legal and security requirements.

PRINCIPLE 5

ACCOUNTABILITY

Researchers, institutions, and organizations should remain accountable for foreseeable consequences arising from their work.

Accountability strengthens public trust in science.

PRINCIPLE 6

ENVIRONMENTAL RESPONSIBILITY

Scientific advancement should seek to minimize unnecessary environmental harm and support ecological sustainability wherever possible.

PRINCIPLE 7

PROTECTION OF FUTURE GENERATIONS

Long-term consequences should be considered alongside short-term benefits.

Research should seek to strengthen rather than undermine the continuity of future generations.

PRINCIPLE 8

RESPONSIBLE ARTIFICIAL INTELLIGENCE

Artificial Intelligence research should promote:

- Transparency
- Accountability
- Human oversight
- Fairness
- Safety
- Peaceful applications
- Environmental responsibility

AI should remain aligned with human wellbeing and international peace.

PRINCIPLE 9

INTERNATIONAL COOPERATION

Scientific progress benefits from cooperation across borders.

Researchers and institutions are encouraged to strengthen peaceful international collaboration wherever possible.

PRINCIPLE 10

RISK AWARENESS

Potential risks associated with emerging technologies should be identified, assessed, and responsibly managed.

The objective is not to prevent innovation but to strengthen responsible innovation.

PRINCIPLE 11

PUBLIC BENEFIT

Scientific advancement should seek, wherever possible, to contribute positively to humanity, public wellbeing, education, sustainability, and peaceful development.

PRINCIPLE 12

INTERDISCIPLINARY ETHICAL REVIEW

Complex scientific developments may benefit from ethical review involving:

- Scientists
- Ethicists
- Legal experts
- Environmental specialists
- Public representatives
- Future-oriented policy experts

PRINCIPLE 13

PEACEFUL KNOWLEDGE SHARING

The responsible sharing of scientific knowledge contributes to education, cooperation, innovation, and collective progress.

PRINCIPLE 14

CONTINUITY OF CIVILIZATION

Research should consider its potential impact upon:

- Humanity
- Biodiversity

- Ecological systems
- Future generations
- Long-term sustainability

PRINCIPLE 15

THE PRINCIPLE OF ARAM

The Charter respectfully proposes Aram (Moral Responsibility) as a complementary ethical principle encouraging:

- Responsibility
- Compassion
- Peace
- Accountability
- Cooperation
- Sustainability
- Continuity

Aram is proposed not as a legal obligation but as a voluntary ethical guide.

IMPLEMENTATION

Institutions may voluntarily consider:

- Ethical review frameworks
- Transparency mechanisms
- Sustainability assessments
- AI governance principles
- Future impact evaluations
- International cooperation initiatives

Implementation remains entirely voluntary.

CONCLUDING OBSERVATION

The future of science depends not only upon discovery but also upon responsibility.

The greatest scientific achievements are those that strengthen humanity, protect the future, and contribute to peace.

This Charter respectfully encourages research that advances knowledge while preserving dignity, sustainability, cooperation, and continuity.

CHARTER AFFIRMATION

Let science expand knowledge.

Let ethics guide power.

Let innovation serve humanity.

Let responsibility protect the future.

Let peace remain the highest purpose of progress.

GUIDING AFFIRMATION

Science should illuminate the future.

Wisdom should guide science.

Aram should guide wisdom.

"Aram is what united you and me."

ANNEXURE – XV

GLOBAL DECLARATION OF CONTINUITY

A Civilizational Declaration for Peace, Responsibility, Human Dignity, Scientific Integrity, Ecological Continuity, And the Shared Future of Humanity

PURPOSE

This Global Declaration of Continuity serves as the final integrative declaration of the International Petition for Ethical Science, Global Peace, Ecological Continuity, Responsible Artificial Intelligence, Intergenerational Responsibility, and the Establishment of a Global Aram Framework for Responsible Research.

It respectfully brings together the principles, aspirations, and recommendations contained throughout this Petition.

PREAMBLE

Recognizing that humanity possesses unprecedented scientific, technological, economic, and political capabilities;

Recognizing that the future of civilization depends not only upon knowledge but also upon the wisdom guiding its use;

Recognizing that peace, dignity, responsibility, sustainability, and cooperation represent shared aspirations across cultures and civilizations;

Recognizing that future generations will inherit the consequences of present actions;

Recognizing that humanity shares a common future on a shared planet;

The undersigned respectfully issues the following Global Declaration of Continuity.

ARTICLE I

THE PRINCIPLE OF CONTINUITY

Continuity represents the preservation and advancement of conditions that enable present and future generations to flourish.

Continuity includes:

- Peace
- Human dignity
- Knowledge
- Biodiversity
- Ecological resilience
- Responsible governance
- Scientific integrity
- International cooperation

The protection of continuity is a shared responsibility.

ARTICLE II

THE SHARED FUTURE OF HUMANITY

Humanity's future transcends national borders, political systems, and generations.

While nations remain sovereign and diverse, all peoples share common interests concerning:

- Peace
- Health
- Environmental sustainability

- Responsible technology
- Human wellbeing
- Long-term stability

International cooperation contributes to the realization of these shared interests.

ARTICLE III

PEACE AS A FOUNDATION OF CONTINUITY

Peace enables:

- Human development
- Scientific progress
- Educational advancement
- Economic opportunity
- Cultural exchange
- Environmental stewardship

The preservation of peace remains essential for long-term continuity.

ARTICLE IV

RESPONSIBLE SCIENTIFIC ADVANCEMENT

Scientific progress should continue to expand knowledge and improve human wellbeing.

Responsible scientific advancement encourages:

- Ethical reflection
- Transparency
- Accountability
- Sustainability
- Human dignity
- International cooperation

Science should strengthen humanity's future rather than undermine it.

ARTICLE V

RESPONSIBLE TECHNOLOGICAL GOVERNANCE

Emerging technologies should be developed and applied in ways that:

- Respect human dignity
- Protect public wellbeing
- Support sustainability
- Strengthen peace
- Preserve accountability
- Consider future generations

Responsible governance contributes to public trust and long-term stability.

ARTICLE VI

ENVIRONMENTAL CONTINUITY

Human civilization depends upon healthy ecological systems.

Environmental continuity includes:

- Biodiversity conservation
- Climate resilience
- Sustainable resource use
- Ecosystem protection
- Long-term stewardship

The wellbeing of future generations depends upon responsible environmental action.

ARTICLE VII

THE ROLE OF GLOBAL CONTINUITY INDEX (GCI)

The Global Continuity Index is respectfully proposed as a voluntary framework encouraging reflection concerning:

- Peace
- Responsibility
- Sustainability
- Scientific integrity
- Human dignity
- International cooperation

The GCI seeks to strengthen awareness rather than impose obligations.

ARTICLE VIII

THE ROLE OF GLOBAL ARAM PEACE MITHRAN MEET (GAPMM)

The GAPMM is respectfully proposed as a voluntary forum encouraging:

- Dialogue
- Friendship
- Cooperation
- Trust-building
- Ethical reflection
- Peace-centered engagement

Regular dialogue contributes to mutual understanding and international confidence.

ARTICLE IX

THE ROLE OF GLOBAL ARAM PEACE VILLAGE (GAPV)

The Global Aram Peace Village is respectfully proposed as a symbol of:

- Peace
- Cooperation
- Ethical responsibility
- Scientific reflection
- International friendship
- Continuity

The proposal seeks to encourage dialogue rather than create obligations.

ARTICLE X

THE ROLE OF FUTURE GENERATIONS

Future generations represent the continuation of humanity's shared story.

Present generations possess responsibilities to:

- Preserve peace
- Protect knowledge
- Strengthen sustainability

- Reduce avoidable risks
- Support long-term continuity

Future generations should remain an important consideration in contemporary decision-making.

ARTICLE XI

THE GLOBAL ARAM PRINCIPLE

The Global Aram Principle respectfully encourages:

- Responsibility over recklessness
- Cooperation over hostility
- Wisdom over short-term gain
- Sustainability over depletion
- Peace over conflict
- Continuity over destruction

Aram is proposed as a voluntary ethical invitation supporting responsible action.

ARTICLE XII

A SHARED HUMAN COMMITMENT

Humanity's greatest achievements emerge when knowledge, responsibility, cooperation, and peace work together.

No single nation, institution, ideology, or generation can secure the future alone.

The future requires shared effort.

The future requires shared responsibility.

The future requires shared commitment.

FINAL GLOBAL APPEAL

The undersigned respectfully invites:

- The United Nations
- The United Nations General Assembly
- The Secretary-General of the United Nations
- United Nations Specialized Agencies

- All United Nations Member States
- Scientific Institutions
- Universities
- Research Organizations
- Civil Society
- Youth Representatives
- Future Generations

to continue advancing peace, responsibility, scientific integrity, ecological continuity, human dignity, and international cooperation.

May humanity strengthens peace.

May humanity strengthen responsibility.

May humanity strengthen continuity.

May humanity strengthens cooperation.

May humanity strengthen hope.

HISTORICAL CIVILIZATIONAL AFFIRMATION

Civilizations are remembered not merely for the power they possessed.

Civilizations are remembered for the wisdom with which that power was exercised.

Knowledge without responsibility may create risk.

Power without ethics may create instability.

Progress without continuity may become unsustainable.

Peace guided by responsibility may strengthen the future.

The ultimate measure of civilization may be its ability to preserve dignity, continuity, and peace for generations yet unborn.

FINAL AFFIRMATION

Let knowledge serve humanity.

Let science serve peace.

Let innovation serve responsibility.

Let governance serve dignity.

Let cooperation serve continuity.

Let humanity serve the future.

Let Aram guide civilization.

GLOBAL CONTINUITY AFFIRMATION

The future is shared.

The responsibility is shared.

The hope is shared.

The continuity is shared.

"Aram is what united you and me."

ANNEXURE – XVI

IMPLEMENTATION AND INSTITUTIONAL ROADMAP

A Voluntary Phased Roadmap for The Global Aram Framework, Global Continuity Index (GCI), Global Aram Peace Mithran Meet (GAPMM), And Global Aram Peace Village (GAPV)

PURPOSE

This Annexure respectfully proposes a voluntary, peaceful, and non-binding implementation pathway for the Global Aram Framework and its associated initiatives.

The objective is not immediate institutional transformation, but gradual advancement through dialogue, research, education, international cooperation, and responsible public-policy engagement.

PHASE I

FOUNDATIONAL DIALOGUE PHASE (YEARS 1–5)

OBJECTIVES

- Public awareness
- Academic engagement
- International discussion
- Ethical science dialogue
- Future generations awareness

ACTIVITIES

- Publication of educational materials
- University discussions and seminars
- Civil society engagement
- Policy roundtables
- Pilot GCI development
- Research partnerships

EXPECTED OUTCOME

Creation of a foundational international knowledge network supporting ethical science, peace, sustainability, and continuity.

PHASE II

INTERNATIONAL COOPERATION PHASE (YEARS 5–10)

OBJECTIVES

- Expansion of international participation
- Voluntary cooperation among institutions
- Strengthening dialogue mechanisms

ACTIVITIES

- International conferences
- Academic cooperation initiatives
- Responsible AI dialogues
- Environmental continuity discussions
- Pilot continuity assessments

EXPECTED OUTCOME

Establishment of voluntary international cooperation frameworks supporting responsible innovation and long-term sustainability.

PHASE III

GLOBAL CONTINUITY PHASE (YEARS 10–25)

OBJECTIVES

- Expansion of continuity-centered governance discussions
- Wider participation in GCI initiatives
- Increased educational engagement

ACTIVITIES

- Annual GAPMM gatherings
- Publication of GCI reports
- International continuity dialogues
- Future Generations initiatives
- Ethical technology forums

EXPECTED OUTCOME

Strengthened international awareness concerning peace, responsibility, and continuity.

PHASE IV

INTERGENERATIONAL PHASE (YEARS 25–50)

OBJECTIVES

- Long-term continuity planning
- Future-oriented governance dialogue
- Sustainability-centered cooperation

ACTIVITIES

- Future Generations forums
- Environmental continuity programmes
- Peace-centered scientific cooperation
- Long-term policy consultations

EXPECTED OUTCOME

Greater alignment between scientific progress, sustainability, human dignity, and future generations.

PHASE V

CIVILIZATIONAL CONTINUITY PHASE (YEARS 50–100)

OBJECTIVES

- Long-term preservation of peace
- Responsible technological advancement
- Sustainable civilization development
- Intergenerational continuity

EXPECTED OUTCOME

A world increasingly guided by peace, responsibility, sustainability, cooperation, dignity, and continuity.

IMPLEMENTATION PRINCIPLES

- Voluntary
- Non-binding
- Educational
- Research-oriented
- Peace-centered
- Respectful of sovereignty
- Compatible with international law
- Supportive of international cooperation

GUIDING AFFIRMATION

The future is built step by step.

Continuity is achieved generation by generation.

Peace is strengthened cooperation by cooperation.

"Aram is what united you and me."

ANNEXURE – XVII

DRAFT UNITED NATIONS GENERAL ASSEMBLY RESOLUTION MODEL

Model Non-Binding Resolution for Future International Consideration

PURPOSE

This Annexure provides an illustrative and educational model of a future non-binding United Nations General Assembly Resolution inspired by the principles contained within the Global Aram Framework.

This Annexure is presented solely for educational, academic, and policy discussion purposes.

DRAFT TITLE

PROMOTING ETHICAL SCIENCE, RESPONSIBLE INNOVATION, PEACEFUL TECHNOLOGICAL DEVELOPMENT, GLOBAL CONTINUITY, AND INTERGENERATIONAL RESPONSIBILITY

THE GENERAL ASSEMBLY,

Recalling the Charter of the United Nations,

Recalling the Universal Declaration of Human Rights (1948),

Recalling the International Covenant on Civil and Political Rights (1966),

Recalling the International Covenant on Economic, Social and Cultural Rights (1966),

Recalling the Convention on Biological Diversity (1992),

Recalling the United Nations Framework Convention on Climate Change (1992),

Recalling the Paris Agreement (2015),

Recalling the UNESCO Recommendation on the Ethics of Artificial Intelligence (2021),

Recognizing the importance of scientific advancement, responsible innovation, and international cooperation for the benefit of humanity,

Recognizing the importance of peace, sustainability, human dignity, ecological continuity, and future generations,

Recognizing the value of voluntary international dialogue concerning ethical governance of emerging technologies,

1. Encourages continued international dialogue concerning ethical scientific governance and responsible innovation;
2. Encourages the peaceful development and application of emerging technologies for the benefit of humanity;
3. Invites Member States to strengthen cooperation concerning peace-centered scientific and technological advancement;
4. Encourages consideration of long-term impacts upon future generations when developing major public policies;
5. Encourages universities, scientific institutions, and research organizations to promote responsible scientific conduct;
6. Encourages voluntary cooperation concerning environmental continuity, biodiversity protection, and sustainability;
7. Notes the potential value of dialogue mechanisms promoting trust, cooperation, peace, and responsible innovation;
8. Encourages further discussion concerning continuity-centered approaches to sustainable development;

9. Invites relevant stakeholders to exchange best practices concerning ethical science, responsible AI governance, and long-term sustainability;
10. Encourages educational initiatives supporting peace, responsibility, cooperation, and future-oriented thinking;
11. Encourages international dialogue concerning intergenerational responsibility and humanity's shared future;
12. Decides to continue consideration of these issues through appropriate international dialogue and cooperation mechanisms.

CONCLUDING OBSERVATION

This illustrative resolution demonstrates how the principles contained within the Global Aram Framework may be expressed within future multilateral dialogue while fully respecting international law, sovereignty, the Charter of the United Nations, and existing international institutions.

GUIDING AFFIRMATION

Let cooperation strengthen peace.

Let responsibility strengthen science.

Let continuity strengthen humanity.

Let future generations inherit hope.

"Aram is what united you and me."

Guiding Humanitarian Principle:

“அறம் தான் உன்னையும் என்னையும் இணைத்தது”

(Aram is what united you and me)

Presented solely as a peaceful humanitarian ethic of moral responsibility, ecological continuity, non-violent coexistence, and international understanding.
